Not Quite What I Was Planning Sep 28 2019 Deceptively simple and surprisingly addictive, *Not Quite What I Was Planning* is a thousand glimpses of humanity—six words at a time. One Life. Six Words. What's Yours? When Hemingway famously wrote, "For Sale: baby shoes, never worn," he proved that an entire story can be told using a half dozen words. When the online storytelling magazine SMITH asked readers to submit six-word memoirs, they proved a whole, real life can be told this way too. The results are fascinating, hilarious, shocking, and moving. From small sagas of bittersweet romance ("Found true love, married someone else") to proud achievements and stinging regrets ("After Harvard, had baby with crackhead"), these terse true tales relate the diversity of human experience in tasty bite-sized pieces. From authors Jonathan Lethem and Richard Ford to comedians Stephen Colbert and Amy Sedaris, to ordinary folks around the world, everyone has a six-word story to tell.

Crisis Standards of Care Jun 25 2019 Catastrophic disasters occurring in 2011 in the United States and worldwide—from the tornado in Joplin, Missouri, to the earthquake and tsunami in Japan, to the earthquake in New Zealand—have demonstrated that even prepared communities can be overwhelmed. In 2009, at the height of the influenza A (H1N1) pandemic, the Assistant Secretary for Preparedness and Response at the Department of Health and Human Services, along with the Department of Veterans Affairs and the National Highway Traffic Safety Administration, asked the Institute of Medicine (IOM) to convene a committee of experts to develop national guidance for use by state and local public health officials and health-sector agencies and institutions in establishing and implementing standards of care that should apply in disaster situations—both naturally occurring and man-made-under conditions of scarce resources. Building on the work of phase one (which is described in IOM's 2009 letter report, *Guidance for Establishing Crisis Standards of Care for Use in Disaster Situations*), the committee developed detailed templates enumerating the functions and tasks of the key stakeholder groups involved in crisis standards of care (CSC) planning, implementation, and public engagement—state and local governments, emergency medical services (EMS), hospitals and acute care facilities, and out-of-hospital and alternate care systems. *Crisis Standards of Care* provides a framework for a systems approach to the development and implementation of CSC plans, and addresses the legal issues and the ethical, palliative care, and mental health issues that agencies and organizations at each level of a disaster response should address. Please note: this report is not intended to be a detailed guide to emergency preparedness or disaster response. What is described in this report is an extrapolation of existing incident management practices and principles. *Crisis Standards of Care* is a seven-volume set: Volume 1 provides an overview; Volume 2 pertains to state and local governments; Volume 3 pertains to emergency medical services; Volume 4 pertains to hospitals and acute care facilities; Volume 5 pertains to out-of-hospital care and alternate care systems; Volume 6 contains a public engagement toolkit; and Volume 7 contains appendixes with additional resources.

Advanced Paediatric Life Support Oct 02 2022 *Advanced Paediatric Life Support* is the internationally renowned manual on emergency paediatric care, written to support the course run by the Advanced Life Support Group. The Six Hats method is a devastatingly simple technique based on the brain's different modes of thinking. The intelligence, experience and information of everyone is harnessed to reach the right conclusions quickly. These principles fundamentally change the way you work and interact. They have been adopted by businesses and governments around the world to end conflict and confusion in favour of harmony and productivity.

ECMO-Extracorporeal Life Support in Adults Jul 27 2019 Extracorporeal membrane oxygenation (ECMO) has been in clinical use for some 40 years, but it is only in the past decade that its application in the treatment of life-threatening circulatory and respiratory failure has truly flourished. This book presents a comprehensive overview of both pathophysiological and practical aspects of circulatory and respiratory extracorporeal support. The basics of ECMO, including its history, the "ECMO team", cannulation, materials, and blood-surface interactions, are first discussed. The various indications for and particular characteristics of circulatory and respiratory extracorporeal life support are then described in detail in the main part of the book. Patient care during ECMO and monitoring of the ECMO patient are also carefully covered, with explanation of the management of technical and clinical complications and transport-related problems. Further topics include long-term therapy options beyond ECMO, such as ventricular assist devices and transplants, outcome, the new frontiers of ECMO for organ procurement and future challenges. The authors are well-known experts in the field whose authoritative contributions and attention to practical aspects will be invaluable for novices and experienced practitioners alike.

Life with Diabetes, 6th Edition Jun 05 2020 *Life with Diabetes* has given thousands of healthcare professionals the tools they need to facilitate behavior change and become effective teachers and counselors. This series of teaching outlines was developed and tested by the Michigan Diabetes Research and Training Center, affiliated with the Department of Medical Education of the University of Michigan Medical School. Previous editions of this teaching curriculum have been used by thousands of educators in diabetes clinics to help their patients understand and live with the many challenges of diabetes. This newly revised edition contains up-to-date information in a structured, patient-centered curriculum to help diabetes professionals create customized lessons and deliver high-quality diabetes self-management education. Each chapter offers a detailed and complete guide to teaching a different diabetes topic, but still allows each educator to speak to patients in his or her own voice at an appropriate pace. Additional features include illustrations and visual teaching aids, patient handouts, participant assessments, education records, and an extensive support material section that helps educators customize and manage their programs. Key patient education topics covered include: Diabetes nutrition and meal planning Blood glucose management Physical activity Oral medications and insulin Behavior change and problem solving Long-term diabetes complications This new edition is presented in a convenient 3-ring binder format, giving educators more flexibility to customize the curriculum to meet their patients' needs. The comprehensive curriculum has also been updated to meet the National Standards for Diabetes Self-Management Education and Support. *Life with Diabetes* is the book that diabetes educators and clinicians need to provide complete care to their diabetes patients.

Wilderness and Rescue Medicine Dec 24 2021 *A Guide to Practicing Medicine in Challenging Environments* *Wilderness and Rescue Medicine: A Practical Guide for the Basic and Advanced Practitioner* provides the critical insight and tools required to practice medicine in remote or challenging environments. There is no place in field medicine for unreasonable restrictions on the practical application of medical judgment—that is the guiding philosophy of this user-friendly guide. *Wilderness and Rescue Medicine: A Practical Guide for the Basic and Advanced Practitioner* teaches readers how to improvise, adapt and exercise reasonable judgment at any level of medical training and in any difficult environment, from the desert to the oceans, from the backwoods to cities stricken by disaster. Grounded in the collective wisdom of hundreds of instructors, rescue personnel and medical practitioners, this text explores medical problems in a broad wilderness context—including cold injuries, altitude illness, diving and lightning injuries and toxins, among others—and pairs that exploration with the realities of solving such problems in the field, well outside the confines and comforts of mainstream medicine. *Wilderness and Rescue Medicine: A Practical Guide for the Basic and Advanced Practitioner* provides: • The most up-to-date guidance on practicing medicine in a wilderness context • An introduction to critical body systems and the general principals of trauma • Specific information on environmental and backcountry medicine • An examination of the medical role in search and rescue missions

12 Rules for Life Jan 31 2020 #1 NATIONAL BESTSELLER #1 INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. *12 Rules for Life* shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

Six Degrees: The Science of a Connected Age May 05 2020 The pioneering young scientist whose work on the structure of small worlds has triggered an avalanche of interest in networks. In this remarkable book, Duncan Watts, one of the principal architects of network theory, sets out to explain the innovative research that he and other scientists are spearheading to create a blueprint of our connected planet. Whether they bind computers, economies, or terrorist organizations, networks are everywhere in the real world, yet only recently have scientists attempted to explain their mysterious workings. From epidemics of disease to outbreaks of market madness, from people searching for information to firms surviving crisis and change, from the structure of personal relationships to the technological and social choices of entire societies, Watts weaves together a network of discoveries across an array of disciplines to tell the story of an explosive new field of knowledge, the people who are building it, and his own peculiar path in forging this new science. *PUBLICATIONS COMBINED: FIELD MEDICAL SERVICE OFFICER STUDENT HANDBOOK, SERVICE TECHNICIAN HANDBOOK (THREE VERSIONS), OUTLINES, FLEET MEDICAL POCKET REFERENCE, FIELD HYGIENE & SANITATION AND MUCH MORE* Jul 19 2021 Over 3,000 total pages ... HYGIENE AND SANITATION PREVENTION AND TREATMENT OF FIELD RELATED INJURIES STUDENT HANDOUT CASUALTY EVALUATION AND EVACUATION STUDENT HANDOUT COMBAT LIFESAVER / TACTICAL COMBAT CASUALTY CARE STUDENT HANDOUT Combat Lifesaver / Tactical Combat Casualty Care Instructor Course Student Handbook Command Philosophy My philosophy is basic...provide the highest quality service possible to every person you encounter. We are an institution of higher learning; we need to be the best with everything we do. We are preparing the next generation of heroes for the greatest fighting force on the planet - the 8404 Hospital Corpsman assigned to the United States Marine Corps. They operate at the tip-of-the spear providing combat medicine to our operational forces; they are critical to the success of the Navy & Marine Corps Medicine Team. What each one of us does on a daily basis matters, regardless of our job. We all contribute to the mission. No one job is more important than the other. If just one link (team member) in this chain fails to perform a portion of the mission to standard, we all fail. You have the ability to make a positive difference in peoples' lives every day. Every member of this team should ask themselves, "Am I living by our core values and making decisions that are consistent with these values when I interact with students, staff and the American public." Key points: - Know your chain of command and how to use it. You have not exhausted your chain of command at FMTB-West until the issue reaches me. - If you are lacking something to perform your mission, bring it to the attention of leadership so we can promptly address it. - Any safety issue should immediately be brought to leadership. - Continually strive to improve processes; ask for help before it's too late (in all aspects of your life and career). - If you see a problem, fix it or bring it to the attention of someone who can. Don't ignore it. - Supporting each other is just as important as supporting the mission. - Continue the relentless pursuit of customer satisfaction; feedback is a valuable tool in life and career. - Basic military courtesy should be a part of everyday life. - Always strive to do the right thing, even when no one is looking or when tempted to take the "easy" wrong. As a leader, I believe all members of the team are important. Our civilian shipmates are essential to the success of our mission. As a military leader, I believe, as the Sailor creed says, "I proudly serve my country's Navy combat team with Honor, Courage and Commitment. I am committed to excellence and the fair treatment of all". I cannot over emphasize the importance of leadership from E-1 to O-6, everyone has a part; I expect officers to lead from the front by setting the example. Be sure that regularly scheduled performance counseling sessions are conducted for military and civilian employees. Cover the good which should be sustained as well as the areas which need improvement. Although I like to be informed, I believe in allowing leaders to lead, managers to manage. A big part of my job is to provide you the support systems necessary for you to accomplish your mission. Tell me what you need and don't worry how it will be resourced. Let me worry about that.

Advanced Paediatric Life Support, Australia and New Zealand Sep 01 2022 Advanced Paediatric Life Support is the internationally renowned manual on emergency paediatric care, written to support the course run by the Advanced Life Support Group. This edition has been adapted specifically for use in Australia and New Zealand, with the latest procedures, medications and clinical best practice to match the guidelines of the Australia and New Zealand Resuscitation Councils. The Aeneid Apr 03 2020 Aeneas appears in The Illiad in vague snatches and starts as a traveling warrior of great piety who was loosely connected to the foundation of Rome. Virgil weaves these fragments into a powerful myth about the founding of Rome in The Aeneid. Aeneas travels from his native Troy to Italy then wages victorious war upon the Latins.

The Journey Through Grief Oct 10 2020 This spiritual companion for mourners affirms their need to mourn and invites them to journey through their very unique and personal grief. Detailed are the six needs that all mourners must yield to and eventually embrace if they are to go on to find continued meaning in life and living, including the need to remember the deceased loved one and the need for support from others. Short explanations of each mourning need are followed by brief, spiritual passages that, when read slowly and reflectively, help mourners work through their unique thoughts and feelings. Also included in this revised edition are journaling sections for mourners to write out their personal responses to each of the six needs. This replaces 1879651114.

Discovering the Brain Aug 27 2019 The brain ... There is no other part of the human anatomy that is so intriguing. How does it develop and function and why does it sometimes, tragically, degenerate? The answers are complex. In Discovering the Brain, science writer Sandra Ackerman cuts through the complexity to bring this vital topic to the public. The 1990s were declared the "Decade of the Brain" by former President Bush, and the neuroscience community responded with a host of new investigations and conferences. Discovering the Brain is based on the Institute of Medicine conference, Decade of the Brain: Frontiers in Neuroscience and Brain Research. Discovering the Brain is a "field guide" to the brain—an easy-to-read discussion of the brain's physical structure and where functions such as language and music appreciation lie. Ackerman examines: How electrical and chemical signals are conveyed in the brain. The mechanisms by which we see, hear, think, and pay attention—and how a "gut feeling" actually originates in the brain. Learning and memory retention, including parallels to computer memory and what they might tell us about our own mental capacity. Development of the brain throughout the life span, with a look at the aging brain. Ackerman provides an enlightening chapter on the connection between the brain's physical condition and various mental disorders and notes what progress can realistically be made toward the prevention and treatment of stroke and other ailments. Finally, she explores the potential for major advances during the "Decade of the Brain," with a look at medical imaging techniques—what various technologies can and cannot tell us—and how the public and private sectors can contribute to continued advances in neuroscience. This highly readable volume will provide the public and policymakers—and many scientists as well—with a helpful guide to understanding the many discoveries that are sure to be announced throughout the "Decade of the Brain."

Strategies to Improve Cardiac Arrest Survival Sep 20 2021 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

USMC COMBAT LIFESAVER / TACTICAL COMBAT CASUALTY CARE TCCC TRAINER COURSE INSTRUCTOR & STUDENT CURRICULUM Jan 13 2021 BACKGROUND IN 1996, THE NAVAL SPECIAL WARFARE COMMAND DEVELOPED A NEW SET OF TACTICALLY APPROPRIATE BATTLEFIELD TRAUMA CARE GUIDELINES NAMED TCCC. THE TCCC GUIDELINES WERE ADOPTED BY THE U.S. SPECIAL OPERATIONS COMMAND (USSOCOM) AND APPROVED BY THE AMERICAN COLLEGE OF SURGEONS (ACS) AND THE NATIONAL ASSOCIATION OF EMERGENCY MEDICAL TECHNICIANS. THE COMMITTEE ON TCCC WAS ESTABLISHED IN 2001 AND WAS DIRECTED TO FURTHER DEVELOP THE TCCC STANDARDS AND GUIDELINES. THE COMMITTEE ON TCCC FUNCTIONS AS A WORKING GROUP OF THE TRAUMA AND INJURY SUBCOMMITTEE OF THE DEFENSE HEALTH BOARD (DHB), WHICH HAS A CHARTER TO PROVIDE MEDICAL RECOMMENDATIONS TO ASD (HA) AND THE SERVICE SURGEONS GENERAL. TCCC CONCEPTS WERE INCORPORATED INTO THE 8404 CORPSMAN TRAINING CURRICULUM IN 2005. THE TCCC/CLS TRAINER COURSE WAS DEVELOPED IN 2006 TO PROVIDE CORPSMEN AS TRAINERS TO TEACH AND SUSTAIN TCCC STANDARDS TO CORPSMEN AND CLS SKILLS TO SELECTED MARINES WITHIN THE OPERATING FORCES. THE IMPLEMENTATION OF TCCC ACROSS ALL SERVICES HAS BEEN IDENTIFIED AS ONE OF THE CONTRIBUTING FACTORS TO THE HIGHEST COMBAT CASUALTY SURVIVAL RATES IN HISTORY AND IS RECOMMENDED BY ASD (HA) FOR USE WHEN TRAINING COMBAT MEDICAL PERSONNEL, REF B. TCCC INFORMATION IS PUBLISHED IN THE PREHOSPITAL TRAUMA LIFE SUPPORT MANUAL (PHTLS), MILITARY EDITION, WHICH IS UPDATED EVERY FOUR YEARS. DEPARTMENT OF DEFENSE (DOD) APPROVED TCCC TRAINING CURRICULA ARE UPDATED ON THE DOD WEBSITE MHS.OSD.MIL/EDUCATION AND TRAINING/TCCC.ASPX AS THE TCCC GUIDELINES CHANGE. GOAL. ELIMINATE PREVENTABLE LOSS OF LIFE ON THE BATTLEFIELD. IN ACCOMPLISHING THIS GOAL, THE MOST RECENT TCCC GUIDELINES APPROVED BY DOD ARE TO BE UTILIZED AS A MEANS OF PROVIDING STANDARDIZED TRAINING TO THE MARINE CORPS AND IMPROVING FIRST RESPONDER CARE AT THE POINT OF INJURY. HISTORY OF TCCC: a. It is important to realize that civilian trauma care in a non-tactical setting is dissimilar to trauma care in a combat environment. TCCC and CLS are an attempt to better prepare medical and non-medical personnel for the unique factors associated with combat trauma casualties. b. Historical data shows that 90% of combat wound fatalities die on the battlefield before reaching a military treatment facility. This fact illustrates the importance of first responder care at the point of injury. c. TCCC was originally a US Special Operations research project which was composed of trauma management guidelines focusing on casualty care at the point of injury. d. TCCC guidelines are currently used throughout the US Military and various allied countries. e. TCCC guidelines were first introduced in 1996 for use by Special Operations corpsmen, medics, and pararescue (PJs). f. The TCCC guidelines are currently endorsed by the American College of Surgeons, Committee on Trauma and the National Association of Emergency Medical Technicians. The guidelines have been incorporated into the Prehospital Trauma Life Support (PHTLS) text since the 4th edition. USMC Tactical Combat Casualty Care (TCCC / TC3) Guidelines Dec 12 2020 Tactical Combat Casualty Care Guidelines 28 October 2013 * All changes to the guidelines made since those published in the 2010 Seventh Edition of the PHTLS Manual are shown in bold text. The most recent changes are shown in red text. * These recommendations are intended to be guidelines only and are not a substitute for clinical judgment. Basic Management Plan for Care Under Fire 1. Return fire and take cover. 2. Direct or expect casualty to remain engaged as a combatant if appropriate. 3. Direct casualty to move to cover and apply self-aid if able. 4. Try to keep the casualty from sustaining additional wounds. 5. Casualties should be extricated from burning vehicles or buildings and moved to places of relative safety. Do what is necessary to stop the burning process. 6. Airway management is generally best deferred until the Tactical Field Care phase. 7. Stop life-threatening external hemorrhage if tactically feasible: - Direct casualty to control hemorrhage by self-aid if able. - Use a CoTCCC-recommended tourniquet for hemorrhage that is anatomically amenable to tourniquet application. - Apply the tourniquet proximal to the bleeding site, over the uniform, tighten, and move the casualty to cover.

Paramedic Practice Today: Above and Beyond: Volume 2 Jul 07 2020 Providing the tools you need to succeed, Volume 2 of Paramedic Practice Today: Above and Beyond completes the building of a solid

foundation for paramedic practice and now reflects the 2010 emergency cardiovascular care guidelines! A conversational, easy-to-read style simplifies topics and helps you master National Standard Curriculum objectives and meet the new National Education Standards. It includes a companion DVD with step-by-step videos demonstrating the skills in the textbook and more. Because this book corresponds to the National Registry of EMTs National EMS Practice Analysis, it provides you with the best possible preparation for the National Registry exam. Unique! The new National Education Standards are referenced, as well as the National Standard Curriculum objectives. Unique! This textbook addresses the tasks in the NREMT 2004 National EMS Practice Analysis, which is the foundation for the NREMT exam. Special topics cover paramedic practice in many environments from Farm Rescue and Wilderness EMS to Air and Ground Critical Care Transport and Tactical EMS. Four-part case scenarios appear in each chapter, and emphasize patient comfort and care: 1) an introduction sets up the scenario and asks questions, 2) the scenario continues, following the treatment of the patient and asking more questions, 3) the conclusion resolves the scenario and asks more questions, looking back on decisions that you've made, and 4) the summary answers all of the questions presented in parts 1-3. 14 skill sequences show each action with illustrated, step-by-step instructions. A companion DVD-ROM shows video clips of all the skills in the book, along with medical animations, lectures, and skills video clips from other Elsevier titles. Pediatric Pearl boxes call attention to the differences for pediatric patients. Geriatric Considerations are highlighted in special boxes to draw attention to the differences for elderly patients. Cultural Considerations boxes highlight helpful tips for interacting with people of various cultures. Paramedic Pearl boxes highlight important information from the text. An anatomy and physiology review begins chapters as needed, and for specific conditions, those chapters also include a description/definition, etiology, epidemiology and demographics, history, physical findings, differential diagnosis, therapeutic interventions, patient/family education, and prehospital pearls. Chapter Summaries are bulleted to help you review important information. Key Terms are defined in the terminology section at the end of each chapter for easy review before exams. Quizzes end each chapter, with answers and rationales at the back of the textbook. A pediatric quick-reference foldout card is included with the book. A comprehensive index and 2,222-term glossary cover all the content in Volumes 1 and 2, allowing you to quickly find key terms and topics. A drug index covers approximately 100 drugs.

Hold the Line Jan 25 2022 INSTANT NEW YORK TIMES BESTSELLER An urgent warning about the growing threat to our democracy from a twenty-year police veteran and former Trump supporter who nearly lost his life during the insurrection of January 6th. When Michael Fanone self-deployed to the Capitol on January 6, 2021, he had no idea his life was about to change. When he got to the front of the line, he urged his fellow officers to hold it against the growing crowd of insurrectionists—until he found himself pulled into the mob, tased until he had a heart attack, and viciously beaten with a Blue Lives Matter flag as shouts to kill him rang out. Now, Fanone is ready to tell the full story of that fateful day, along with exploring our country's most critical issues as someone who has had firsthand experience with many of them. A self-described redneck who voted for Trump in 2016, Fanone's closest friend was an informant—a Black, transgender, HIV-positive woman who has helped him mature and rethink his methods as a police officer. With his unique insight as an undercover detective and intense desire to do the right thing no matter the cost, Fanone provides a nuanced look into everything from policing to race to politics in a way that is accessible across all party lines. Determined to make sure no one forgets what happened at the Capitol on January 6th, Fanone has written a timely call to action for anyone who wants to preserve our democracy for future generations.

Dimensions of Human Behavior Oct 29 2019 Dimensions of Human Behavior: The Changing Life Course presents a current and comprehensive examination of human behavior across time using a multidimensional framework. Author Elizabeth D. Hutchison explores both the predictable and unpredictable changes that can affect human behavior through all the major developmental stages of the life course, from conception to very late adulthood. Aligned with the 2015 curriculum guidelines set forth by the Council on Social Work Education (CSWE), the Sixth Edition has been substantially updated with contemporary issues related to gender and sexuality, race and ethnicity, and social class and disability across the lifespan.

The Boy in the Striped Pyjamas Jun 17 2021 Lines may divide us, but hope will unite us. Nine year old Bruno knows nothing of the Final Solution and the Holocaust. He's oblivious to the appalling cruelties being inflicted on the people of Europe by his country. All he knows is that he has moved from Berlin to a desolate area where he has no one to play with. Until he meets Shmuel. Shmuel lives in a strange parallel existence on the other side of the adjoining wire fence, where everyone wears a uniform of striped pyjamas. Despite the wire fence separating them, the two boys become best friends. As they grow closer, Bruno starts to learn the terrible truth that lies beyond the fence, and what life is like for his friend. John Boyne's classic novel explores the friendship and loss of innocence of Bruno and Shmuel, during one of the worst points in history.
