The Psychology of Working Oct 10 2020 In this original and major new work, David Blustein places working at the same level of attention for social and behavioral scientists and psychotherapists as other major life concerns, such as intimate relationships, physical and mental health, and socio-economic inequities. He also provides readers with an expanded conceptual framework within which to think about working in human development and human experience. As a result, this creative new synthesis enriches the discourse on working across the broad spectrum of psychology's concerns and agendas, and especially for those readers in career development, counseling, and policy-related fields. This textbook is ideal for use in graduate courses on counseling and work or vocational counseling.

The History of European Integration Sep 08 2020 The foundation of the European Union was one of the most important historical events in the second half of the 20th century. In order to fully appreciate the modern state of the EU, it is crucial to understand the history of European integration. This accessible overview differs from other studies in its focus on the major roles played by both the United States and European multinational corporations in the development of the European Union. Chronologically written and drawing

on new findings from two major archives (the archives of the US State Department and Archive of European Integration), this book sheds crucial new light on the integration process. The History of European Integration offers a major contribution to our understanding of Europe's postwar history, and will be essential reading for any student of postwar European History, Contemporary History, European Politics and European Studies.

New Perspectives on Virtual and Augmented Reality Mar 03 2020 **New Perspectives on Virtual and Augmented Reality** discusses the possibilities of using virtual and augmented reality in the role of innovative pedagogy, where there is an urgent need to find ways to teach and support learning in a transformed learning environment. Technology creates opportunities to learn differently and presents challenges for education. Virtual reality solutions can be exciting, create interest in learning, make learning more accessible and make learning faster. This book analyses the capabilities of virtual, augmented and mixed reality by providing ideas on how to make learning more effective, how existing VR/AR solutions can be used as learning tools and how a learning process can be structured. The virtual reality (VR) solutions can be used successfully for educational purposes as their use can contribute to the construction of knowledge and the development of metacognitive processes. They also contribute to inclusive education by providing access to knowledge that would not otherwise be available. This book will be of great interest to academics, researchers and post-graduate students in the field of educational technology.

Microeconomic Policy Nov 10 2020 The new and updated edition of **Microeconomic Policy** provides an excellent blend of theory and application to foster understanding of economic-based policy making. The book is eclectic in its approach and addresses a rich set of current applications. It is an ideal book for teaching microeconomic-based policy analysis to students. Todd Sandler, University of Texas at Dallas, US Designed for students who have already encountered the microeconomic principles, this valuable text focusses effectively on their policy implications, imbuing the apparently dry theory with its insights for the general welfare. William J. Baumol, New York University, US and Princeton University, US A distinctive feature of this book is the application of microeconomics to public policy. As to be expected given the international reputation of the authors there is a thorough treatment of global environmental policies, including the Stern Report, and a very useful chapter on issues of defence, conflict and terrorism. What this text offers, and most competing books do not is the breadth of coverage. In this revised edition we have integration into the topics of advances in behavioural, evolutionary and Austrian economics. The relevance to business management and government policy of the material presented makes the subject come alive in application. . . a refreshing change from the curve-shifting that dominates traditional microeconomic texts which turns-off so many of our students and prevents them from seeing the crucial importance of economics to almost every aspect of our well-being. John Lodewijks, University of Western Sydney, Australia This thoroughly accessible textbook shows students how microeconomic theory can be used and applied to major issues of public policy. In this way, it will improve their understanding of both microeconomic theory and policy and also develop their ability to critically assess them. Clem Tisdell and Keith Hartley have expanded upon their previous successful work on microeconomics. As a result, this new book is considerably updated with substantial chapter revisions, as well as new chapters dealing with business management, ownership, environmental issues, public choice, defence, conflict and terrorism. Promoting a thorough understanding of this complex yet fundamental topic, **Microeconomic Policy: A New Perspective** will undoubtedly prove an invaluable textbook for all students, academics and researchers of economics and public policy.

Perspectives on Paul Feb 11 2021 This five-views work brings together an all-star lineup of Pauline scholars to offer a constructive, interdenominational, up-to-date conversation on key issues of Pauline theology. The editors begin with an informative recent history of biblical tradition related to the perspectives on Paul. John M. G. Barclay, A. Andrew Das, James D. G. Dunn, Brant Pitre, and Magnus Zetterholm then discuss how to interpret Paul's writings and theology, especially the apostle's view of salvation. The book concludes with an assessment of the perspectives from a pastoral point of view by Dennis R. Edwards.

The New Perspective on Paul Sep 01 2022 Can someone please explain this "New Perspective on Paul"? Where did it come from and will it help or hinder Christian interpreters to grasp the apostle's writings more clearly? In **The New Perspective on Paul: An Introduction**, Kent Yinger provides concise, readable, and authoritative answers to these and other questions currently exercising students of Paul.

The Animal Connection: A New Perspective on What Makes Us Human Apr 15 2021 A bold, illuminating new take on the love of animals that drove human evolution. Why do humans all over the world take in and nurture other animals? This behavior might seem maladaptive—after all, every mouthful given to another species is one that you cannot eat—but in this heartening new study, acclaimed anthropologist Pat Shipman reveals that our propensity to domesticate and care for other animals is in fact among our species' greatest strengths. For the last 2.6 million years, Shipman explains, humans who coexisted with animals enjoyed definite adaptive and cultural advantages. To illustrate this point, Shipman gives us a tour of the milestones in human civilization—from agriculture to art and even language—and describes how we reached each stage

through our unique relationship with other animals. The Animal Connection reaffirms our love of animals as something both innate and distinctly human, revealing that the process of domestication not only changed animals but had a resounding impact on us as well.

Gospel Clarity Jun 17 2021 We pray that in the pages of this book God's people may again hear the gospel message, the good news that Christ Jesus came into the world to save sinners. We are convinced that the most important question that a person can ask is, how can a sinner be in right relationship with a holy and just God? Indeed, we are convinced that this is the central theme of the Bible. Our prayer is that the teaching of God's Word and the truth of salvation and justification in Christ come alive in new and exciting ways, and that instead of confusion God's people may have clarity, confidence, hope and assurance. The apostle Paul said it best: "Since we have been justified by faith...we rejoice in hope of the glory of God" (Romans 5:1-2).

Cracking the Foundation of the New Perspective on Paul Dec 12 2020 The New Perspective offers a revised understanding of Second Temple Judaism, providing the foundation to a new perspective on many of Paul's teachings. This important book seeks to show that this foundation cannot bear the weight it needs to carry, thus undermining the entirety of the New Perspective on Paul itself.

New Perspectives on Irish English Jul 27 2019 This volume brings together current research by international scholars on the varieties of English spoken in Ireland. The papers apply contemporary theoretical and methodological approaches and frameworks to a range of topics. A number of papers explore the distribution of linguistic features in Irish English, including the evolution of linguistic structures in Irish English and linguistic change in progress, employing broadly quantitative sociolinguistic approaches. Pragmatic features of Irish English are explored through corpus linguistics-based analysis. The construction of linguistic corpora using written and recorded material form the focus of other papers, extending and analyzing the growing range of corpus material available to researchers of varieties of English, including diaspora varieties. Issues of language and identity in contemporary Ireland are explored in several contributions using both qualitative and quantitative methods. The volume will be of interest to linguists generally, and to scholars with an interest in varieties of English.

Perspectives Old and New on Paul Oct 22 2021 Here, finally, is a much-needed review and analysis of the divergent interpretations of Paul. With a clear head and winsome sense of humor, Stephen Westerholm compares the traditional understanding of Paul to more recent readings, drawing on the writings of key figures in the debate both past and present. Westerholm first offers a detailed portrait of the "Lutheran" Paul, including the way such theologians as Augustine, Luther, Calvin, and Wesley have traditionally interpreted "justification by faith" to mean that God declares sinners "righteous" by his grace apart from "works." Westerholm then explores how Paul has fared in the twentieth century, in which "New Perspective" readings of Paul see him teaching that Gentiles need not become Jews or observe Jewish law to be God's people. The final section of the book looks anew at disputed areas of Paul's theological language and offers compelling discussion on the place of both justification by faith and Mosaic law in divine redemption.

Multinational Work Teams Dec 24 2021 This authored book's purpose is to extend and consolidate the evolving literature on multinational work teams by developing a comprehensive theory that incorporates a dynamic, multilevel view of such teams. The model used by the authors focuses on various features of the team's members, their interactions as a team, and the organizational context in which they operate. The concept of integration and differentiation, as well as the notion of equilibrium are used as a general force guiding the specific processes that link various levels of analysis in the model. Providing a framework for scholars and students in the field of organizational studies, this book presents: *a comprehensive review of the literature related to multinational and multicultural teams; *an overview of the specific model driving our thinking along with an extensive description of the component parts; *the individual and group-level elements of teams and their members; *the linking processes that connect various elements and structures; *the catalysts that give rise to changes in various elements and structures described in the theory section; and *a general integration of the model and an application of this framework for understanding MNT's in diverse cultural contexts.

Groups in Context Sep 28 2019 This volume revitalizes the field of group dynamics, collecting the best of experts in the field of group process. Groups in Context integrates new knowledge about group dynamics with an understanding of the turbulent organizational environments in which work groups now function, providing conceptual and experiential frameworks for instructors, trainers, and consultants who work with groups, as well as for group members themselves. Originally published by Addison-Wesley Publishing Co., 1990.

New Perspectives on Desistance Sep 20 2021 This book brings together a collection of emergent research that moves the debate on desistance beyond a general consideration of individual and social structural

influences. The authors examine empirical developments which have implications for policy surrounding resettlement and re-offending, but also for punishment practices. Presenting thought-provoking theoretical advances and critiques, the editors challenge and enrich traditional understandings of desistance. A wide range of chapters explore how some criminal justice interventions hinder the desistance process, but also how alternative approaches may be more helpful in promoting and supporting desistance. Thorough and diverse, this book will be of great interest to scholars of criminology and criminal justice, social policy, sociology and psychology, and of special interest to researchers and practitioners working with (ex-)offenders.

New Perspectives on the Cultural Revolution Nov 30 2019 Since the Cultural Revolution, data have been uncovered to illuminate that tumultuous decade. In this volume 13 scholars examine the gap between the ideology of the Revolution and the harsh and contradictory reality of its outcome. They focus particularly on the violence, coercion, and constant tension between the need for centralization to enforce policies and the need for decentralizing decision-making if those goals were to be achieved.

Lifestyles and Subcultures Jun 25 2019 Lifestyles and subcultures are tools through which people say - to themselves and to others - who they think they are, who they think they are similar to, and who they think they are different from. Lifestyles and subcultures are ways which people adopt to look at their own lives, and to try to keep together different roles, different practices and different realms which they are involved in. Lifestyles and subcultures are lenses through which we, as observers, analyze society, and orientate ourselves within it, looking for similarities and differences among individuals and collectivities which allow us to understand their thoughts and their actions. This book presents the main analytical approaches through which lifestyles and subcultures have been studied, and also proposes a new interpretative perspective. Today a growing panorama of social phenomena and processes possess intermediate characteristics with regard to those which in the past were identified either as lifestyles or as subcultures. The hypothesis is that consequently these phenomena could be explained and interpreted by means of an analytical framework developed by the intersection of these two perspectives, and the last part of the book is therefore devoted to the presentation of this innovative framework. This book provides new lenses and a fresh view to try to both grasp and understand a constantly-changing reality.

The Diary of Frida Kahlo Jul 19 2021 The Diary of Frida Kahlo, A New Perspective is a special edition that contains the facsimile of Frida's diary, as well as texts by Karen Cordero Reiman, historian and art critic, and Eduardo Casar, Doctor of Letters, academic and writer, who propose new and refreshing readings about this masterpiece regarding it's visual and literary forms.

A New Perspective on Relativity Jul 31 2022 Starting off from noneuclidean geometries, apart from the method of Einstein's equations, this book derives and describes the phenomena of gravitation and diffraction. A historical account is presented, exposing the missing link in Einstein's construction of the theory of general relativity: the uniformly rotating disc, together with his failure to realize, that the Beltrami metric of hyperbolic geometry with constant curvature describes exactly the uniform acceleration observed. This book also explores these questions: * How does time bend? * Why should gravity propagate at the speed of light? * How does the expansion function of the universe relate to the absolute constant of the noneuclidean geometries? * Why was the Sagnac effect ignored? * Can Maxwell's equations accommodate mass? * Is there an inertia due solely to polarization? * Can objects expand in elliptic geometry like they contract in hyperbolic geometry?

New Perspectives on Arson and Firesetting Jan 01 2020 *New Perspectives on Arson and Firesetting: The Human-Fire Relationship* is the first forensic text to move away from a sole focus on anti-social firesetting. The author presents a broader investigation of the role of fire in human life with a view to informing research and practice. This book examines the evolutionary, psychological and social significance of fire. Drawing on interdisciplinary literature and original research data, it challenges the existing understanding of arson and firesetting. A new concept - fire use - is introduced, which is conceptualised as sitting on a continuum from non-criminalised to criminalised behavior. The author combines her experience as a practitioner forensic psychologist with her own research to consider the practical application of an alternative perspective. This includes a particular focus on the assessment and treatment of fire setters and a call for a socially informed approach to prevention. The forensic scope, applied focus, and emphasis on the importance of interdisciplinary research and practice makes *New Perspectives on Arson and Firesetting* essential reading for students in fields such as anthropology, sociology, criminology, and psychology, as well as interdisciplinary scholars, forensic practitioners, and allied professionals. The author is donating her royalties in full to Pancreatic Cancer UK.

Planting May 05 2020 *Planting: A New Perspective* is an essential resource for designers and gardeners looking to create plant-rich, beautiful gardens that support biodiversity and nourish the human spirit. An intimate knowledge of plants is essential to the success of modern landscape design, and *Planting* makes Oudolf's considerable understanding of plant ecology and performance accessible, explaining how plants behave in different situations, what goes on underground, and which species make good neighbors. Extensive plant charts and planting plans will help you choose plants for their structure, color, and texture as

well as the way they perform in the landscape. A detailed directory with details like each plant's life expectancy, the persistence of its seedheads, its tendency to spread, and propensity to self-seed, this book is a beautiful and invaluable resource.

Design Patterns Explained Jun 05 2020 "One of the great things about the book is the way the authors explain concepts very simply using analogies rather than programming examples-this has been very inspiring for a product I'm working on: an audio-only introduction to OOP and software development." -Bruce Eckel "...I would expect that readers with a basic understanding of object-oriented programming and design would find this book useful, before approaching design patterns completely. Design Patterns Explained complements the existing design patterns texts and may perform a very useful role, fitting between introductory texts such as UML Distilled and the more advanced patterns books." -James Noble Leverage the quality and productivity benefits of patterns-without the complexity! Design Patterns Explained, Second Edition is the field's simplest, clearest, most practical introduction to patterns. Using dozens of updated Java examples, it shows programmers and architects exactly how to use patterns to design, develop, and deliver software far more effectively. You'll start with a complete overview of the fundamental principles of patterns, and the role of object-oriented analysis and design in contemporary software development. Then, using easy-to-understand sample code, Alan Shalloway and James Trott illuminate dozens of today's most useful patterns: their underlying concepts, advantages, tradeoffs, implementation techniques, and pitfalls to avoid. Many patterns are accompanied by UML diagrams. Building on their best-selling First Edition, Shalloway and Trott have thoroughly updated this book to reflect new software design trends, patterns, and implementation techniques. Reflecting extensive reader feedback, they have deepened and clarified coverage throughout, and reorganized content for even greater ease of understanding. New and revamped coverage in this edition includes Better ways to start "thinking in patterns" How design patterns can facilitate agile development using eXtreme Programming and other methods How to use commonality and variability analysis to design application architectures The key role of testing into a patterns-driven development process How to use factories to instantiate and manage objects more effectively The Object-Pool Pattern-a new pattern not identified by the "Gang of Four" New study/practice questions at the end of every chapter Gentle yet thorough, this book assumes no patterns experience whatsoever. It's the ideal "first book" on patterns, and a perfect complement to Gamma's classic Design Patterns. If you're a programmer or architect who wants the clearest possible understanding of design patterns-or if you've struggled to make them work for you-read this book.

Overview Mar 27 2022 A stunning and unique collection of satellite images of Earth that offer an unexpected look at humanity, derived from the wildly popular Daily Overview Instagram account. Inspired by the 'Overview Effect' - a sensation that astronauts experience when given the opportunity to look down and view the Earth as a whole - the breathtaking, high-definition satellite photographs in OVERVIEW offer a new way to look at the landscape that we have shaped. More than 200 images of industry, agriculture, architecture, and nature highlight incredible patterns while also revealing a deeper story about human impact. This extraordinary photographic journey around our planet captures the sense of wonder gained from a new, aerial vantage point and creates a perspective of Earth as it has never been seen before. 'Stunning, surprising and intriguing photographs of Earth from the skies.' Guardian 'Absolutely gorgeous, yet absolutely gut-wrenching' Wired

New Perspectives on Curriculum, Learning and Assessment Oct 29 2019 This book offers a detailed analysis and assessment of the state of education round the world. The argument is made that education and curriculum practices are deficient for two reasons. The first is the adoption by governments, policy-makers and practitioners of a set of knowledge practices that can be broadly characterised as empiricist and technicist, and which has come to dominate how curricula are constructed and certainly how education systems and their work can be described. The second is the adoption of a model of curriculum that is both backward-looking and, in its own terms, confused and muddled. This book then sets out an alternative model, which is more cogent and better focused on human wellbeing.

New Perspectives on Retailing and Store Patronage Behavior Aug 20 2021 Retailing and consumer patronage behavior constitute fascinating research areas within the field of marketing. Retailing contributes to an increasing proportion of gross national products and employment but is, however, also faced with problems and opportunities like increased product complexity, rapidly changing consumer expectations, and the introduction of new technologies. Also, consumers are facing markets of increasingly complexity when making decisions on how to conduct their behavior, primarily as a result of new technologies, shorter products life cycles in general, and higher complexity of products and services. In this book, we present and deal with various topics in relation to retailing and consumer patronage behavior. Together, these topics involve different problem settings and draw on different theories, models and statistical techniques. However, it is common to all the results presented in the following chapters (with the exception of chapter II) that they, in total or in part, rest on a major survey, which was conducted by the authors in 1999. Our now retired colleague, Hans Engstrøm participated in preparing this survey and did a great job in providing research ideas. For this, and for many stimulating discussions, we are highly grateful.

Human Rights and Drug Control May 17 2021 This book uses a human rights perspective - developed philosophically, politically and legally - to change the way in which we think about drug control issues. The prohibitionist approach towards tackling the 'drugs problem' is not working. The laws and mentality that see drugs as the problem and tries to fight them, makes the 'drugs problem' worse. While the law is the best-placed mechanism to regulate our actions in relation to particular drugs, this book argues against the stranglehold of the criminal law, and instead presents a human rights perspective to change the way we think about drug control issues. Part I develops a conceptual framework for human rights in the context of drug control - philosophically, politically and legally - and applies this to the domestic (UK) and international drug control system. Part II focuses on case law to illustrate both the potential and the limitations of successfully applying this unique perspective in practice. The conclusion points towards a bottom-up process for drug policy which is capable of reconfiguring the mentality of prohibition. This book will be of interest to students and scholars of human rights, criminal law, criminology, politics and socio-legal studies.

Critical New Perspectives on ADHD Jan 31 2020 Experts from all over the world take a critical, highly international and often controversial perspective on the ADHD phenomenon - a condition that has reached global proportions, significantly affecting the lives of children, parents and teachers worldwide. This book raises a number of concerns often not covered by the material currently available to parents and practitioners. Critical New Perspectives on ADHD unpicks the myths surrounding the development of this phenomenon and leaves no stone unturned in its search for answers. An in-depth exploration into the reasons for the emergence and maintenance of ADHD lead to suggested explanations of the dominance of US psychiatric models and the need for new markets for major pharmaceutical companies, as well as the functions that ADHD diagnoses fulfil in families, classrooms and communities. In a world where moves to educational inclusion are paradoxically paralleled by the ever-increasing use of medication to control children's behaviour, this book scrutinises current accepted practice and offers alternative perspectives and strategies for teachers and other education professionals. This is an invaluable resource for anyone with a serious interest in ADHD and other behavioural difficulties.

A New Perspective on the Use of Paul in the Gospel of Mark Jun 29 2022 This volume presents a detailed case for the plausible literary dependence of the Gospel of Mark on select letters of the apostle Paul. The book argues that Mark and Paul share a gospel narrative that tells the story of the life, death, resurrection, and second coming of Jesus Christ "in accordance with the scriptures," and it suggests that Mark presumed Paul and his mission to be constitutive episodes of that story. It contends that Mark self-consciously sought to anticipate the person, teachings, and mission of Paul by constructing narrative precursors concordant with the eventual teachings of the itinerant apostle—a process Ferguson labels Mark's 'etiological hermeneutic.' The book focuses in particular on the various (re)presentations of Christ's death that Paul believed occurred within his communities—Christ's death performed in ritual, prefigured in scripture, and embodied within Paul's person—and it argues that these are all seeded within and anticipated by Mark's narrative. Through careful argument and detailed analysis, *A New Perspective on the Use of Paul in the Gospel of Mark* makes a substantial contribution to the ongoing debate about the dependence of Mark on Paul. It is key reading for any scholar engaged in that debate, and the insights it provides will be of interest to anyone studying the Synoptic Gospels or the epistles of Paul more generally.

Shake Jan 25 2022 An artisanal cocktail book by the entrepreneurs who invented the The Mason Shaker cocktail shaker, whose mission is to bring cocktail crafting out of the bar and into the home. Design, cocktail, and culinary enthusiasts Eric Prum and Josh Williams realized that while cocktail bars have sprouted up just about everywhere, good drinks still couldn't be found in the one place where they always mixed them: at home with friends. So, from their Brooklyn workshop, where they designed, created, and launched The Mason Shaker, a now-iconic invention that transformed a Mason jar into a cocktail shaker, they also created Shake. One part instructional recipe book and one part photo journey through their year of cocktail crafting, the book is a simple and inspirational expression of their seasonal, straightforward approach to drinks and entertaining: Mixing cocktails should be simple, social, and above all, fun. Each recipe is presented visually, in four color photos, as well as in written recipes, making Shake both an arresting gift and a practical guidebook to simple, elegant cocktails.

Providing a New Perspective on Understanding and Measuring of Customer Inspiration Oct 02 2022 The exploration of inspiration from a scientific perspective is not easy. Due to its divine and spiritual past, the phenomenon appears mysteriously and unscientifically, although psychologists have attempted to uncover inspiration against all odds. Marketing scholars have also become interested in the topic and started to uncover customers' inspiration in the marketing domain. This book aims to advance the research about inspiration in marketing by dedicating three consecutive studies to this topic. First, customer inspiration is defined and conceptualized within the marketing domain. Second, a measurement tool is developed that helps to assess customer inspiration in an actionable way. Third, customer inspiration is placed in relation to other constructs in terms of conceptual and empirical differentiation, as well as its exploratory power.

Thinking in English Jul 07 2020 Thinking In English represents Dr. Muciaccia's unique method of teaching English to non-native English speakers. Unlike any other English as a Second Language (ESL) book,

Muciaccia's book features the “cultural immersion” approach that he has developed and practiced to a fine degree. In addition to his methodology, Muciaccia includes words of encouragement and reviews from people who have benefited from his approach to teaching and learning English.
