Amedee Gordini Oct 10 2020 This is a story of excitement, laughs, astonishment and anger - a story of the determination of a man with a dream and a passion for motor racing in the big leagues. It is the first time that the history of the always under-financed Gordini racing team has been documented in English, and the first complete story of Gordini himself in any language. This volume will appeal to new enthusiasts and old hands of Formula 1 and sports prototype racing, especially those who have owned a Gordini-badged high-performance Renault road car. It charts Gordini's early life and beginnings in motorsport, up to 1969 when Renault took over the Gordini company, keeping his name on all the racing engines until 1986, before finally resurrecting it for a performance version of the Renault Twingo and Clio in 2009. The book is packed with evocative period images from important collections, supplementary transcripts in English from many

contemporary interviews, plus recollections from former employees remembering their time working with Gordini, and an exhaustive set of statistics. All the way it's a roller coaster of joy, despair, humour, and stunning images. The racing legend of 'Le Sorcier' lives on.

Dino Jan 31 2020 In 1956, Enzo Ferrari's son

Alfredino died and, in remembrance, Enzo named the Formula 2 V6 engine that he was working on after his son, calling it Dino. From then on, all V6 and V8 Ferrari engines were known as Dinos. There have been many such cars and engines bearing this honorable name. Dinos have powered three World Champions, numerous sports-racing car victories, and even two mountain championships. Four series of road cars have been so successful with their Dino power that they form the bulk of car sales in modern times for Ferrari. DINO is a full historical analysis of all these outstanding cars the like of which has never been researched and published before. Here, at last, true credit can be given to the Ferrari V6 and V8 cars, the cars of the principality of Alfredino. The book contains heavily-detailed appendices, details on drivers and championships, and a wealth of road test material from the best accredited sources.

General Motors 3800 V6 Engine: the Untold Story Jul 31 2022 People who owned a General Motors vehicle with the vaunted 3800 V6 engine often provide testimony about the car's great performance, be it gas mileage, acceleration or durability. Even after 25 years, people recount their satisfaction with the engine. However, only a handful of people know "how" the 3800 came to be such a fine product. That story is testimony to management, union and hourly workers coming together for a common goal. The development of the processes, teamwork and focus that ultimately enabled the 3800 engine

was slow, intermittent, multidirectional and a struggle. Hundreds of personalities from various disciplines had to have their inputs considered and digested, and only some were implemented. The collaboration of Product Engineering working with Manufacturing and hourly employees, and suppliers was embodiment of the principles put forth by Dr. Deming, and the foundation for continuous improvement of this product that earned the reputation for being "bullet-proof." Readers of *General Motors 3800 V6 Engine - the Untold Story* are provided a brief history of the Buick V6 engine that preceded the 3800 first introduced in 1988. Drawing from documents published in the 3800 Engine plant as well as numerous testimonials, the story is told chronologically. Quality Committees led by hourly personnel on all shifts were the "glue" for communicating with everyone including Product Engineering. What unfolds is a growing awareness of the complexities and constant change facing the

teams. Those pressures and changes are no different from what others face in today's fiercely competitive automotive industry. Proceeds from this book go to Carriage Town Ministries in Flint, Michigan. Dr. Dallas Gatlin, Executive Director of Carriage Town, reflects, "The people of Flint, Michigan created a great engine. The engine wasn't the 3800. It was the trust that leadership placed in the people who created the 3800. This team could have created anything. The great engine was the people." Other companies may have different challenges and issues, but the basics of Deming and the accomplishments of the 3800 team serve as a beacon for those who wish to improve product quality.
