[Boll Weevil Blues](#) Jul 29 2022 Between the 1890s and the early 1920s, the boll weevil slowly ate its way across the Cotton South from Texas to the Atlantic Ocean. At the turn of the century, some Texas counties were reporting crop losses of over 70 percent, as were areas of Louisiana, Arkansas, and Mississippi. By the time the boll weevil reached the limits of the cotton belt, it had destroyed much of the region's chief cash crop—tens of billions of pounds of cotton, worth nearly a trillion dollars. As staggering as these numbers may seem, James C. Giesen demonstrates that it was the very idea of the boll weevil and the struggle over its meanings that most profoundly changed the South—as different groups, from policymakers to blues singers, projected onto this natural disaster the consequences they feared and the outcomes they sought. Giesen asks how the myth of the boll weevil's lasting impact helped obscure the real problems of the region—those caused not by insects, but by landowning patterns, antiquated credit systems, white supremacist ideology, and declining soil fertility. *Boll Weevil Blues* brings together these cultural, environmental, and agricultural narratives in a novel and important way that allows us to reconsider the making of the modern American South.

[Cotton Or Boll Weevils](#) Sep 18 2021 This publication tells the important facts about the weevil—what it looks like, how it lives, how it grows, the damage it does, and the different ways of controlling it commonly used. Written in simple language, it is intended especially for boys and girls, although it should be useful also to grown-ups who want to learn about the weevil and extension workers also should find this publication of value in teaching the necessary facts about boll weevil control.

[Victim No More](#) Nov 08 2020 I entered the foster system at age two and was sexually, physically, emotionally abused until age eight but living through it—only by God's amazing grace! Joel 2:25 says, "I will repay you

for the years the locust have eaten." In September of 2007, I was sitting at an intersection, waiting for the light to turn green when God reminded me of this very special verse from the Bible and said if I receive those words for myself from Him, He will do this for me: "I will repay you for the years the locust have eaten." He also said that His repaying isn't just one year per one year, His repaying is fifteen years per one year! So I did some quick math, and He is giving me 195 repayment years! People often comment to me, "Why does your life seem so easy? Why don't you get stressed and worry?" I simply answer because I remember the "gift" He gave me and receive His promise again and again—and then I walk in the promise of that gift! When God gives us a promise, it's up to us to receive it or just hear it. Just like any time someone gives you a physical gift, they extend it toward you, but you must reach out, receive it, and open it—or it has little value for you. God has many "gifts" that He wants to give you personally. Receive them with a thankful heart and walk in them victoriously, knowing you are so loved!

[How to Prosper in Boll Weevil Territory](#) Jul 17 2021 This book was prepared to furnish information on farming in the boll weevil territory. Special attention has been given to the production of cotton in infested districts and to showing how to adopt a system of farming which has

been found profitable by many farmers in boll weevil territories. It was written by a man who has had practical experience all his life in growing cotton in Mississippi, Louisiana and Texas. He later devoted a number of years to the special study of the boll weevil in the cotton fields of these states as special agent for the Farmers' Co-operative Demonstration Work. In addition to this, he is acquainted with the financial and economic conditions throughout the cotton belt.
