Treatise - the London Diary
Jan 28 2020

London, the very name of this iconic capital of United Kingdom evokes strong emotions and associations, wanderlust, fashion shopping, a plush lifestyle, land of the rich famous, architecture dated back hundreds of years, rainy days, teatime; well, the list is endless. Wonder

joys of living in a multicultural, multiethnic, international city like London abound. This book, *Treatise - London Diaries* is a compendium of scholarly articles, experiences, viewpoints, research reports, and even some historical accounts all with a perspective to London and United Kingdom and is intended for a very holistic reading experience.

Plunkett's Infotech Industry Almanac 2006 2021 Plunkett's InfoTech Industry Almanac presents a complete analysis of the technology business, including the convergence of hardware, software, enterprise and telecommunications. This market research tool includes our analysis of the major trends affecting the industry, from the rebound of the global PC and server market, to consumer and enterprise software, computers, open systems such as Linux, web services and network equipment. In addition, we provide statistical tables covering the industry, from computer sector revenues to broadband subscribers to semiconductor industry production. No other source provides this book's easy-to-understand comparisons of growth, expenditures, technologies, imports/exports, corporations, research and other vital subjects. The corporate profile section provides in-depth, one-page profiles on each of the top 500 InfoTech companies. We have used our massive databases to provide you with unique, objective analysis of the largest and most important companies in: Computer Hardware, Computer Software, Internet Services, E-Commerce, Networking, Semiconductors, Memory, Storage, Information Management and Data Processing. We've been working harder than ever to gather data on all the latest trends in information technology. Our research effort is an exhaustive study of new technologies and discussions with experts at dozens of innovative tech companies. Purchasers of the printed book or PDF version may receive a free CD-ROM database of the corporate data, enabling export of vital corporate data for mail merge and other uses.

Corporate Social Responsibility, Accountability and Governance 2022 The "business case" for corporate social responsibility, which suggests that socially and environmentally aware companies can expect to reap financial rewards, is seemingly gaining widespread acceptance within the business community, particularly apparent in the ever-increasing number of prominent companies parading their social, ethical and environmental credentials by producing paper- or web-based social and environmental, or sustainability, reports. In so doing, reporting companies claim, they are demonstrating a clear commitment to transparency and accountability to their key stakeholder groups. However, in the prevailing voluntaristic, business-case centred climate within which such initiatives are taking place, little thought appears to have gone into the question of how stakeholders, other than the capital provider group, can actually use corporate disclosures offered in order to hold management accountable for the social and environmental consequences of their actions. While much corporate rhetoric abounds concerning notions of stakeholder dialogue and engagement, a rigorous analysis of the governance implications of their claimed commitment to the principles of corporate social responsibility is largely conspicuous by its absence. *Corporate Social Responsibility, Accountability and Governance* seeks to explore this "missing link" between CSR (and associated reporting initiatives) and corporate governance mechanisms that are capable of embracing true stakeholder accountability. A wide range of empirical studies, drawing on experiences of both public- and private-sector initiatives in Europe, the United States, Canada, South America and Asia, offer insightful analysis of the complex relationships between the state, the market and civil society in the development of CSR, accountability and sustainable development. The book employs a multidisciplinary perspective in order to analyse the political, social, economic, technological and organisational shaping of CSR. The complexities underpinning the concept are thereby clearly drawn out and the gross oversimplifications inherent in the prevailing consultancy-driven, business-case literature are painfully exposed. Above all, the book offers a sound, practically and theoretically informed contribution to the public policy debate and reflects and builds on urgent calls from public- and private-sector policy-makers as well as academics to develop better governance and accountability frameworks for business to deal with the imperatives of social responsibility, sustainable development and ethics. This book is divided into five parts. Part 1, the complex concepts of responsibility, accountability and governance are discussed, and in part 2 the presumed relationships between the state, the market and civil society in improving accountability and governance are explored and critiqued. Part 2 consists of chapters relating to corporate social responsibility and stakeholder theory. Part 3 is concerned with empirical studies covering governance structures, networks and corporate social responsibility. Part 4 deals with corporate governance and its implications for regulation.

and civil society. Part 5 discusses multinational companies and how they impact on national governance regimes. Finally, a summary is provided with emerging international patterns of accountability and governance structures. Corporate Social Responsibility, Accountability and Governance will be essential reading for public and private policy-makers and practitioners and academics interested in how CSR can become more than a soundbite, and rather a substantial force for better global corporate governance and accountability.

Punishing Immigrants Nov 02 2020 Arizona's controversial new immigration bill is just the latest of many steps in the new criminalization of immigrants. While many cite the presumed criminality of illegal alien as an excuse for ever-harsher immigration policies, it has in fact been well-established that immigrants commit more crime, and in particular less violent crime, than the native-born and that their presence in communities is associated with higher crime rates. Punishing Immigrants moves beyond debunking the presumed crime-immigration linkage, broadening the focus to encompass issues relevant to law and society, immigration and refugee policy, and victimization, as well as crime. The original essays in this volume uncover and identify unanticipated and hidden consequences of immigration policies and practices here and abroad at a time when immigration to the U.S. is near an all-time high. Ultimately, Punishing Immigrants illuminates the nuanced and layered realities of immigrants' lives, describing the varying complexities surrounding immigration, crime, and victimization.

The Palgrave Handbook of Australian and New Zealand Criminology, Crime and Justice Jul 18 2019 This handbook engages key debates in Australian and New Zealand criminology over the last 50 years. In six sections, containing 56 original chapters, leading researchers and practitioners investigate topics such as the history of criminology; crime and justice data; law reform; gangs; youth crime; violent, white collar and corporate crime; cybercrime; terrorism; sentencing; Indigenous courts; child witnesses and children of prisoners; complaints processes; gun laws; alcohol policies; and criminal profiling. Key sections highlight criminological theory and, crucially, Indigenous issues and perspectives on criminal justice. Contributors examine the implications of past and current trends in official data collection, crime policy, and academic investigation to build up an understanding of under-researched and emerging problem areas for future research. An authoritative and comprehensive text, this handbook constitutes a long-awaited and necessary resource for dedicated academics, public policy analysts, and university students.

The Global Findex Database 2017 Oct 01 2020 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data source on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The first survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data

used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

Landscape Architecture for Sea Level Rise Feb 17 2022 This book assesses and illustrates innovative and practical world-wide measures for combating sea level rise from the profession of landscape architecture. The work explores how the appropriate mixture of integrated, multi-scalar flood protection mechanisms can reduce risks associated with flood events including sea level rise. Because sea level rise is a global issue, illustrative case studies performed from the United States, Korea, Australia, New Zealand, Thailand, Japan, China, and the Netherlands identify the structural (engineered), non-structural (nature-based), and hybrid mechanisms (mixed) used to combat sea level rise and increase flood resilience. The alternative flood risk reduction mechanisms are extracted and analyzed from each case study to develop and explain a set of design-based typologies to combat sea level rise which can then be applied to help protect new and existing communities. It is important for those located within the current or future floodplain considering sea level rise and those responsible for land use, developmental, and population-related activities within these areas to strategically implement a series of integrated constructed and green infrastructure-based flood risk reduction mechanisms to adequately protect threatened areas. As a result, this book is beneficial to both academics and practitioners related to multiple design professions such as urban designers, urban planners, architects, real estate developers, and landscape architects.

Administrative Decision-Making in Australian Migration Oct 21 2019 The ANU College of Law, Migration Law Program is pleased to introduce a text in administrative decision-making in Australian migration law. Over the past eight years we have assembled a team of some of Australia's most highly qualified migration agents and migration law specialists to deliver the Graduate Certificate in Australian Migration Law & Practice, and the Master of Laws in Migration Law. Alan Freckelton has worked with the Migration Law Program since 2008. Through personal recollections and a comprehensive analysis of administrative decision-making, he brings his professional expertise and experience in this complex field of law to the fore. The examination of High Court decisions, parliamentary speeches and public opinion bring this contentious area of law and policy to life, enabling the reader to consider the impact that legislative and administrative decision-making has upon the individual and society as a whole.

Seven Ways to Change the World 2020 THE SUNDAY TIMES TOP TEN BESTSELLER 'His vision, ideas and passion shine through on every page' Ed Balls 'Compelling, challenging, inspiring and very timely' Piers Morgan 'Immensely powerful and persuasive...I found it exhilarating throughout' Joanna Lumley With the Covid-19 pandemic swept across the globe in 2020, it created an unprecedented impact, greater than the aftermath of 9/11 or the global financial crisis. But out of such disruption can come a new way of thinking and in this superb new book former UK prime minister Gordon Brown offers his solutions to the challenges we face in 2021 and beyond. In the book, he states that there are seven major global problems we must address: global health; climate change and environmental damage; nuclear proliferation; global financial instability; the humanitarian crisis and global poverty; the barriers to education and opportunity; and global inequality and its biggest manifestation, global tax havens. Each one presents an immense challenge that requires an urgent global response and solution. All should be on the world's agenda today. None can be solved by any one nation acting on its own, but all can be addressed if we work together as a global community. However, Brown remains optimistic that, despite the many obstacles in our way, we will find a path to regeneration via the restoration of global order. Yes, there is a crisis of globalisation, but we are beginning to see the means by which

be resolved. Crises create opportunities and having two at once shouldn't just focus the mind, it might be seen as giving greater grounds for hope. In *Seven Ways to Change the World*, Brown provides an authentic and inspirational pathway to a better future that is essential reading for policy makers and concerned alike.

Corporate and Social Transformation of Money and Banking 2020 As the real economy is increasingly digitalized, banking lags behind. It is thus not well placed to support the new economy. The book provides a perspective on the changes taking place, identifying the systemic weaknesses in the traditional financial infrastructure, and proposing some radical rethinking to address systemic financial instability.

The Age of Aspiration Sep 19 2019 Nearly four decades ago, Dilip Hiro's *Inside India Today*, banned by Indira Gandhi's government, was acclaimed by *The Guardian* as simply "the best book on India." Now Hiro returns to his native country to chronicle the impact of the dramatic economic liberalization that began in 1991, which ushered India into the era of globalization. Hiro describes how India has been reengineered not only in its economy but also in its politics and cultural mores. Places such as Gurgaon and Noida on the outskirts of Delhi have been transformed from nondescript towns into forests of expensive high-rise residential and commercial properties. Businessmen in Bollywood movies, once portrayed as villains, are now often heroes. The marginal, right-wing Hindu militants of the past now rule the nominally secular nation, with Prime Minister Narendra Modi as their avatar, one whose electoral victory was funded by big business. Hiro provides a gripping account of the role played by Indians who have settled in the United States and Britain since 1991 in boosting India's GDP. But he also highlights the negatives: the exponential growth in slums, the public and private sectors, the impoverishment of farmers, and the rise in urban slums. A masterful panoramic view, *The Age of Aspiration* covers the whole social spectrum of Indians at home and abroad.

Transactional Environmental Support System Design: Global Solutions 2022 Designing a Transactional Environmental Support System grew from the desire to allow citizens to exchange knowledge about local land and animals for the purpose of learning how to increase their sustainability in regards to biodiversity and livelihood. *Transactional Environmental Support System Design: Global Solutions* details the results of this project ranging from studies done in small, local communities to those done in much larger national settings. Survey results of government practices, availability of decision support software, and community responses to data recording are all highlighted in this emerging research. Additionally, the book goes on to emphasize the increasing potential for environmental decision support while directly addressing some of the challenges that must be overcome.

Seeking Asylum Alone Nov 21 2019 Unaccompanied and separated children continue to be caught up in border control programs to deflect unauthorised Australian boat arrivals to offshore processing centres. If such children make it to Australia, the processes for identifying children travelling alone are inadequate, with too much reliance placed on the self-identification of such children. No child victim of trafficking has been identified in Australia since 1994. Australia's refugee status determination system was established with adult asylum seekers as the norm. Children face obvious disadvantage in both articulating their story and in being heard at the crucial first point of contact with authorities children are required to articulate their need for protection without either an advisor or an effective guardian. Case studies of children within the asylum process suggest that immigration officials and officials at appellate level have been poorly trained and have lacked the skills to deal with child asylum seekers with appropriate sensitivity. Another barrier faced by these children is legal: questions remain as to how well the international definition of refugee has been read to accommodate the particular experiences of children. It is hoped that this report will encourage Australian officials to take seriously about children as refugees in their own right - most particularly when the children are travelling alone. This Report was funded by the MacArthur Foundation (Chicago), the Australian Research Council and the Myer Foundation. Also available Seeking Asylum Alone - A Comparative Study- Unaccompanied and Separated Children and Refugee Protection in Australia, the UK and the US, by Jacqueline Bhabha and Mark Crock.

The Trojan Horse Jun 09 2021 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. The Trojan Horse traces the growth of commercial sponsorship in the public sphere since the 1960s, its growing importance for the arts since the 1980s and its spread into areas such as education and health. The authors' central argument is that the image of sponsorship as corporate benevolence has served to routinize and legitimate the presence of commercial sponsorship in the public sector. The central metaphor is of such sponsorship as a Trojan Horse helping to facilitate the hollowing out of the public sector by private agencies and private finance. The authors place the study in the context of the more general colonization of the state by private capital and the challenge posed to the dominance of neo-liberal economics by the recent global financial crisis. After considering the passage from patronage to sponsorship and outlining the context of the post-war public sector since 1945, it analyses sponsorship in relation to Thatcherism, enterprise culture and the restructuring of public provision during the 1980s. It goes on to examine the New Labour years, and the ways in which sponsorship has paved the way for the increased use of private-public partnerships and private finance initiatives within the public sector in the UK.

Engineering Earth Aug 31 2020 This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective. The book brings together an international team of nearly two hundred authors from over two dozen different countries more than a dozen different social, environmental, and engineering sciences. Together they document and illustrate with case studies, maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical, contemporary and postmodern perspectives. This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local, regional, and global scales and from disciplinary and trans-disciplinary perspectives.

Parallel Computational Technologies Feb 05 2021 This book constitutes the refereed proceedings of the 11th International Conference on Parallel Computational Technologies, PCT 2022, held in Dubna, Russia, during March 29-31, 2022. The 22 full papers included in this book were carefully reviewed and selected from 100 submissions. They were organized in topical sections as follows: high performance architectures, tools and technologies; parallel numerical algorithms; supercomputer simulation.

Multiscale Finite Element Methods Jul 21 2022 The aim of this monograph is to describe the main concepts and recent advances in multiscale finite element methods. This monograph is intended for the broader audience including engineers, applied scientists, and for those who are interested in multiscale simulations. The book is intended for graduate students in applied mathematics and those interested in multiscale computations. It combines a practical introduction, numerical results, and analysis of multiscale finite element methods. Due to the page limitation, the material has been condensed. Each chapter of the book starts with an introduction and description of the proposed methods and motivating examples. Some advanced techniques are introduced using formal arguments that are justified later in the last chapter. Numerical examples demonstrating the significance of the proposed methods are presented in each chapter following the description of the methods. In the last chapter, we analyze a few representative cases with the objective of demonstrating the main error sources and the convergence of the proposed methods. A brief outline of the book is as follows. The first chapter gives a general introduction to multiscale methods and an outline of each chapter. The second chapter discusses the main idea of the multiscale finite element method and its extensions. This chapter also gives an overview of multiscale finite element methods and other related methods. The third chapter discusses the extension of multiscale finite element methods to nonlinear problems. The fourth chapter focuses on multiscale methods that use local and global information.

Indian Multinationals in the World Economy Sep 24 2022 Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their potential for growth and global competitiveness. Consequently India has emerged as a major developing source country of FDI and Indian multinationals are likely to affect world economic development in several ways. The book analyses the phenomenon of Indian multinationals from both macro-level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970 onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies, received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and

of these new global actors on home and host countries. This book offers a number of lessons to home and host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would serve as an important and timely reading for all of them.

From Underdogs to Tigers (July 10 2021) In 1980 the Indian software industry was practically non-existent. By the 1990s the industry was one of the largest employers in manufacturing. Similar patterns of growth have been found in other emerging economies. So given that the software industry is commonly viewed as a high-tech industry, how is it that such spectacular growth has occurred in countries where high-tech industries do not seem likely to develop? This book examines the reasons behind this phenomenon, and asks whether it suggests a new model of economic development. The contributors explore the implications of the rise of new newcomers to the software market for the global industry, and whether there are things to be learnt about the role of human capital in economic growth, firm formation and capabilities, business and managerial models, and industry structure. Chapters include country studies on Brazil, China, India, Ireland, and Israel, and are complemented by cross-cutting chapters on some of the key issues highlighted by the growth patterns in software in these nations, most notably the role of the multinational companies, the globalization of technology, worker flows, and the formation of firm capabilities. The novelty of the growth patterns in the regions studied makes this book useful for understanding analytical and empirical issues underlying new microfoundations of economic growth in some emerging regions of the world.
