Lewis's Medical-Surgical Nursing in Canada - E-Book Mar 12 2021 Master the role and skills of the medical-surgical nurse in Canada with the book that has it all! Lewis's Medical-Surgical Nursing in Canada: Assessment and Management of Clinical Problems, 5th Edition reflects the expertise of nurses from across Canada with evidence-informed guidelines, a focus on clinical trends, and a review of pathophysiology. Clear examples make it easy to understand every concept in nursing care — from health promotion to acute intervention to ambulatory care. An Evolve website includes new case studies to enhance your skills in clinical judgement and prepare you for the Next Generation NCLEX®, CPNRE®, and REx-PNTM. From Canadian educators Jane Tyerman and Shelley L. Cobbett, this comprehensive guide provides a solid foundation in perioperative care as well as nursing care of disorders by body system. Easy-to-understand content is written and reviewed by leading experts in the field, ensuring that information is comprehensive, current, and clinically accurate. More than 800 full-colour illustrations and photographs demonstrate disease processes and related anatomy and physiology. Focus on key areas includes the determinants of health, patient and caregiver teaching, age-related considerations, collaborative care, cultural considerations, nutrition, home care, evidence-informed practice, and patient safety. Nursing Assessment chapters focus on individual body systems and include a brief review of related anatomy and physiology, a discussion of health history and non-invasive physical assessment skills, and note common diagnostic studies, expected results, and related nursing responsibilities. Unfolding case studies in each assessment chapter help you apply important concepts and procedures to real-life patient care. UNIQUE! Levels of Care approach organizes nursing management into three levels: health promotion, acute intervention, and ambulatory and home care. Nursing Management chapters focus on the pathophysiology, clinical

manifestations, laboratory and diagnostic study results, interprofessional care, and nursing management of various diseases and disorders, and are organized to follow the steps of the nursing process (assessment, nursing diagnoses, planning, implementation, and evaluation). Safety Alerts and Drug Alerts highlight important safety issues in patient care. Informatics boxes discuss the importance and use of technology with topics such as use of social media in the context of patient privacy, teaching patients to manage self-care using smartphone apps, and using Smart infusion pumps. Cultural Competence and Health Equity in Nursing Care chapter discusses culture as a determinant of health, especially in regard to Indigenous populations; health equity and health equality issues as they relate to marginalized groups in Canada; and practical suggestions for developing cultural competence in nursing care. More than 60 comprehensive nursing care plans on the Evolve website include defining characteristics, expected outcomes, specific nursing interventions with rationales, evaluation criteria, and collaborative problems.

Educational Standards for Nurses Jun 02 2020 Originally published in 1907, this title was one of several influential textbooks on nursing written by Isabel Hampton Robb, a nursing theorist. The first superintendent of nurses at Johns Hopkins School of Nursing she helped to found key organizations for nurses in the USA. Her work in nursing has led to her being thought of as a founder of modern American nursing theory, and many of the standards she implemented are still in place today. Hampton also played a large role in advancing the social status of nursing, previously thought of a profession for the lower classes. Her work in developing a curriculum of more advanced training during her time at the Johns Hopkins School of Nursing raised the status of the profession. Nursing education today would not be what it is without the contribution of Isabel Hampton Robb.

The Measurement and Development of Empathy in Nursing Apr 12 2021 This title was first published in 2000: Empathy is known to be crucial to helping relationships, but professional helpers, including nurses, do not normally display much empathy as it has not been measured in clients' terms and accordingly taught. This text examines a study in which a client-centred empathy scale was developed - the client-centred measure of empathy was found to be reliable and valid and a course designed to teach nurses to offer empathy in clients' terms was effective. The findings of the study have implications for the future design of nurse education and the goals of the health service.
