The Bulletin of the General Contractors Association ... Sep 24 2022

Hong Kong Jul 18 2019 Hong Kong's impressive skyline and staggering infrastructure bear witness to the success of its construction industry. The aim of this book is to express the nature and significance of this industry. To illustrate how corporate strength, managerial abilities and technical

skills play essential roles in the construction of technologically demanding projects, the book also features profiles of eight of Hong Kong's foremost contractors. As the Hong Kong Construction Association celebrates its 75th Anniversary in 1995, this publication is an appropriate tribute to the many contracting companies that have served Hong Kong with distinction. Anthony Walker, is Professor of Surveying at the University of Hong Kong. He also wrote *The Building of Hong Kong* for the HKCA on the occasion of the Association's 70th Anniversary.

Flat Roof Construction Manual Oct 01 2020 often described as the "fifth façade", the flat roof is extremely popular with architects. Its essential task is to shelter the space beneath it from the elements. Beyond this, the use of flat roofs may be optimized by integrating them as green roofs, roof terraces, circulation areas, and even productive solar roofs. In practice, however, their correct and professional realization is a highly exacting task: in addition to providing the planner with basic rules of construction and design, the Flat Roof Manual also supplies an overview of the use and construction types as well as the standard assemblies for flat roofs. Together with the most important standards and bodies of regulations, construction drawings of the principal connection points round out the volume.

The JCT 2011 Building Sub-contracts Jan 04 2021 The majority of construction work is carried out by subcontractors. As building projects become more complex, subcontractors need to understand the implications of the agreements they sign. The JCT 2011 Building Subcontracts has been written to help the busy subcontractor deal effectively with the range of JCT 2011 subcontracts they will encounter. It covers the most commonly use 2011 subcontracts, looking at the key contract conditions, the rights and obligations of the parties and how risk is allocated. A key element of the book is the discussion of the main practical problems that arise. Accessible and practical, this book will ensure building and construction subcontractors understand these contracts and have an easy to consult reference if any questions arise. It will also be of interest to main contractors, architects, contract administrators, project managers, quantity surveyors, contracts consultants and construction lawyers.

Joint Industry Promotion Funds and Joint Labor-management Boards, Hearing Before the Special Subcommittee on Labor.... Jan 24 2020

Construction Law Jun 21 2022 Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey LLOYD QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics

and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law.

Associations and Consultants Mar 26 2020 Originally published in 1970. Trade associations and consultants in their many varieties are arguably the most important of our economic organisations. The people that manage those organisations are among the most influential members of modern society. The research reported in this book constitutes one of the first attempts to obtain systematic knowledge about the process of helping management. This title will be of interest to students of business, management, and economics, as well as policy-makers concerned with external aids in government, associations, and firms.

International Construction Arbitration Law Aug 31 2020 Arbitration in Context Series Volume 1 There is probably no area of activity more in need of reliable dispute resolution procedures than construction projects, especially if more than one jurisdiction is involved. The third edition of this eminently practical guide greatly facilitates the process for all parties concerned. The text, updated to include the latest edition of arbitral rules and introducing the Prague Rules, considers the full

range of available dispute resolution methods, including mediation, conciliation and determination by dispute review boards, before focusing specifically on arbitration. The book then looks in detail at all aspects of arbitration, from commencement of proceedings, selection of the tribunal, through preparation and collection of the evidence necessary in complex construction cases, to common procedural issues, the conduct of the hearing, the effect of the award, challenges to it and its enforcement. The third edition addresses fresh thinking on MedArb, guidance on preparation for and conduct of virtual hearings in the wake of COVID-19, technological advances to assist collection and presentation of evidence, litigation funding and includes a new chapter on the role of arbitration in tender disputes. Specific valuable features include the following: guidance on the drafting of dispute resolution provisions designed to minimise disputes and facilitate their swift resolution; flowcharts to illustrate the stages in dispute procedures and arbitration; a comparison between common law and civil law approaches to key concepts; details of the key features of a construction contract, common standard forms and procurement structures; expert guidance on effective contract administration; step-by-step advice on the conduct of a construction arbitration to maximise efficiency; and coverage of particular issues thrown up by complex construction disputes which differentiate them from other commercial disputes, with guidelines on how to approach such issues in the presentation before a tribunal. As an easy-to-use resource for both general counsel and the lawyers in private practice, this book has no peers. It has proved to be of particular value to commercial contract negotiators and corporate counsel who may have many years of experience but have not had to live through a construction dispute or manage a construction contract during the life of a project. Lawyers in private practice embarking on a construction dispute for the first time will also find this book of value, as will students of dispute resolution.
