Moreover, for the proper structure, the practice of design thinking is the perfect answer. Design thinking is not a newly emerged concept and remains rooted in society for a very long time. The concept of design thinking is useful for designing and understanding context relating to any businesses. Design thinking may seem vague and a capable subject for all; however, the same is not true and requires thorough planning. If general reports are to be taken, design thinking has five stages, and each stage has its importance.
