Comparing U. S. Army Systems with Foreign Counterparts Dec 15 2021

The organizing principle for the research was the Army's warfighting functions. These functions include movement and maneuver (air and ground), intelligence, fires (indirect), sustainment, mission command, and protection. The comparison of the Army's systems with their foreign counterparts was performed

within this framework. The primary data used to develop comparisons were the on-the-record attributes of a system, such as the range of weapons and the munitions they fire, weight and protection levels of vehicles, carrying capacity of vehicles either in terms of numbers of personnel or cargo, and range and payload characteristics of helicopters. In addition to performing direct system-to-system comparisons, the research was able to identify crosscutting insights and issues that spanned several of the warfighting functions. Satellite Account on Nonprofit and Related Institutions and Volunteer Work Nov 14 2021

The Satellite Account on Nonprofit and Related institutions and Volunteer work (NPI) brings various efforts together to offer comprehensive methodological guidance for creating a coherent satellite account on what we are calling the "third, or social economy, sector," the "TSE sector" for short,

embracing three components: (a) NPIs that are not controlled by government; (b) certain related institutions that are not controlled by government, including in-scope cooperatives, mutual societies, and social enterprises; and (c) volunteer work. TSE institutions and volunteer work attract policy interest because of their growing economic presence, their extensive involvement in the solution of public problems, and the consequent contributions they are thought to make to the common good. Detailed instructions provided in this handbook will go a long way toward addressing important issues.
