[Visions and Concepts for Education 4.0](#) Nov 05 2020 This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

**Handbook of Social Media Management** Sep 15 2021 Digitization and Web 2.0 have brought about continuous change from traditional media management to new strategic, operative and normative management options. Social media management is on the agenda of every media company, and requires a new set of specialized expertise on digital products and communication. At the same time, social media has become a vibrant field of research for media economists and media management researchers. In this handbook, international experts present a comprehensive account of the latest developments in social media research and management, consistently linking classical media management with social media. The articles discuss new theoretical approaches as well as empirical findings and applications, yielding an interesting overview of interdisciplinary and international approaches. The book's main sections address forms and content of social media; impact and users; management with social media; and a new value chain with social media. The book will serve as a valuable reference work for researchers, students and professionals working in media and public relations.

**GIS, Organisations and People** Mar 09 2021 GIS projects have previously been viewed primarily as technical exercises, but it is now evident that the success of GIS projects depends as much on organisational issues as upon technicalities. GIS projects have profound socio-organisational contexts which must be taken into account if such projects are to succeed. The book presents an overview of the 'human' side of GIS, both individual and organisational. GIS Organisations and People draws on material from the fields of mainstream business administration and information systems and builds a picture of how important they can be to GIS development and describes the implementation strategies which will allow their introduction. This unique textbook will meet the needs of an introductory module on the human aspects of GIS at advanced undergraduate and Master's level. It will equally be suitable for GIS professionals whose technical knowledge may be considerably greater than their appreciation of organisational strategic concerns. Key Features: \* This introductory guide fully explains the importance of organisational issues in promoting successful GIS projects \* A full glossary of specialist terms and a 'self-check' questions round-up at the end of each chapter help develop the reader's comprehension

**Managing Mobile Services** Apr 22 2022 New, attractive services for communications systems are versatile and promise to make the next generation of communications a success. Yet, as the systems grow more complex and diverse, so do the challenges of managing them. Service management derives from technologies used in fixed telephony systems and has evolved towards supporting packet-based services in an increasingly open environment. It is common belief that 3G (and later 4G) services will change the way we communicate and interrelate. The user will be put at centre stage and systems will be able to handle intelligent user profiles, proactive service selection, context-aware service provisioning and ubiquitous computing. Managing, charging for, and controlling these services render traditional business models inadequate and demand new solutions. Managing Mobile Services Covers challenges, solutions and technologies for implementing IP-based services in a mobile environment, with special attention to security, flexibility and charging. Discusses business models, service management architectures and standardization efforts. Considers requirements and characteristics of services, and service modelling. Includes two case studies illustrating the challenges, technologies and solutions involved with real-world service management. This book gives telecommunications/data engineers, operators and service providers as well as students and academics an in-depth understanding of the issues involved in implementing and managing new value-added services.

**Enterprise Knowledge Portals** Apr 10 2021 Far beyond simple data archives and streamlined access, enterprise knowledge portals represent the future of corporate information management. Seamlessly interweaving three essential principles -- people, content, and technology -- an effective portal is the ultimate roadmap to every conceivable permutation of the components in a business's landscape. This prescient, authoritative book is a vital reference for anyone concerned with harvesting, creating, distributing, or analyzing company information. HR executives and IT professionals will learn not only how to create the atlas to their company's universe but also how to define and assign the roles and responsibilities that will ensure long-term efficacy and relevance. Companies will have the ability to: \* Build technology around knowledge requirements, not the other way around \* Customize desktop access around individual requirements and workstyles \* Make better decisions as a result of quick access to crucial information \* Maximize speed, efficiency, accuracy, and flexibility of knowledge transfer.

**Bargain with the Devil** May 23 2022 Security consultant Peter Avakian's job is to keep people safe, and that's not always easy. Even his Special Forces training couldn't have prepared him for a routine business proposal that was anything but. By simply acknowledging the offer, Avakian becomes snarled in a complex plot to stage a political coup in central Africa. With no way out, he turns to the CIA—and is forced to become their mole inside the conspiracy. Pulled into a shadow world of nations battling over the world's oil supply, drug dealers financing revolutions, and gunrunners on sale to the highest bidder, it's all Avakian can do to stay alive. And that may depend less on his lethal skills than on two women: a CIA agent and a South African reporter after a story. Will they save him, or will they betray him? It's anyone's guess, especially his.

**Management Culture and Corporate Social Responsibility** Oct 24 2019 This monograph focuses on the level of management culture development in organizations attempting to disclose it not only with the help of theoretical insights but also by the approach based on employees and managers. Why was the term "management culture" that is rarely found in literature selected for the analysis? We are quite often faced with problems of terminology. Especially, it often happens in the translation from one language to another. While preparing this monograph, the authors had a number of questions on how to decouple the management culture from organization's culture and from organizational culture, how to separate management culture from managerial culture, etc. However, having analysed a variety of scientific research, it appeared that there is no need to break down the mentioned cultures because they still overlap. Therefore, it is impossible to completely separate the management culture from the formal or informal part of organizational culture. Management culture inevitably exists in every organization, only its level of development may vary.

**Corporate E-Learning** May 31 2020 Corporate e-learning has become increasingly important in the contemporary universal-access business world, and can provide strategic and competitive advantages to corporations as a way to accelerate training and reduce the high costs of face-to-face learning programs. However, most of the books that are written about e-learning do not describe in detail how corporate e-learning is actually implemented within a specific company. Corporate E-Learning fills that gap by describing in depth how e-learning programs are developed and instituted, and how their effectiveness is measured, from the perspective of practicing e-learning professionals at IBM, an early and liberal user of e-learning technologies to train their global workforce. Drawing on a wealth of in-person interviews of numerous e-learning professionals at IBM, as well as recent e-learning literature, Tai discusses how IBM has significantly contributed to the evolution of corporate e-learning. In the course of doing so, he makes useful comparisons with other companies and industries, and draws conclusions that are applicable to any company considering utilizing e-learning. Companies should be careful, concludes Tai, to use e-learning only when it makes strategic and economic sense, not simply because the technology is available. In addition, e-learning should always be used along with other more traditional means of learning, and carefully monitored by feedback mechanisms to measure whether its objectives have been accomplished, and how e-learning programs might improve in the future. Corporate E-Learning is designed for classroom use in technology management courses, and will also appeal to corporate professionals who are involved in training, human resources development, and performance improvement.

**CRM Project Management** Sep 22 2019 Once you have bought into the concepts of customer relationship management (and it is hard not to), how do you separate the practically useful from the pie-in-the-sky and then actually implement a project? This handbook addresses implementation, advocating an approach that is based in the real world and stressing the measurable goals and tactical uses of CRM. The areas covered include: building a realistic foundation for CRM; critical success factors; risk factors; full risk analysis; and case studies.

**Time for Solutions!** Jul 13 2021 Time for Solutions! Overcoming Gender-related Career Barriers shares the who, what and how to reduce gender inequalities in the workplace. Clearly the time is now since inequities are hampering the economy and simply wrong. Who needs to change? And, how? These can be more difficult questions to answer. This book identifies a wide range of issues that need attention and provides direction pertaining to who needs to do what. Gender diversity studies have concentrated on the plight of women which unfortunately still needs consideration. We go beyond the problems of women to see what some in the LGBTQ community are facing and what needs to happen to reduce their barriers. Interestingly, there are a few universal solutions that are not complicated to implement. All it takes is paying attention to individual needs and implementing sociological solutions that create long-term inclusion. Of course, the devil is in the details. Authors of this book provide those details.

**Content Delivery Networks** Sep 03 2020 The definitive guide to developing robust content delivery networks. This book examines the real-world engineering challenges of developing robust content delivery networks (CDNs) and provides the tools required to overcome those challenges and to ensure high-quality content delivery that fully satisfies operators' and consumers' commercial objectives. It is informed by the author's two decades of experience building and delivering large, mission-critical live video, webcasts, and radio streaming, online and over private IP networks. Following an overview of the field, the book cuts to the chase with in-depth discussions—laced with good-natured humor—of a wide range of design considerations for different network topologies. It begins with a description of the author's own requirement filtration processes. From there it moves on to initial sketches, through considerations of stakeholder roles and responsibilities, to the complex challenges of managing change in established teams. Agile versus waterfall considerations within large blue chip companies, security, commercial models, and value chain alignment are explored in detail. Featured throughout the book are numerous "what if" scenarios that help provide a clear picture of the wide spectrum of practical contexts for which readers may be tasked with building and implementing a CDN. In addition, the book: Discusses delivery of live, catch-up, scheduled on-demand, TVOD and SVOD. Offers insights into the decisions that can be made when architecting a content distribution system over IP-based networks. Covers CDN topologies, including Edge-Caching, Streaming-Splitting, Pure-Play, Operator, Satellite, and Hybrid. Examines computer hosting and orchestration for dedicated appliances and virtualization. Includes real-world cases covering everything from IETF, regulatory considerations, and policy formation, to coding, hardware vendors, and network operators. Considers the future of CDN technologies and the market forces driving its evolution. Written by a back-room engineer for back-room engineers, Content Delivery Networks gets readers up to speed on the real-world challenges they can face as well as tried-and-true strategies for addressing those challenges in order to ensure the delivery of the high-quality content delivery networks that clients demand and users expect.

**The Synergy Solution** Aug 14 2021 The new M&A bible. Few actions can change the value of a company—and its competitive future—as quickly and dramatically as an acquisition. Yet most companies fail to create shareholder value from these deals, and in many cases they destroy it. It doesn't have to be this way. In *The Synergy Solution*, Deloitte's Mark Sirower and Jeff Weirens show acquirers how to develop and execute an M&A strategy—end to end—that not only avoids the pitfalls that so many companies fall into but also creates real, long-term shareholder value. This strategy includes how to: Become a prepared "always on" acquirer. Test the investment thesis and DCF valuation of a deal. Plan for a successful Announcement Day, and properly communicate synergy promises to investors and other stakeholders. Realize those promised synergies through integration planning and post-close execution. Manage change and build a new, combined organization. Sirower and Weirens provide invaluable background to those considering M&A, laying out the issues they have to consider, how to analyze them, and how to plan and execute the deal effectively. They also show those who have already started the process of M&A how to maximize their chances of success. There's an art and a science to getting mergers and acquisitions right, and this powerful book provides the insights and strategies acquirers need to find success at every stage of an often complex and perilous process.

**Sustainability, Technology, and Finance** Jul 25 2022 This book explores the swiftly emerging nexus between sustainability, finance, and technology. Leading practitioners and academic thought leaders reflect on the ways in which technology and digitalization shape how sustainable finance professionals address environmental, social, and governance (ESG) issues. Together, the contributors identify three spheres in which technology shapes how investors make sense of such issues: ESG and technology: finance professionals need to know about how technological innovations, such as chemical recycling for plastics, in the real economy shape firms' ESG performance; ESG through technology: technological developments, such as AI and blockchain, can enable finance professionals to offer more fine-grained ESG analyses; and ESG as technology: the ESG agenda itself is influenced by technological developments that are not well understood by practitioners (e.g., data mining for Bitcoin creating significant emissions). Using practically relevant examples and recent insights from people working in the field, the book explores the linkages between sustainability, technology, and finance in different contexts and shows how practitioners can accelerate needed change processes. This book primarily addresses practitioners in companies and investment firms as well as students enrolled in executive education and MBA programs.

You can halve your R&D spending and still get far better results. Here's some of what you will learn. Hear why the tools you use now are your enemy. Learn how to get 1000% more return on your R&D dollar. Uncover the reasons why large companies stumble and fail. The value of open innovation finally quantified. How misguided targets lead to unwanted results. A shocking examination of the risk: reward balance. This book is the missing piece of the puzzle. You will hear the real problems holding you back and the get answers directly from a serial innovator. There is a chapter for aspiring innovators, advice for managers, CEOs and board members. This book has something for all parties involved in the quest for innovation. Praise for *Innovation Abyss*: "This book is an essential reference for anyone interested in how Innovation really happens. It explains the balanced role of free- and out-of-the-box thinkers, creative mavericks and visionary leaders who lead their people instead of managing them. You will find loads of great examples, thought provoking ideas and the book is full of helpful insights." Rob Kirschbaum CEO, SakuragiConsult & former VP Innovation at DSM. "Dr. DeArmitt has written an engaging, thoughtful, and provocative book about innovation. He has drawn on his extensive personal experience at companies both large and small, recent research, and many other innovators' experiences. The result is a framework of how companies actually operate in practice today, how that often hampers instead of helps innovation, and a set of suggestions and practical recommendations useable by individuals up to company directors." Micah Yairi, Co-Founder and CTO, Tactus Technology. "I just finished reading this book on a flight back from Asia, and it was so engaging that I couldn't put it down. Chris's insights on the innovation process, and the corporate hurdles to producing new products, was right on the mark. As someone who has spent his career working for both small and large companies in the US, and who has had to work around these obstacles to invent new products, I can attest to the validity of his arguments. I give this book two thumbs up!" Philip Jacoby, Founder Jacoby Polymer Consulting LLC. "Chris DeArmitt enjoyably relates his adventures as a true innovator in a substantially automated world. He identifies all those structures and procedures we have installed that prevent progress from happening: it is a call for all of us working in any position in a larger organization to get our targets straight. Reading this book will make you laugh and cry. It invites you to start thinking and may even make you act...if you dare...like Chris." Professor Gerrit Luinstra, University of Hamburg

**Wireless Data Services** Feb 08 2021 There are over 1.3 billion mobile subscribers around the world. It is interesting to note that wireless technologies have been adopted differently in key geographies such as Asia, Europe, and North America. Technologies such as i-mode in Japan, SMS in Europe, PDAs and Blackberry in North America point to the fact that wireless applications and services are not only unique to the culture and business models of a region but their

success also depends on how services and technologies are introduced to consumers. This book takes a deeper look into why certain technologies, business models, and adoption strategies succeed while others fail, and how all these elements will impact the future of wireless communications. With the help of examples, case studies and interviews with industry luminaries, the authors identify the key factors behind the success or failure of different blueprints and provide insights into strategies of matching wireless technology and services to global markets.

**Enhancing Financial Disclosure Standards in Transitional Economies II** Jan 27 2020 Public and private investors want timely, accurate financial information about institutions before investing. This requires adherence to internationally accepted financial disclosure standards. However, implementing these standards is a particular challenge for economies in transition from the Soviet-era central planning approach toward a market economy. The Asian Development Bank provided a technical assistance grant (TA 6505- REG) to build capacity to enhance financial disclosure standards in Armenia, Azerbaijan, and Georgia. The book is a compendium of the project's findings, activities, results, and recommendations. It discusses the rationale for the adoption of International Financial Reporting Standards and the enforcement of International Standards on Auditing by legal entities, and explores their use by small and medium-sized enterprises in the three countries. The book is a valuable guide to accountants, auditors, financial institutions, regulators, investors, governments, researchers, and others interested in financial disclosure practices and progress of these transitional nations.
