Field Guide for Construction Management Aug 29 2022 From any perspective, the ideal

construction project is one in which the contractor shows up on your doorstep with the right price and all of his tools, people, and equipment ready to start, and builds exactly what you want for the price you want and finish on schedule. Everyone then goes away, happy as clams. This is the ideal, but it never occurs. The world is a competitive place; to survive, contractors must think competitively in order to win work. They must find a way to complete a quality project for the lowest price. Circumstances can easily derail even the best plans and contractors, but with planning, delays and cost overruns can be minimized. This handbook helps guide the construction manager through the trials and tribulations of selecting, expecting, rejecting, prompting, requiring, and documenting what the contractor produces on the project. Contracts can be written that foresee common problems and provide the construction manager with their resolution. The concepts in *Field Guide for Construction Management* can help you do just that.

Competency-Based Resumes Feb 20 2022 Millions of job hunters and employers are frustrated. Why aren't they working together more effectively? Because employers have changed the job-search playing field and too many candidates are using yesterday's strategies. Do you want the key to the best jobs with the best employers? It's time to play offense instead of

defense. Competency-Based Resumes shows today's job candidates a new, more targeted way to write resumes to get them back on the same playing field with the best employers and improve their odds of winning the job they want. The system an employer uses when filling jobs has changed significantly in the past few years, and it is still evolving. Rather than simply looking at an applicant's past jobs, companies are instead looking at candidate's experiences in certain key areas—including measurable work habits and the personal skills, known as competencies, used to achieve objectives at work. Competency-Based Resumes offers you a new and effective way to create resumes that emphasizes the knowledge, skills, and abilities that you have and employers need. Many sophisticated U.S. and international organizations are using competency-based systems to recruit, interview, select, and promote. Corporations such as American Express, Coca-Cola, Sears, and MetLife are all looking for specific competencies. Creating your own competency-based resume will: – Confirm to the employer that you have the expertise—or competencies—they are looking for. – Improve your chances of being selected for interviews for the position you want. – Help you to be perceived as being more competitive. – Enable you to explain sticky areas in your background in a more positive way. Most applicants do not know how to apply for jobs based on this new dynamic. Few candidates write their resumes so their critical competencies are obvious. Competency-Based Resumes will move your resume to the top of the pile, giving you the edge you need in any job market, no matter how competitive.
