Crisis Management Beyond the Humanitarian-Development Nexus Jun 15 2021 In addressing humanitarian crises, the international community has long understood the need to extend beyond providing immediate relief, and to engage with long-term recovery activities and the prevention of similar crises in the future. However, this continuum from short-term relief to rehabilitation and development has often proved difficult to achieve. This book aims to shed light on the continuum of humanitarian crisis management, particularly from the viewpoint of major bilateral donors and agencies. Focusing on cases of armed conflicts and disasters, the authors describe the evolution of approaches and lessons learnt in practice when moving from emergency relief to recovery and prevention of future crises. Drawing on an extensive research project conducted by the Japan International Cooperation Agency Research Institute, this book compares how a range of international organizations, bilateral cooperation agencies, NGOs, and research institutes have approached the continuum in international humanitarian crisis management. The book draws on six humanitarian crises case studies, each resulting from armed conflict or natural disasters: Timor-Leste, South Sudan, the Syrian crisis, Hurricane Mitch in Honduras, the Indian Ocean earthquake and tsunami in Indonesia, and Typhoon Yolanda. The book concludes by proposing a common conceptual framework designed to appeal to different stakeholders involved in crisis management. Following on from the World Humanitarian Summit, where a new way of working on the humanitarian-development nexus was highlighted as one of five major priority trends, this book is a timely contribution to the debate which should interest researchers of humanitarian studies, conflict and peace studies, and disaster risk-management.

Crisis Communication Apr 01 2020 This timely book explores crises as an inevitable part of modern society, which causes ramifications not only for organisations, but also for a diverse range of stakeholders. Addressing the need for organisations to be guided by a stakeholder-oriented approach throughout all phases of the crisis communication process, the author draws upon various business disciplines and covers the management of issues, risk, reputation and relationships. Covering all stages of crisis communication, from pre-crisis to post-crisis, stakeholder engagement is analysed through a series of case studies, with a particular focus on the role of social media. Scholars of corporate communications and business strategy will find this new book undoubtedly useful, and it will be of particular interest to those involved in crisis communication and management.

Disaster, Conflict and Society in Crises Jul 29 2022 Humanitarian crises - resulting from conflict, natural disaster or political collapse - are usually perceived as a complete break from normality, spurring special emergency policies and interventions. In reality, there are many continuities and discontinuities between crisis and normality. What does this mean for our understanding of politics, aid, and local institutions during crises? This book examines this question from a sociological perspective. This book provides a qualitative inquiry into the social and political dynamics of local institutional response, international policy and aid interventions in crises caused by conflict or natural disaster. Emphasising the importance of everyday practices, this book qualitatively unravels the social and political working of policies, aid programmes and local institutions. The first part of the book deals with the social life of politics in crisis. Some of the questions raised are: What is the meaning of human security in practice? How do governments and other actors use crises to securitize - and hence depoliticize - their strategies? The second part of the book deals with the question how local institutions fare under and transform in response to crises. Conflicts and disasters are breakpoints of social order, with a considerable degree of chaos and disruption, but they are also marked by processes of continuity and re-ordering, or the creation of new institutions and linkages. This part of the book focuses on institutions varying from inter-ethnic marriage patterns in Sri Lanka to situation of institutional multiplicity in Angola. The final part of the book concerns the social and political realities of different domains of interventions in crisis, including humanitarian aid, peace-building, disaster risk reduction and safety nets to address chronic food crises. This book gives students and researchers in humanitarian studies, disaster studies, conflict and peace studies as well as humanitarian and military practitioners an invaluable wealth of case studies and unique political science analysis of the humanitarian studies field.

Life in Crisis Jul 05 2020 Life in Crisis tells the story of Médecins Sans Frontières (Doctors Without Borders or MSF) and its effort to "save lives" on a global scale. Begun in 1971 as a French alternative to the Red Cross, the MSF has grown into an international institution with a reputation for outspoken protest as well as technical efficiency. It has also expanded beyond emergency response, providing for a wider range of endeavors, including AIDS care. Yet its seemingly simple ethical goal proves deeply complex in practice. MSF continually faces the problem of defining its own limits. Its minimalist form of care recalls the promise of state welfare, but without political resolution or a sense of well-being beyond health and survival. Lacking utopian certainty, the group struggles when the moral clarity of crisis fades. Nevertheless, it continues to take action and innovate. Its organizational history illustrates both the logic and the tensions of casting humanitarian medicine into a leading role in international affairs.

The Age of Crisis Jun 03 2020 This book offers an analysis of the causes, development, and likely consequences of the Covid-19 pandemic for global neoliberalism. The analysis will draw upon the author's previous work on neoliberalism, and on its twin crises: the economic crisis (the Global Financial Crisis (GFC), ongoing since 2007) and, subsequently, the crisis of political democracy that has been associated with the rise of 'spectacular' authoritarian leaders in several countries. The approach is grounded on Marxist political economy. The book argues that the Covid-19 pandemic emerges out of this context of deep inequalities and crises in the economy and in politics, and it is likely to reinforce the exclusionary tendencies of neoliberalism, with detrimental implications both for economic prosperity and for democracy. In turn, the pandemic has revealed the limitations of neoliberalism like never before, with implications for the legitimacy of capitalism itself, and opening unprecedented spaces for the left. This book will be of interest to academics in economics, international relations, political science, political economy, sociology and development studies.

Such difficulties can come from within work (eg, a difficult client or boss, missing a target or deadline, rejection of a proposal or plan, feeling undervalued) or outside of it (eg, personal issues such as family, relationships, debt, alcohol). All have the potential to trigger stress, anxiety... and lead to crisis mode. This practical book offers strategies and guidance to coping with and surviving a range of crisis moments and issues that affect our ability to perform at work. Written by expert coaches, the book helps anyone to develop a series of competencies in order to help us manage crisis points and improve our personal resilience. LID Publishing's popular Concise Advice Lab notebooks are designed to be quick and comprehensive brainstorming tools and skill-building resources for busy professionals. The small trim size makes it easy to take along in a briefcase or purse. Interior pages are matte finish, so ink won't smear, and there's plenty of space to jot notes. A ribbon makes it easy to mark your place, and the elastic outer band keeps the notebook closed.

Combating A Crisis: The Psychology Of Singapore's Response To Covid-19 Jun 27 2022 The COVID-19 pandemic has caused, and will continue to cause, great disruptions to lives, livelihoods, ways of life, and quality of life. We will need to learn to live with the coronavirus for a long time, even as we combat the coronavirus crisis collectively and fight our own daily battles individually. This book examines Singapore's reaction and response to the coronavirus and draws lessons for crisis management, psychological preparedness, and adaptability. Consisting of 12 chapters, the book is organized into three parts. Part 1 elaborates on the context of the coronavirus crisis and discusses human reactions to the outbreak and the key adaptation challenges that people faced. Part 2 discusses Singapore's leadership and public responses, focusing on negative emotions, social responsibility, adoption of new technology for contact tracing, and the handling of the outbreak among migrant workers at the dormitories. Part 3 addresses issues of psychological preparedness amid the evolving COVID-19 situation, in terms of adapting to post-pandemic realities, enabling positive attitudes and experiences, building psychological capital, and learning to work together to emerge stronger and better from the coronavirus crisis.

Fusion Methodologies in Crisis Management Jul 25 2019 The book emphasizes a contemporary view on the role of higher level fusion in designing crisis management systems, and provide the formal foundations, architecture and implementation strategies required for building dynamic current and future situational pictures, challenges of, and the state of the art computational approaches to designing such processes. This book integrates recent advances in decision theory with those in fusion methodology to define an end-to-end framework for decision support in crisis

management. The text discusses modern fusion and decision support methods for dealing with heterogeneous and often unreliable, low fidelity, contradictory, and redundant data and information, as well as rare, unknown, unconventional or even unimaginable critical situations. Also the book examines the role of context in situation management, cognitive aspects of decision making and situation management, approaches to domain representation, visualization, as well as the role and exploitation of the social media. The editors include examples and case studies from the field of disaster management.

Sharing Economies in Times of Crisis Feb 21 2022 The 'new sharing economy' is a growing phenomenon across the Global North. It claims to transform relationships of production and consumption in a way that can improve our lives, reduce environmental impacts, and reduce the cost of living. Amidst various economic, environmental, and other crises, this message has strong resonance. Yet, it is not without controversy, and there have been heated debates over negative dimensions for workers and consumers alike. This book stretches far beyond the sharing economy as it is popularly defined, and explores the complex intersections of 'sharing' and 'the economy', and how a better understanding of these relationships might help us address the multiple crises that confront contemporary societies. The contributors to this book explore a wide diversity of sharing systems and practices from various empirical case studies, ranging from hospitality to seed-swapping, and from indigenous land rights to alcohol consumption. In each chapter, a different crisis or vulnerability frames and shapes the study, allowing contributors to unpick the ways in which crisis and sharing relate to each other in real life. The book is divided into three thematic sections. Following an extended introduction to the themes and ideas of the book by the editors, the first section foregrounds the shaping of sharing practices by already existing or anticipated crises. The second section focuses on the lived relations between sharing and economic practice. In the third section, authors conclude the book by exploring the possibilities and challenges for creating alternative economic forms grounded in practices of sharing. This edited volume makes a major, original contribution towards academic understandings of sharing economies in the context of crises. It is suitable for both students and academics who are interested in political economy, economic geography and consumption.

The Politics of Crisis in Europe Nov 08 2020 An analysis of the repeated existential crises affecting the resilience of the European Union in the twenty-first century.

Crisis Management May 27 2022 Modern organizational crises are complex, diverse, and frequent. Ineffective crisis management can result in catastrophic loss. Crisis Management: Resilience and Change introduces students to best practices for preventing, containing, and learning from crises in our global, media-driven society. While covering the strengths of existing works on crisis management, such as systems, leadership, communication, and stakeholder perspective, this innovative new text goes beyond to include global, ethical, change, and emotional aspects of crisis communication. Using her proven transformative crisis management framework, Sarah Kooor-Misra illustrates how organizations of all sizes can be adaptable, proactive, resilient, and ethical in the face of calamity.

The Power of Crisis Nov 01 2022 Renowned political scientist Ian Bremmer draws lessons from global challenges of the past 100 years—including the pandemic—to show how we can respond to three great crises unfolding over the next decade. In this revelatory, unnerving, and ultimately hopeful book, Bremmer details how domestic and international conflicts leave us unprepared for a trio of looming crises—global health emergencies, transformative climate change, and the AI revolution. Today, Americans cannot reach consensus on any significant political issue, and US and Chinese leaders behave as if they're locked in a new Cold War. We are squandering opportunities to meet the challenges that will soon confront us all. In coming years, humanity will face viruses deadlier and more infectious than Covid. Intensifying climate change will put tens of millions of refugees in flight and require us to reimagine how we live our daily lives. Most dangerous of all, new technologies will reshape the geopolitical order, disrupting our livelihoods and destabilizing our societies faster than we can grasp and address their implications. The good news? Some farsighted political leaders, business decision-makers, and individual citizens are already collaborating to tackle all these crises. The question that should keep us awake is whether they will work well and quickly enough to limit the fallout—and, most importantly, whether we can use these crises to innovate our way toward a better world. Drawing on strategies both time-honored and cutting-edge, from the Marshall Plan to the Green New Deal, The Power of Crisis provides a roadmap for surviving—even thriving in—the 21st century. Bremmer shows governments, corporations, and every concerned citizen how we can use these coming crises to create the worldwide prosperity and opportunity that 20th-century globalism promised but failed to deliver.

Crisis Communication and Crisis Management Jan 29 2020 Equip your students with a strong understanding of the essential role that communicators play in moments of crisis and the tools they need to conduct ethically sound crisis management.

Contention in Times of Crisis Oct 27 2019 Documents the waves of protest that spread across Europe in the wake of the Great Recession.

Discourse and Crisis Feb 09 2021 Discourse and Crisis: Critical perspectives brings together an exciting collection of studies into crisis as text and context, as unfolding process and unresolved problem. Crisis is viewed as a complex phenomenon that - in its prevalence, disruptiveness and (appearance of) inevitability - is both socially produced and discursively constituted. The book offers multiple critical perspectives: in-depth linguistically informed analyses of the discourses of power and collaboration implicated in crisis construal and recovery; detailed examination of the critical role that language plays during the crisis life-cycle; and further problematization of the semiotic-material complexity of crisis and its usefulness as an analytical concept. The research focus is on the discursive and interactive mediation of crisis in organizational, political and media texts. The volume contains contributions from across the world, offering a polyphonic overview of 'discourse and crisis' research. This impressive volume will be useful to researchers and academics working on the intersection of crisis, language and communication. It is also of interest to practitioners in organizational management, politics and policy, and media.

The Palgrave Handbook of EU Crises Apr 13 2021 This handbook comprehensively explores the European Union's institutional and policy responses to crises across policy domains and institutions - including the Euro crisis, Brexit, the Ukraine crisis, the refugee crisis, as well as the global health crisis resulting from COVID-19. It contributes to our understanding of how crisis affects institutional change and continuity, decision-making behavior and processes, and public policy-making. It offers a systematic discussion of how the existing repertoire of theories understand crisis and how well they capture times of unrest and events of disintegration. More generally, the handbook looks at how public organizations cope with crises, and thus probes how sustainable and resilient public organizations are in times of crisis and unrest.

Crisis Management in a Complex World Dec 10 2020 Today's managers, business owners, and public relations practitioners grapple daily with a fundamental question about contemporary crisis management: to what extent is it possible to control events and stakeholder responses to them, in order to contain escalating crises or safeguard an organization's reputation? The authors meet the question head-on, departing from other crisis management texts, and arguing that a complexity-based approach is superior to the standard simplification model of organizational learning. The Handbook of Crisis Communication Jan 11 2021 Written as a tool for both researchers and communication managers, the Handbook of Crisis Communication is a comprehensive examination of the latest research, methods, and critical issues in crisis communication. Includes in-depth analyses of well-known case studies in crisis communication, from terrorist attacks to Hurricane Katrina. Explores the key emerging areas of new technology and global crisis communication. Provides a starting point for developing crisis communication as a distinctive field research rather than as a sub-discipline of public relations or corporate communication.

Out of the Crisis, reissue Apr 25 2022 Deming's classic work on management, based on his famous 14 Points for Management. "Long-term commitment to new learning and new philosophy is required of any management that seeks transformation. The timid and the fainthearted, and the people that expect quick results, are doomed to disappointment." —from Out of the Crisis In his classic Out of the Crisis, W. Edwards Deming describes the foundations for a completely new and transformational way to lead and manage people, processes, and resources. Translated into twelve languages and continuously in print since its original publication, it has proved highly influential. Research shows that Deming's approach has high levels of success and sustainability. Readers today will find Deming's insights relevant, significant, and effective in business thinking and practice. This edition includes a foreword by Deming's grandson, Kevin Edwards Cahill, and Kelly Allan, business consultant and Deming expert. According to Deming, American companies require nothing less than a transformation of management style and of governmental relations with industry. In Out of the Crisis, originally published in 1982, Deming offers a theory of management based on his famous 14 Points for Management. Management's failure to plan for the future, he claims, brings about loss of market, which brings about loss of jobs. Management must be judged not only by the quarterly dividend, but by innovative plans to stay in business, protect investment, ensure future dividends, and provide more jobs through improved product and service. In simple, direct language, Deming explains the principles of management transformation and how to apply them.

When Leaders Face Personal Crisis Sep 26 2019 This book examines a relatively unexplored area of leadership research - personal aspects of leadership - by considering the impact of leaders navigating their own personal crises on their relationships with teams, peers, and supervisors. Through original research as well as an integrative review of the literature, Hickman and Knouse focus on the "leader-as-person in crisis," including the real-life personal crises and experiences of leaders. This important volume offers a detailed and thoughtful description of intersecting factors that contribute to the ways in which leaders experience and cope with personal crises to spur additional research attention to this neglected area. This book also offers current and prospective leaders advice and direction on effectively navigating personal crises.

Monetary Policy in Times of Crisis Jul 17 2021 The first twenty years of the European Central Bank offer a unique insight into how a central bank can navigate macroeconomic insecurity and crisis. This volume examines the structures and decision-making processes behind the complex measures taken by the ECB to tackle some of the toughest economic challenges in the history of modern Europe.

Social Media and Crisis Communication Mar 13 2021 Social Media and Crisis Communication provides a unique and timely contribution to the field of crisis communication by addressing how social media are influencing the practice of crisis communication. The book, with a collection of chapters contributed by leading communication researchers, covers the current and emerging interplay of social media and crisis communication, recent theories and frameworks, overviews of dominant research streams, applications in specific crisis areas, and future directions. Both the theoretical and the practical are discussed, providing a volume that appeals to both academic-minded readers as well as professionals at the managerial, decision-making level. The audience includes public relations and corporate communication scholars, graduate students studying social media and crisis communication, researchers, crisis managers working in communication departments, and business leaders who make strategic business communication planning. No other volume has provided the overarching synthesis of information regarding the field of crisis communication and social media that this book contains. Incorporated in this volume is the recent Social-Mediated Crisis Communication Model developed by the editors and their co-authors, which serves as a framework for crisis and issues management in a rapidly evolving media landscape.

Handbook of Research on Crisis Leadership in Organizations Jan 23 2022 'Modern organizational life seems dominated by crisis - BP and the Gulf Oil spill, TEPCO and the Japanese tsunami, the global financial meltdown. Therefore it is particularly timely to find a collection of articles in this Handbook that provides research guidance and practical insights on how leaders manage or mismanage in crisis situations. The focus on the crisis leader highlights what they do, and how they do it, while at the same time raising important questions to guide subsequent analysis.' - Sydney Finkelstein, Dartmouth College, US and author of Why Smart Executives Fail

Governing after Crisis Nov 28 2019 The constant threat of crises such as disasters, riots and terrorist attacks poses a frightening challenge to Western societies and governments. While the causes and dynamics of these events have been widely studied, we know little about what happens following their containment and the restoration of stability. This volume explores 'post-crisis politics,' examining how crises give birth to longer term dynamic processes of accountability and learning which are characterised by official investigations, blame games, political manoeuvring, media scrutiny and crisis exploitation. Drawing from a wide range of contemporary crises, including Hurricane Katrina, 9/11, the Madrid train bombings, the Walkerton water contamination, Space Shuttle Challenger and Columbia and the Boxing Day Asian tsunami, this is a ground-breaking volume which addresses the longer term impact of crisis-induced politics. Competing pressures for stability and change mean that policies, institutions and leaders may occasionally be uprooted, but often survive largely intact.

Crises of Global Economy and the Future of Capitalism Sep 06 2020 Recent events in the global financial markets and macro economies have served as a strong reminder for a need of a coherent theory of capitalist crisis and analysis. This book helps to fill the gap with well-grounded alternative articulations of the forces which move today's economic dynamics, how they interact and how ideas of foundational figures in economic theory can be used to make sense of the current predicament. The book presents a comprehensive collection of reflections on the origins, dynamics and implications of the interlinked crises of the U.S. and global economies. The book is a thoughtful collaboration between Japanese heterodox economists of the Japan Society of Political Economy (JSPE) and non-Japanese scholars. It provides a unique immersion in different, sophisticated approaches to political economy and to the crisis. The book illustrates with the understanding of Marx's crisis theory and how it can serve as a powerful framework for analyzing the contemporary sub-prime world crisis. The book explains the subprime loan crisis as a crisis in a specific phase of the capitalist world system and concludes that it is a structural one which destroys the existing capital accumulation regime. It pays attention to structural changes and to how these changes beget

profound and controversial consequences. The result is a must-read - one which truly contributes to the resurgence of radical analyses of the political economy, free from the market optimism of the main-stream economics.

Communicating out of a Crisis Nov 20 2021 This is a modern, professional and practical approach to crisis management from a leading expert. The book examines the impact of a crisis - big or small - and the threat of negative publicity to corporate reputation. Most companies have no crisis management plans and hope that disaster will never strike. The author argues that consumerism, legislation, environmentalism, pressure groups, and investigative media all necessitate the development of a crisis communications plan. With a well thought out and practical plan the author shows how a crisis can be managed effectively or even turned to advantage through publicity giving the company's reputation a long term boost. Case studies examine the activities of 6 companies facing crises and the lessons to be learned from their approaches. Useful checklists are included as a handy quick reference for the practising PR professional.

Communicating Europe in Times of Crisis Mar 25 2022 The EU views itself as an important actor on the world stage, a perspective supported by the role it plays in global politics. This collection presents a true reflection of the EU as an international actor by exploring how it is viewed externally and the impact that events like the Eurozone debt crisis have had on external perceptions of the EU.

New Media in Times of Crisis Sep 30 2022 New Media in Times of Crisis provides an interdisciplinary look at research focused around how people organize during crises. Contributors examine the latest practices for communicating during crises, including evacuation practices, workplace safety challenges, crisis social media usage, and strategies for making emergency alerts on U.S. mobile phones constructive and helpful. The book is grounded in the practices of first responders, crisis communicators, people experiencing tragic events, and communities who organize on- and offline to make sense of their experiences. The authors draw upon a wide range of theories and frameworks with the goal of establishing new directions for research and practice. The text is suitable for advanced students and researchers in crisis, disaster, and emergency communication.

Crisis Management Mar 01 2020 The information in this book covers several aspects of crisis management and turnaround management. A very important issue is early warning signs, since chances for a successful turnaround are best in the early stages of a crisis. Management of a crisis involves managerial issues such as analysis of the causes, interim management, development and execution of a turnaround plan, as well as legal issues of communication with various internal and external stakeholders. This work seeks to explore the possible barriers that exist to effective organizational learning in the wake of crisis events. The book outlines the nature of the crisis management process and identifies a number of barriers to the learning process. It also includes suggesting ways in which organizations can develop more effective learning capabilities for crisis events.

Law in Times of Crisis Aug 25 2019 The terrorist attacks of September 11, 2001, and the ensuing 'war on terror' have focused attention on issues that have previously lurked in a dark corner at the edge of the legal universe. This book presents a systematic and comprehensive attempt by legal scholars to conceptualize the theory of emergency powers, combining post-September 11 developments with more general theoretical, historical and comparative perspectives. The authors examine the interface between law and violent crises through history and across jurisdictions, bringing together insights gleaned from the Roman republic and Jewish law through to the initial responses to the July 2005 attacks in London. Three models of emergency powers are used to offer a conceptualization of emergency regimes, giving a coherent insight into law's interface with and regulation of crisis and a distinctive means to evaluate the legal options open to states for dealing with crises.

Internal Crisis Communication Dec 30 2019 We live in a crisis society, with traditional media responding on a minute-by-minute basis on daily, seemingly inevitable, organizational crises. Whether crises have become more prevalent or we're simply more aware of them, they are now of great concern to organizations and crisis management and communication is a priority. Most organizations have a crisis response plan; many have dedicated crisis and security management staff. Yet much of the emphasis has been on action outside of the organization. Neglecting communication between managers and employees, they risk poor, inconsistent crisis management and the very real possibility of crisis escalation. Crisis management, like charity, begins in the home. Internal Crisis Communication is one of the first guides to communication inside organizations, before, during and after a crisis - not just on the acute crisis phase - to provide a complete and holistic guide for managers that will help them manage and contain crises. It includes an in-depth real-life case study, referred to throughout, from the author's own experience, which makes practical application explicit and the methodology clear. Strengthened by rigorous academic research and tested in real-life crisis situations, the methods included in this book will be invaluable for communication professionals, security officers and crisis managers, as well as valuable reading for students and researchers interested in crisis and risk management.

The book provides discussion of: * The influential effect of the mass media How crises effect the purchase decision process Destination branding/image and its manipulation Preventative crises management and strategies Crisis Management in the Tourism Industry is an essential guide to explaining how the tourism industry can prepare and succeed in the face of the effects of crises.

Education for All in Times of Crisis Dec 22 2021 This book is a response to the loss of learning experienced by children and young people during the Covid-19 crisis. It examines the measures which were taken to fix the disruption of education and their limitations particularly in reaching marginalised groups. Drawing on data and experiences from around the world, the book examines education systems as ecosystems with interdependencies between many different components which need to be considered when change is contemplated. Chapters explore the challenges involved ensuring continuity of education for all learners in times of crisis and disruption and set out practical solutions that are relevant when preparing for natural disasters and disasters caused by humans as well as for climate change challenges and future pandemics. The focus throughout is on building the sustainability of learners' education into education systems to ensure educational continuity for all learners in times of disruption and crisis. Including tools for planning, prompts for reflection, and future possibilities to consider, Education for All in Times of Crisis will be valuable reading for school leaders, educators and policy makers.
