*South Africa Can Work* Sep 06 2020 What will it take to turn South Africa around? In this insightful and provocative book, Frans Rautenbach

proposes a complete overhaul of policy thinking, and provides fresh arguments that effectively address South Africa's unemployment, race problems and lack of education. Rautenbach examines the fundamental problem of rent-seeking, to which he proposes two antidotes: the free market and decentralisation of government. Along the way he tackles holy cows such as affirmative action, trade unions, labour law and welfare payments. He also addresses contentious topics such as racism, white privilege, political correctness, state funding of higher education and mounting evidence that trade unions substantially suppress employment growth. Written by a labour lawyer with a proven track record in a range of policy issues, *South Africa Can Work* speaks effectively to a cross-section of readers of all disciplines, and brings sorely needed good news.

*Multilingualism and Intercultural Communication* Dec 10 2020 An in-depth look at the changing sociolinguistic dynamics that have influenced South African society. To date, there has been no published textbook which takes into account changing sociolinguistic dynamics that have influenced South African society. *Multilingualism and Intercultural Communication* breaks new ground in this arena. The scope of this book ranges from macro-sociolinguistic questions pertaining to language policies and their implementation (or non-implementation) to micro-sociolinguistic observations of actual language-use in verbal interaction, mainly in multilingual contexts of Higher Education (HE). There is a gradual move for the study of language and culture to be taught in the context of (professional) disciplines in which they would be

used, for example, Journalism and African languages, Education and African languages, etc. The book caters for this growing market. Because of its multilingual nature, it caters to English and Afrikaans language speakers, as well as the Sotho and Nguni language groups – the largest languages in South Africa [and also increasingly used in the context of South African Higher Education]. It brings together various inter-linked disciplines such as Sociolinguistics and Applied Language Studies, Media Studies and Journalism, History and Education, Social and Natural Sciences, Law, Human Language Technology, Music, Intercultural Communication and Literary Studies. The unique cross-cutting disciplinary features of the book will make it a must-have for twenty-first century South African students and scholars and those interested in applied language issues.

*Never Waste a Good Crisis* Jul 05 2020 In *Never Waste a Good Crisis*, twenty-one of our top business leaders share their leadership philosophies and personal success stories. They talk candidly about doing business in the wake of Covid-19 and the many challenges, both personal and professional, that leaders in corporate South Africa face. Is leadership an art? Can you learn it? Can anyone be a leader? How do leaders deal with obstacles? These leaders' lessons and stories will inspire, encourage and challenge all who want to hone their leadership skills or have their sights set on the top of the corporate ladder.

**South Africa, Settler Colonialism and the Failures of Liberal Democracy** Nov 28 2019 In *South Africa, Settler Colonialism and the Failures of Liberal Democracy*, two unmistakable features describe post-Apartheid politics. The first is the formal framework of liberal democracy, including regular elections, multiple political parties and a range of progressive social rights. The second is the politics of the 'extraordinary', which includes a political discourse that relies on threats and the use of violence, the crude re-racialization of numerous conflicts, and protests over various popular grievances. In this highly original work, Thiven Reddy shows how conventional approaches to understanding democratization have failed to capture the complexities of South Africa's post-Apartheid transition. Rather, as a product of imperial expansion, the South African state, capitalism and citizen identities have been uniquely shaped by a particular mode of domination, namely settler colonialism. *South Africa, Settler Colonialism and the Failures of Liberal Democracy* is an important work that sheds light on the nature of modernity, democracy and the complex politics of contemporary South Africa.

**Fraud and Education** Nov 20 2021 *Fraud and Education* gives an informative overview of cheating in examinations in the U.S. and foreign countries and of the current state of fraud in education and research. It differs however, from many popular treatises on the same subject, in that it is not intended as a blanket condemnation of American (or foreign) education. Instead of assigning blame for the prevalence of fraud, the authors point to such factors as growth in the number of persons engaged in education and research, pressures on individuals to succeed, improvements in communications (especially the Internet and e-mail), and in techniques of document reproduction.

**World Yearbook of Education 2003** Apr 13 2021 The issues raised by the role of language in education are some of the most important and contentious faced by education systems across the globe. Language is embedded in the concepts of nationhood and identity, and is therefore

directly linked to the very social and political fabric of a country. In a climate of increasing globalisation, development and mobility of populations, nations around the world are concerned with the tension between cultivating a sense of cultural and linguistic cohesion and making use of the linguistic diversity that exists in every country and region. This book examines the implications and impacts, the dilemmas and potential for language education in relation to education systems and wider society. Split into three key parts, it considers: \*current issues in language education, including the role of language in maintaining power and inequalities, in encouraging participation and inclusion and in challenging the status quo; \*different approaches to language education around the world; \*the potential for language to provide opportunities for the disadvantaged, illustrated by case studies of three cities. This recent volume of the internationally respected World Yearbook of Education continues the tradition of offering a wide range of international perspectives from leading commentators on a universal concern. The material amassed here will be essential reading for teacher educators, education researchers and school leaders across the world.

*South African Schooling: The Enigma of Inequality* Jan 29 2020 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling: from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with: Are there different and preferential equilibria we have not yet thought of or explored, and if so what are they? In practical terms, how does one get to a more equitable distribution of teachers, resources and learning outcomes? While decidedly local, these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the largest 90-10 gap in the world, and one that is reflected in the schooling system. Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard-work and determination, but instead by the colour of their skin, the province of their birth, and the wealth of their parents. Looking back on almost three decades of democracy in South Africa, it is this stubbornness of inequality and its patterns of persistence that demands explanation, justification and analysis. "This is a landmark book on basic education in South Africa, an essential volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class, and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not, and why." Prof Lant Pritchett, Harvard University "There is much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well-trained teachers, early childhood education, and adequate school resources, South Africa will continue to sacrifice its people's future to maintaining the privileges of the few." Prof Martin Carnoy,

Stanford University "Altogether, one can derive from this very valuable volume, if not an exact blueprint for the future, then certainly at least a crucial and evidence-based itinerary for the next few steps." Dr Luis Crouch, RTI

*AIMING FOR THE STARS* Dec 30 2019 *AIMING FOR THE STARS* is a memoir of Dr Sphumelele Ndlovu and his life of hardship, which led him to becoming a Scientist. His mother sold chickens to provide for her children, never considering himself worse off than others. The family was poor. Sphumelele's life was also derailed when strikes caused 24 out of the 28 teachers at his school to abandon their posts in his matric year. Education was Ndlovu's ticket to a better future, and he knew at a young age, that he wasn't going to give it up without a fight. Ndlovu's PhD placed him to be part of a team of scientists set out to measure the distance between the Earth and Moon using lasers. It is the sixth-ever such venture, but the first to be carried out by an African team. A man whose horizon was once confined to the perimeter of a chicken coop now handled tools that allowed his eyes to glide over galaxies.

**The Educational year book. [5 issues].** Jul 25 2019

**Marking Matric** Apr 25 2022 The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial),

**Negotiating Language Education Policies** Jun 15 2021 Educators are at the epicenter of language policy in education. This book explores how they interpret, negotiate, resist, and (re)create language policies in classrooms. Bridging the divide between policy and practice by analyzing their interconnectedness, it examines the negotiation of language education policies in schools around the world, focusing on educators' central role in this complex and dynamic process. Each chapter shares findings from research conducted in specific school districts, schools, or classrooms around the world and then details how educators negotiate policy in these local contexts. Discussion questions are included in each chapter. A highlighted section provides practical suggestions and guiding principles for teachers who are negotiating language policies in their own schools.

*Critical Issues in South African Education After 1994* Jun 23 2019 This title seeks to provide a reflection on the transformation of South Africa's education system. It traces the rationale behind various acts and policies, takes a critical look at the realities of implementation and offers projections regarding possible future directions.

**Leadership Approaches to Negotiate Challenges in a Changing Education Landscape** Oct 08 2020 The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level – in both the academic and the public discourse. Such allegations are made and, frequently, stronger adjectives than ‘non-satisfactory’ are used. Results of international test series in which South Africa has participated, such as the 2015 TIMSS tests, confirm the negative verdicts found in the (public and scholarly) discourse. This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors, one factor that can make a difference in the achievement levels obtained by learners in schools is leadership. The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation, blaming all ills in the education system and educational institutions on historical legacies and/or contextual factors (such as socio-economic deprivation in the catchment areas of schools) or poor resources and infrastructure. This collected work was inspired by a recently published spate of articles on top-performing schools (including top-performing schools in rural communities), in which it was demonstrated that good leadership can overcome such contextual and other challenges. The book unpacks the issue of leadership in South African schools from a variety of perspectives, thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa. The target audience of the book is scholars of Educational Leadership. The research reported in the chapters draw on a wide range of methodologies, including empirical (survey) research (questionnaires and interviews), critical literature surveys, and the comparative method.
