Gasoline Engine Management Jan 17 2022 The call for environmentally compatible and economical vehicles necessitates immense efforts to develop innovative engine concepts. Technical concepts such as gasoline direct injection helped to save fuel up to 20 % and reduce CO<sub>2</sub>-emissions. Descriptions of the cylinder-charge control, fuel injection, ignition and catalytic emission-control systems provides comprehensive overview of today 's gasoline engines. This book also describes emission-control systems and explains the diagnostic systems. The publication provides information on engine-management-systems and emission-control regulations.

Sustainable Maritime Transportation and Exploitation of Sea Resources Nov 15 2021

Sustainable Maritime Transportation and Exploitation of Sea Resources covers the most updated aspects of maritime transports and of coastal and sea resources exploitation, with a focus on (but not limited to) the Mediterranean area. Vessels for transportation are analysed from the viewpoint of ship design in terms of hydrodynamic, structural and plant optimisation, as well as from the perspective of construction, maintenance, operation and logistics. The exploitation of marine and coastal resources is covered in terms of fishing, aquaculture and renewable energy production as well as of subsea resources extraction. The characterisation of the marine environment is seen under the twofold perspective of providing reference loads and conditions for the design of means for the resources exploitation, but also of setting limits to the design in order to preserve the natural ambient and minimise the impact of anthropogenic activities related to both transportation and exploitation. Efficiency, reliability, safety and sustainability of sea- and Mediterranean-related human activities are the focus throughout the book. Sustainable Maritime Transportation and Exploitation of Sea Resources will be of interest to technical operators in the various areas involved (shipbuilding and ship-owner companies, research organisations, universities, certifying bodies), but will also serve as an updated reference work for government agencies and other institutional and educational bodies.

*The Best I Saw in Chess* Apr 20 2022 At the U.S. Championship in 1989, Stuart Rachels seemed bound for the cellar. Ranked last and holding no IM norms, the 20-year-old amateur from Alabama was expected to get waxed by the American top GMs of the day that included Seirawan, Gulko, Dzindzichashvili, deFirmian, Benjamin and Browne. Instead, Rachels pulled off a gigantic upset and became the youngest U.S. Champion since Bobby Fischer. Three years later he retired from competitive chess, but he never stopped following the game. In this wide-ranging, elegantly written, and highly personal memoir, Stuart Rachels passes on his knowledge of chess. Included are his duels against legends such as Kasparov, Anand, Spassky, Ivanchuk, Gelfand and Miles, but the heart of the book is the explanation of chess ideas interwoven with his captivating stories. There are chapters on tactics, endings, blunders, middlegames, cheating incidents, and even on how to combat that rotten opening, the Réti. Rachels offers a complete and entertaining course in chess strategy. At the back are listed 110 principles of play—bits of wisdom that arise naturally in the book's 24 chapters. Every chess player will find it difficult to put this sparkling book down. As a bonus, it will make you a better player.

**How to Out-Prepare Your Opponent** Oct 22 2019 The number of hours you can spend on

opening preparation is endless. Books, videos and databases offer hundreds of ever-widening variations. But how do you find your way through this labyrinth? Where do you start? And, maybe even more importantly: where do you stop? International Master Jeroen Bosch provides a solution to those answers. He presents a structured approach to the study of openings and the preparation for a club match or a tournament game. Every time-strapped chess improver will love Bosch's approach: instead of studying more hours or memorizing more lines he advises you to start making smart choices. The goal is not to reach a slight advantage in every possible line. The goal is to dictate what will happen on the board. You want to get a position you understand and are happy to play, and make your opponent feel uncomfortable. Jeroen Bosch provides you with all the tools you need to dominate the opening phase of the game: how to use move order and how to use tactics. He explains when to play a main line, when to come up with an opening surprise, or when to risk a gambit. And much, much more.
