ePortfolios in Australian Universities Dec 18 2021 This book focuses on essential findings concerning emerging practices of student learning through the teaching and learning benefits of the electronic portfolio (ePortfolio) in a range of disciplines at Australian universities. It explores the latest research on ePortfolios, teaching quality, future research directions for tertiary learning and teaching, institutional agendas in higher education, and the role that the ePortfolios can play in supporting improvements in pedagogic practice and student outcomes. Included in these agendas is research into the development of higher

education through the technologising of pedagogy, learner identities in discrete disciplines, and the praxis of individual university teachers. The book covers accounts of academic learning success and challenges across current higher education subject areas. By presenting case study accounts of ePortfolio use, it reveals the importance of defining and documenting how we can meaningfully develop learner portfolios in research, teaching and learning at Australian universities. With an intentional research base, the book draws on work conducted inside and outside Australia and highlights how the ePortfolio can help tertiary staff prepare for the impact of a student-created portfolio on teaching, learning, and subsequent academic scholarship.

Anthony's Textbook of Anatomy & Physiology - E-Book Aug 22 2019 Just because A&P is complicated, doesn't mean learning it has to be. Anthony's Textbook of Anatomy & Physiology, 21st Edition uses reader-friendly writing, visually engaging content, and a wide range of teaching and learning support to ensure classroom success. Focusing on the unifying themes of structure and function and homeostasis, author Kevin Patton uses a very conversational and easy-to-follow narrative to guide you through difficult A&P material. The new edition of this two-semester text has been updated to ensure you have a better understanding of how the entire body works together. In addition, you can connect with the

textbook through a number of free electronic resources, including , an electronic coloring book, 3D animations, and more! Conversational writing style at a 11.7 reading level (the lowest available for 2-semester A&P books) makes text engaging and easy to understand. Updated Genetics chapter includes important advancements in that field. Updated content on osmosis revised to make it more simple and accurate. More than 1,400 full-color photographs and drawings illustrate the most current scientific knowledge and bring difficult concepts to life. Includes a unique color key to show color scheme that is used consistently throughout the book (for example, bones are off white, enzymes are lime green, nucleus is purple). UNIQUE! Consistent unifying themes, such as the Big Picture and Cycle of Life sections in each chapter, help you comprehend the interrelation of body systems and how the structure and function of these change in relation to age and development. Numerous feature boxes including: Language of Science and Language of Medicine, Mechanisms of Disease, Health Matters, Diagnostic Study, FYI, Sport and Fitness, and Career Choices provide interesting and important sidebars to the main content. Quick Check Questions reinforce learning by prompting you to review what you've just read. Chapter outlines, chapter objectives and study tips begin each chapter. NEW! Integrative Unit Closers ties together content with integrative critical thinking questions. NEW! Additional and updated Connect It! boxes (renamed from A&P Connect) provide relevant "bonus" information for you to explore. NEW! All-new animations in the text and on Evolve

companion site help you understand the reasoning and knowledge behind each answer and assist with recalling correct answers.
