Routledge Handbook of Southeast Asian Democratization Apr 29 2020 Southeast Asia, an economically dynamic and strategically vital region, seemed until recently to be transiting to more democratic politics. This progress has suddenly stalled or even gone into reverse, requiring that analysts seriously rethink their expectations and theorizing. The Routledge Handbook of Southeast Asian Democratization provides the first book-length account of the reasons for democracy’s declining fortunes in the region today. Combining theory and case studies, it is structured in four major sections: Stunted Trajectories and Unhelpful Milieus Wavering Social Forces Uncertain Institutions Country cases and democratic guises This interdisciplinary reference work addresses topics

including the impact of belief systems, historical records, regional and global contexts, civil society, ethnicity, women, Islam, and social media. The performance of political institutions is also assessed, and the volume offers a series of in-depth case studies, evaluating the country records of particular democratic, hybrid, and authoritarian regimes from a democratization perspective. Bringing together nearly 30 key international experts in the field, this cutting-edge Handbook offers a comprehensive and fresh investigation into democracy in the region. This timely survey will be essential reading for scholars and students of Democratization and Asian Politics, as well as policymakers concerned with democracy's setbacks in Southeast Asia and the implications for the region's citizens.

"GUYANA-MY ELDORADO" Oct 24 2019 I am seventy-six years of age, have had two heart attacks, and am not really very well. My memory, though, is fine, except sometimes for "names," but I recall the events as vividly as if they are occurring now. My "Far" passed away on June 10, 2013. Today is Valentine's Day and I visited my Far twice. Our home on 2665 La Veta Avenue is a mere two minutes away. I have just returned from San Bernardino Community Hospital where I visited a patient, in my capacity as a Muslim chaplain. I am not sure who, if anyone, will ever read this book. It is a chronicle of our wonderful life, but there are many "Cinderella" stories. This is not a masterpiece of the English language, nor is it in any way unique. Writing gave me a great deal of pleasure. I knew I had angels beside me, and at all times, one seraph. We have had much joy, pleasure, excitement, much to wonder about, and much to puzzle over. We have laughed and cried, nearly just as much, sometimes out of pleasure and sometimes out of pain and grief; always, we have "walked with God." We have made many mistakes--we are only human--and have alienated far too many, but never deliberately nor out of meanness. Those who love us will perhaps forgive, and those who do not may hopefully forget our transgressions, real or imagined, always remembering what Jesus

said about "casting stones." We tried to make a difference and, with the help of God, we did. In as much as this humble effort reflects the insuperable challenges of finding peace and harmony in a small family, I believe it resonates with the pain and suffering inflicted by man on his fellow man, in places like Syria, Central Africa, and the Ukraine, and with more natural disasters such as hurricanes, typhoons, and tornadoes, which create no less pain and suffering. As I approach the end of my life, I continue in the Ministry of Healing, in the hope that the solace and comfort I attempt to deliver will not be entirely unselfish. Dr. Frank A. Haniff, MD San Bernardino, CA 92404 February 14, 2014

The World of Science Education Aug 02 2020 Each volume in the 7-volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub-Saharan Africa and the scholarship that most closely support this program. The reviews of the research situate what has been accomplished within a given field in Sub-Saharan Africa rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories – focusing the changing façade of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished, what is missing and what might be done next.

Women Teachers in Africa Feb 26 2020 Through qualitative research methods, this book engages in a holistic understanding of cultural, economic, and institutional forces that interact to produce the underrepresentation of women as school teachers in four sub-Saharan African countries. Comparative case studies at the national

level, using a common research design, show that teaching, despite being an attractive civil service job, offers low salaries and many challenges, especially when it takes place in rural areas. Combining professional duties with demanding family responsibilities further diminishes women's ability to stay in the teaching profession. The studies in this book attempt to bridge research findings with policy by developing action plans in cooperation with ministries of education of the respective countries. *Women Teachers in Africa* will be of interest to academic researchers, undergraduate and postgraduate students in the relevant fields, as well as development professionals, aid agency staff and education policy experts.

Teaching and Learning Foreign Languages Nov 24 2019 *Teaching and Learning Foreign Languages* provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, *Teaching and Learning Foreign Languages* will appeal to academics and

postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.

Cambridge IGCSE® and O Level Economics Workbook Mar 21

2022 Covers the Cambridge IGCSE syllabus (0455) and the Cambridge O Level syllabus (2281), first examination from 2020.

This series helps students understand economic theory, terminology and principles. By applying tools of economic analysis, undertaking calculations and writing longer responses, students learn how to look at the world like an economist. The workbook matches the Cambridge IGCSE and O Level Economics syllabuses and provides students with additional concepts to strengthen their understanding, as well as the quality of their answers. The answers to the workbook questions are in the teacher's resource.

Critical Perspectives on Language Education Aug 14 2021

The studies in this volume investigate how multilingual education involves a critical engagement with questions of identity and culture, and a movement towards new ways of being and belonging. It addresses previously under-explored issues, in particular the integration of theories like 'thirdness', and practices of language education and maintenance with relevance to the Asia-Pacific region. The analyses reveal the delicate balance of interests of all stakeholders and offer detailed insights into the reality of multilingual education, with specific examples of Chinese, English, Japanese and Tamil. In a globalised world, effective language education has become increasingly important, and the studies presented here have the potential to inform and advance evidence-based multilingual education through adding important dimensions of theoretical exploration and refreshing empirical resources.

Diverse Early Childhood Education Policies and Practices Sep 03 2020 Diverse Early Childhood Education Policies and Practices explores issues in early childhood education and teacher preparation

in five Asian countries: India, Singapore, China, Sri Lanka, and the Maldives. Some observed classrooms in these countries reflect influences that are simultaneously indigenous and colonial, local and global. By highlighting the diverse and often hybrid classroom pedagogies at work in these 21st century Asian classrooms, the discussions in this book take into consideration the influence of globalization on local policies and practices, and the challenge educators face when they are expected to reconcile different and sometimes conflicting cultural and pedagogical world views. Through a research-driven analysis of key issues such as recent revisions to national early childhood education policies, perceptions on "play-based and child-centered" pedagogy, curriculum and learning materials, and an emphasis on the teaching of values, this book illuminates the diversity of the observed classrooms as well as current trends in early childhood education in parts of Asia. The cross-national perspective serves to expand and diversify the global discourse of early childhood education and teacher education.

Emerging Technologies for Shelf-Life Enhancement of Fruits

May 31 2020 Focusing on new technological interventions involved in the postharvest management of fruits, this volume looks at the research on maintaining the quality of fruits from farm to table. The volume examines the factors that contribute to shortening shelf life as well as innovative solutions to maintaining quality while increasing the length of time fruit remains fresh, nutritious, and edible. The volume considers the different needs of the diversity of fruits and covers a variety of important topics, including: • factors affecting the postharvest quality of fruits • microbial spoilage • decontamination of fruits by non-thermal technologies • new kinds of packaging and edible coatings • ozone as shelf-life extender of fruits. **Emerging Technologies for Shelf-Life Enhancement of Fruits** considers the fundamental issues and will be an important reference on shelf-life extension of fruits. Highlighting the trends in future research and development, it will provide food technologists, food engineers, and food industry professionals with new insight for prolonging the shelf life of fruits.

Science Education Research and Practice in Asia Jul 13 2021

This book discusses the scope of science education research and practice in Asia. It is divided into five sections: the first consists of nine chapters providing overviews of science education in Asia (China, Lebanon, Macau, Malaysia, Mongolia, Oman, Singapore, Taiwan, and Thailand). The second section offers chapters on content analysis of research articles, while the third includes three chapters on assessment and curriculum. The fourth section includes four chapters on innovative technology in science education; and the fifth section consists of four chapters on professional development, and informal learning. Each section also has additional chapters

providing specific comments on the content. This collection of works provides readers with a starting point to better understand the current state of science education in Asia.

Early Childhood Education and Change in Diverse Cultural

Contexts Aug 22 2019 Change is now a dominant feature of early

childhood systems around the globe and many countries are

currently facing significant economic, social and political

developments that bring additional challenges that teaching and

learning practices need to be able to respond to in a positive and effective way. *Early Childhood Education and Change in Diverse Cultural Contexts* examines how the educational systems in different countries respond to this change agenda, what they prioritise and how they deal with the adjustment process. Based on original and cutting-edge research and drawing upon diverse theoretical approaches, the book analyses new policies and pedagogical practices in a wide range of different cultural contexts. With contributions from Great Britain, the USA, Finland, Sweden, Iceland, Estonia, New Zealand, South Africa and Singapore, this volume examines how educators might be able to innovate and respond positively to the shifting social and cultural situations in these contexts and others like them. Focusing on early childhood policy, professionalism and pedagogy, the book stimulates debate and dialogue about how the field is moving forward in the 21st century. *Early Childhood Education and Change in Diverse Cultural Contexts* should be essential reading for academics, researchers and postgraduate students engaged in the study of early childhood education, childhood studies and comparative education. Providing practical examples of how educational systems and educators might respond to change imperatives, the book should also be of great interest to teacher educators, current and pre-service teachers and policymakers around the world.

Climate Change Education Jan 19 2022 Climate change is a controversial topic; some people assert that climate change is not

occurring, and others believe that reports are inaccurate, that whilst climate change is happening, it may not be caused by human activity. There are also climate alarmists who use IPCC reports to support their claims that erratic weather patterns are a result of climate change caused by human activity. Regardless of these different viewpoints, one fact can be agreed upon; climate change is a complex subject and there is a need to educate future generations, enabling them to deal with the plethora of information and views that they will experience in their lives. This book explores what education for climate change entails, discussing the concept of Climate Change Education (CCE) itself, how it can be taught in schools and how public education can be carried out. It instructs what specific subject matter to teach for CCE, and how to evaluate the student learning on the subject. Chapters include: CCE in the Formal Curriculum Teacher readiness for CCE Assessment for and of CCE Lessons from CCE for Public Education Climate Change Education is an extremely useful resource for anyone involved in educating students on climate change and also for those interested in climate change itself.

Big Ideas In Mathematics: Yearbook 2019, Association Of Mathematics Educators Jul 01 2020 The new emphasis in the Singapore mathematics education is on Big Ideas (Charles, 2005). This book contains more than 15 chapters from various experts on mathematics education that describe various aspects of Big Ideas from theory to practice. It contains chapters that discuss the historical development of mathematical concepts, specific mathematical concepts in relation to Big Ideas in mathematics, the spirit of Big Ideas in mathematics and its enactment in the mathematics classroom. This book presents a wide spectrum of issues related to Big Ideas in mathematics education. On the one end, we have topics that are mathematics content related, those that discuss the underlying principles of Big Ideas, and others that deepen the readers' knowledge in this area, and on the other hand

there are practice oriented papers in preparing practitioners to have a clearer picture of classroom enactment related to an emphasis on Big Ideas.

Science Education in East Asia Nov 17 2021 This book presents innovations in teaching and learning science, novel approaches to science curriculum, cultural and contextual factors in promoting science education and improving the standard and achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development and research in science education in the context of international benchmarking tests to measure the knowledge of mathematics and science such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science, mathematics and reading like Programme for International Student Assessment (PISA). Among the high achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea,

Japan, Hong Kong and China (Shanghai) are notable. This book investigates the reasons why students from East Asian countries consistently claim the top places in each and every cycle of those study. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection and vision on emerging trends, pedagogical innovations and research-informed practices in science education in the region. It provides insights into effective educational strategies and development of science education to international readers.

The Space and Practice of Reading Sep 22 2019 Mirroring worldwide debates on social class, literacy rates, and social change, this study explores the intersection between reading and social class in Singapore, one of the top scorers on the Programme for International Assessment (PISA) tests, and questions the rhetoric of social change that does not take into account local spaces and practices. This comparative study of reading practices in an elite school and a government school in Singapore draws on practice and spatial perspectives to provide critical insight into how taken-for-granted practices and spaces of reading can be in fact unacknowledged spaces of inequity. Acknowledging the role of social class in shaping reading education is a start to reconfiguring current practices and spaces for more effective and equitable reading practices. This book shows how using localized, contextualized approaches sensitive to the home, school, national and global contexts can lead to more targeted policy and practice transformation in the area of reading instruction and intervention. Chapters in the book include: • Becoming a Reader: Home-School Connections • Singaporean Boys Constructing Global Literate Selves: School-Nation Connections • Levelling the Reading Gap: Socio-Spatial Perspectives The book will be relevant to literacy scholars and educators, library science researchers and sociologists

interested in the intersection of class and literacy practices in the 21st century.

Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century Mar 29 2020 What have postcolonial Sub-Saharan African countries achieved in their education policies and programmes? How far have they contributed to successful attainment of the targeted 2015 Millennium Development Goals (MDGs) on education? What were the constraints and barriers for developing an education system that appeals to the needs of the sub-region? Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century: Post-Millennium Development Goals is an attempt to demonstrate that Sub-Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people. To that end, the contributors are academics with an African vision attempting to come up with African home-grown perspectives to fill the gap created by the lapse of the MDGs as the guiding vision and framework for educational provision in Africa and beyond. The book seeks to articulate and address African issues from an informed as well as objective African perspective. The book is also intended to provide insights to scholars who are interested in studying and understanding the nature of postcolonial education in the Sub-Saharan African region. Given the objectives and themes of this book, it is intended for academic scholars, undergraduate and graduate students, human rights scholars, curriculum developers, college and university academics, teachers, education policy makers, international organisations, and local and international non-governmental organisations that are interested in African education policies and programmes. “Rethinking Postcolonial Education in Sub-Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and re-positions the issue of education at the forefront of the debates on African development.” – Lamine Diallo, Associate Professor, Wilfrid Laurier University,

Canada “The book is a welcome addition to discourses and analyses on education in sub-Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa.” – Michael Tonderai Kariwo, PhD, Instructor and Research Fellow, University of Alberta, Canada

Power in Contemporary Zimbabwe Jan 27 2020 In recent years, the Zimbabwe crisis rendered the country and its citizens to be a typical case of ‘failed states’, the world over. Zimbabwean society was and is still confronted with different challenges which include political, economic and social problems. Attempts to overcome these challenges have thrown light on the power that rests within individuals and or groups to change and even revolutionize their localities, communities, states and ultimately the world at large. Through experience, individuals and groups have promoted ideas that have aided in changing mentalities, attitudes and behaviors in societies at different levels. This book brings together contributors from various academic disciplines to reflect on and theorize the contours of power, including the intrinsic and or extrinsic models of power, which pertain to individuals, communities, and or groups in order to transform society. Reflections are on various groups such as

political movements, environmental movements, religious groups, advocacy groups, gender groups, to mention but a few, as they struggle against marginalization, discrimination, exploitation, and other forms of oppression showing their agency or compliance.

Majulah!: 50 Years Of Malay/muslim Community In Singapore Oct 16 2021 The Malay/Muslim community, comprising approximately 13% of Singapore's population, is an integral part of modern Singapore's formative years. The community has come a long way and accomplished plenty. Prime Minister Lee Hsien Loong lauded the community's growth and its efforts in nation-building in the 2015 National Day Rally, 'The Malay/Muslim community is an integral part of Singapore ... and they have contributed significantly to our nation's harmony and progress.' 50 Years of Malay/Muslim Community in Singapore highlights the progress, the contributions and the challenges of the community for the past 50 years since Singapore's independence in 1965. While progress is significant, challenges remain an uphill battle towards a comprehensive community development. As the book narrates stories from the past — the successes and the challenges — it is also important for the community to reflect and to look ahead — Majulah!

The O Level Book Oct 28 2022 With the recent scrapping of GCSEs fresh in everyone's minds, The O Level Book is the perfect book to settle that age-old argument between the generations: were the exams of yesteryear really harder than anything children have to face today in the age of calculators and spell checkers? Are contemporary kids less intelligent than previous generations? Here is the chance to find out as the whole family pit their wits against one another in the ultimate generation game, contrasting the schooling of yesteryear with modern educational practices. Testing you on a range of old-school topics: English Language; General Science; Geography and History; Household Cookery; Mathematics. A wonderfully nostalgic yet testing anthology, The O Level Book encourages you to dust off your slide rules and get your thinking caps on to see who will come out on top in your family!
