[Twitterville](#) Jul 16 2021 Twitter is the most rapidly adopted communication tool in history, going from zero to ten million users in just over two years. On Twitter, word can spread faster than wildfire. Companies no longer have the option of ignoring the conversation. Unlike other hot social media spaces, Twitterville is dominated by professionals, not students. And despite its size, it still feels like a small town. Twitter allows people to interact much the way they do face-to-face, honestly and authentically. One minute, you 're complaining about the weather with local friends, the next, you 're talking shop with a colleague based halfway across the globe. No matter where you 're from or what you do for a living, you will find conversations on Twitter that are valuable. Despite the millions of people joining the site, you 'll quickly find the ones who can make a difference to you. Social media writer Shel Israel shares revealing stories of Twitterville residents, from CEOs to the student who became the first to report the devastation of the Szechuan earthquake; from visionaries trying to raise money for a cause to citizen journalists who outshine traditional media companies. Israel introduces you to trailblazers such as: · Frank Eliason, who used Twitter to reverse Comcast 's blemished customer service reputation · Bill Fergus, who was on the team at Henry Ford Medical Center during the first "live tweeted" surgery · Scott Monty, social media officer for Ford, who held off a mob of misinformed Ranger fans and averted a PR crisis · Connie Reece, who used Twitter to raise tens of thousands of dollars for cancer patients in need · The Coffee Groundz, a Houston-area coffee shop that uses Twitter to pack the tables (and fight off Starbucks) Twitterville features many true stories as dramatic as these. But it also recounts those of ordinary businesspeople who use Twitter to get closer to their customers. And it explains how global neighborhoods will make geography increasingly irrelevant. It even explains why people sometimes really do care what you had for lunch.

Ford Bronco Dec 21 2021 GIs returning after World War II created an entirely new automotive market niche when they bought surplus Jeeps and began exploring the rugged backcountry of the American West. This burgeoning market segment, which eventually became known as sport utility vehicles (SUVs), numbered about 40,000 units per year with offerings from Jeep, Scout, Toyota, and Land Rover. In 1966, Ford entered the fray with its Bronco, offering increased refinement, more power, and an innovative coil-spring front suspension. The Bronco caught on quickly and soon established a reputation as a solid backcountry performer. In Baja, the legendary accomplishments of racers such as Parnelli Jones, Rod Hall, and Bill Stroppe further cemented the bobtail's reputation for toughness. Ford moved upstream with the introduction of the larger Bronco for 1978, witnessing a huge increase in sales for the second-generation trucks. The Twin Traction Beam front end was introduced in the third generation, and further refinements including more aerodynamic styling, greater luxury, and more powerful fuel-injected engines came on board in the generations that followed. Through it all, the Bronco retained its reputation as a tough, versatile, and comfortable rig, both on and off the paved road. With the reintroduction of the Bronco for 2020, Ford is producing a vehicle for a whole new generation of enthusiasts that looks to bring modern styling and performance to the market while building on the 30-year heritage of the first five generations of the Bronco so dearly loved by their owners. From the development process and details of the first trucks through the 1996 models, author Todd Zuercher shares technical details, rarely seen photos, and highlights of significant models along with the stories of those people whose lives have been intertwined with the Bronco for many years. This book will have new information for everyone and will be a must-have for longtime enthusiasts and new owners alike! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial; color: #000000}

The Owner of the House Oct 26 2019 Few poets have so artfully confronted American life as Louis Simpson. Persona speakers struggle with everyday issues against a backdrop of larger forces, the individual's maladjustment to a culture of materialism and brutal competition, the failure of marriage under the pressures of such a society, the failure of the American dream. Simpson wages a lover's quarrel with the world. "Louis Simpson has perfect pitch. His poems win us first by their drama, their ways of voicing our ways . . . of making do with our lives. Then his intelligence cajoles us to the brink of a cliff of solitude and we step over into the buoyant element of true poetry."—Seamus Heaney Educated at Munro College (West Indies) and at Columbia University, Louis Simpson has taught widely, most recently at the State University of New York at Stony Brook. He is the author of seventeen books of poetry and ten works of prose. He has received fellowships from the Academy of American Poetry, the Hudson Review, the Guggenheim Foundation, and received the Pulitzer Prize for Poetry.

Fire-Rescue 59 Oct 07 2020 Most firefighters join the fire service when they are young-their teens or early twenties. Alan Knoche was an exception in that he joined when he was in his late thirties. He had a lot of catching up to do, but with life experiences in the Navy, the submarine service, and working at a nuclear power facility behind him, he quickly progressed from rookie to assistant fire chief. A top responder in a volunteer fire department that answered an average of two emergency calls a day, he fought fires, cut people out of crushed automobiles, and rescued victims from everything from a quarry collapse to a gumball machine. As an EMT, he also responded to thousands of medical and trauma calls and helped people who were experiencing the worst day of their lives. These stories relate some of the emergencies he faced on his "second job." They are gritty, often challenging, and sometimes sad, but actual life-threatening incidents are seldom pleasant. That's not to say it's all serious. The occasional humorous or comical event is what helps emergency responders cope with the catastrophic and tragic sights they see on a daily basis. The men and women he served with are some of the most dedicated, talented, resourceful, skilled, and sometimes insane people you could ever hope to show up when you're having your worst day. They made these stories possible.
