**Mother to Mother** Nov 10 2020 Sindiwe Magona's novel *Mother to Mother* explores the South African legacy of apartheid through the lens of a woman who remembers a life marked by oppression and injustice. Magona decided to write this novel when she discovered that Fulbright Scholar Amy Biehl, who had been killed while working to organize the nation's first ever democratic elections in 1993, died just a few yards away from her own permanent residence in Guguletu, Capetown. She then learned that one of the boys held responsible for the killing was in fact her neighbor's son. Magona began to imagine how easily it might have been her own son caught up in the wave of violence that day. The book is based on this real-life incident, and takes the form of an epistle to Amy Biehl's mother. The murderer's mother, Mandisi, writes about her life, the life of her child, and the colonized society that not only allowed, but perpetuated violence against women and impoverished black South Africans under the reign of apartheid. The result is not an apology for the murder, but a beautifully written exploration of the society that bred such violence.

**Caught in the Act** Apr 15 2021 The research reported in *Caught in the Act* draws together the insights gained from a continuous professional development initiative for high school mathematics teachers, teaching in low socio-economic status and socially challenged environments in South Africa. The chapters show the possibilities for enhancing achievement in school mathematics if a strength-based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance – fitness for the context in which teachers are teaching – of the “goods” developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics teachers, school leaders, mathematics curriculum advisors, policy makers and researchers.

*Castles in the Air* Sep 28 2019 *Castles in the Air* is an attempt to open discussions on some often overlooked issues which affect education, particularly in rural and township government schools. In order to make it a truly South African drama, I have drawn from oral tradition by including songs and poems which play an integral part in traditional storytelling. There are many folksongs which were included in earlier versions, but I decided to remove them in the final version because I did not intend to write a musical. There are also some praise poems that I composed for the main character and his father. I studied oral tradition, and I am confident that the praise poems I composed have all the qualities of the real praise poems, and because I could not compose them in English, I, therefore, wrote them in isiZulu with translations in the glossary at the end.

**Teaching Etiquettes for a Successful Teacher** Jul 07 2020 Education is the heart of a successful nation. A learning nation is a successful nation. The nation that fails to educate its citizens faces numerous challenges such as social problems, financial problems, and rebellion. But for the success of education there should be enough and good teachers to teach students. In many countries, the number of good teachers is diminishing as the teaching career is becoming less attractive to a number of students because of the problems that are associated to teaching. It is imperative for the governments to come up with measures to increase the number of teachers in schools. It is unchallenged that teachers are one of the vital elements of education system. Therefore they need to be motivated and retained. Furthermore, the education system can be effective if the students are prepared to learn. It is very difficult for the teachers to impart knowledge to students that have barriers of education such as poor behavior. Therefore, parents have an important role to play to ensure that students come to school prepared to learn and without any barriers to education. It is the responsibility of the government and organizations to retain and motivate teachers. Systems of education will be successful if they are supported by the government, organizations, communities, parents, learners, and teachers. There should be good structures in the education system to produce more teachers who will be responsible in educating the nation. The death of a good system of education would drive the nation back to a time of ignorance where uneducated people will become leaders of nations.
