[Literature 1976, Part 2](#) [Oct 08 2020](#) [Astronomy and Astrophysics Abstracts, which has appeared in semi-annual volumes since 1969, is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union \(according to a resolution adopted at the 14th General Assembly in 1970\). Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals, compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 18 contains literature published in 1976 and received before March 1, 1977; some older literature which was received late and which is not recorded in earlier volumes is also included.](#)

[The Road to Co-operation](#) [Dec 30 2019](#) [This critical and informed protest against the absurdity and dishonesty of neoclassical economic theory as it has progressed through the 20th century down to the present, sheds new light on the predicament faced in 2012. In The Road to Co-operation, Pearson highlights the dangers of using unrealistic mathematical models of human, organisational and market behaviour to guide policy prescriptions. He shows the damage done to real economies, markets, firms and people, by the unwarranted trust in unregulated markets, proclaimed by Friedman and colleagues, promulgated by academia and adopted by the financial-political-corporate nexus, now dominant in Anglo-American jurisdictions. Though real markets work better than known alternatives, Pearson makes the crucial distinction between the real and the speculative-financial, where totally different realities apply. Failure to make that distinction has transformed financial sectors from supportive of the real economy, to exploitative and sometimes fraudulent. Pearson provides a comparative analysis of corporate governance theory, law, and practice in different jurisdictions, including the self-destruction of post-mature Anglo-American governance with the more robust custom and practice in the industrial economies of Germany and Japan and emerging economies of China and India, which all exercise care for their real economic strengths and provide object lessons for governance in UK and US. The Road to Co-operation proposes realistic changes in policy and practice, in the context of sustainability, which would be prerequisite to recapturing real long term economic success on a co-operative and non-exploitative foundation. It will be invaluable for today's business faculty, students and practitioners as well as the 'madmen in authority'.](#)
