**Ending Discrimination Against People with Mental and Substance Use Disorders** May 05 2020 Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. *Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change* explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

The Negro Motorist Green Book Apr 27 2022 The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

**From Discriminating to Discrimination** Nov 22 2021 This book adopts a multidisciplinary approach to try to answer the question of how do we, as human beings, go from the socially neutral linguistic act of discriminating external stimuli to the socially loaded act of promoting social discrimination through language? This contributed volume brings together works presented at the international event "From Discriminating to Discrimination – The Influence of Language on Identity and Subjectivity". This was an online event hosted and organized by the Brandenburg University of Technology (BTU), Germany, in partnership with São Paulo State University (UNESP), Brazil, that brought together lecturers from different universities around the world. During the event, linguists, psychologists, language teachers, social workers and pedagogues got together to discuss how discriminating can be recognized as a natural and important ability of the human being in the early stages of life and, after that, how to avoid discriminatory acts against others. The debates held online took into account the important and necessary dialogue between linguistics and other social sciences to discuss the role played by language as a form of building subjectivity and teaching practices that can contribute to minimize discrimination and promote integration and acceptance in a broad sense, understanding the preponderant role of language in recognizing what is different (discriminating), without diminishing or excluding it (discrimination). *From Discriminating to Discrimination: The Influence of Language on Identity and Subjectivity* will help linguists, psychologists, educators, social workers and a broad range of social scientists working with cognitive, linguistic and educational studies understand the path taken by differentiation, from the beginning of the child's language development – when discrimination (of sounds, gestures, etc.) is essential for the acquisition of language to occur –, until the moment when differentiation, discrimination, ceases to be an essential factor and becomes a means of social segregation.

Pattern Discrimination Jul 07 2020 How do "human" prejudices reemerge in algorithmic cultures allegedly devised to be blind to them? How do "human" prejudices reemerge in algorithmic cultures allegedly devised to be blind to them? To answer this question, this book investigates a fundamental axiom in computer science: pattern discrimination. By imposing identity on input data, in order to filter—that is, to discriminate—signals from noise, patterns

become a highly political issue. Algorithmic identity politics reinstate old forms of social segregation, such as class, race, and gender, through defaults and paradigmatic assumptions about the homophilic nature of connection. Instead of providing a more “objective” basis of decision making, machine-learning algorithms deepen bias and further inscribe inequality into media. Yet pattern discrimination is an essential part of human—and nonhuman—cognition. Bringing together media thinkers and artists from the United States and Germany, this volume asks the urgent questions: How can we discriminate without being discriminatory? How can we filter information out of data without reinserting racist, sexist, and classist beliefs? How can we queer homophilic tendencies within digital cultures?

*Slavery by Another Name* Jun 25 2019 A Pulitzer Prize-winning history of the mistreatment of black Americans. In this 'precise and eloquent work' - as described in its Pulitzer Prize citation - Douglas A. Blackmon brings to light one of the most shameful chapters in American history - an 'Age of Neoslavery' that thrived in the aftermath of the Civil War through the dawn of World War II. Using a vast record of original documents and personal narratives, Blackmon unearths the lost stories of slaves and their descendants who journeyed into freedom after the Emancipation Proclamation and then back into the shadow of involuntary servitude thereafter. By turns moving, sobering and shocking, this unprecedented account reveals these stories, the companies that profited the most from neoslavery, and the insidious legacy of racism that reverberates today.

**The Impacts of Racism and Bias on Black People Pursuing Careers in Science, Engineering, and Medicine** May 17 2021 Despite the changing demographics of the nation and a growing appreciation for diversity and inclusion as drivers of excellence in science, engineering, and medicine, Black Americans are severely underrepresented in these fields. Racism and bias are significant reasons for this disparity, with detrimental implications on individuals, health care organizations, and the nation as a whole. The Roundtable on Black Men and Black Women in Science, Engineering, and Medicine was launched at the National Academies of Sciences, Engineering, and Medicine in 2019 to identify key levers, drivers, and disruptors in government, industry, health care, and higher education where actions can have the most impact on increasing the participation of Black men and Black women in science, medicine, and engineering. On April 16, 2020, the Roundtable convened a workshop to explore the context for their work; to surface key issues and questions that the Roundtable should address in its initial phase; and to reach key stakeholders and constituents. This proceedings provides a record of the workshop.

**Migration and Discrimination** Jun 05 2020 This open access short reader provides a state of the art overview of the discrimination research field, with particular focus on discrimination against immigrants and their descendants. It covers the ways in which discrimination is defined and conceptualized, how it is measured, how it may be theorized and explained, and how it might be combated by legal and policy means. The book also presents empirical results from studies of discrimination across the world to show the magnitude of the problem and the difficulties of comparison across national borders. The concluding chapter engages in a critical discussion of the relationship between discrimination and integration as well as pointing out promising directions for future studies. As such this short reader is a valuable read to undergraduate students, as well as graduate students, scholars, policy makers and the general public.

**The Color of Law: A Forgotten History of How Our Government Segregated America** Jun 29 2022 New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' “Amazing Books” of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This “powerful and disturbing history” exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a “masterful” (Washington Post) and “essential” (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers “the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation” (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, “virtually indispensable” study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

**Racism** Jul 19 2021 Are antisemitism and white supremacy manifestations of a general phenomenon? Why didn't racism appear in Europe before the fourteenth century, and why did it flourish as never before in the eighteenth and nineteenth centuries? Why did the twentieth century see institutionalized racism in its most extreme forms? Why are egalitarian societies particularly susceptible to virulent racism? What do apartheid South Africa, Nazi Germany, and the American South under Jim Crow have in common? How did the Holocaust advance civil rights in the United States? With a rare blend of learning, economy, and cutting insight, George Fredrickson surveys the history of Western racism from its emergence in the late Middle Ages to the present. Beginning with the medieval antisemitism that put Jews beyond the pale of humanity, he traces the spread of racist thinking in the wake of European expansionism and the beginnings of the African slave trade. And he examines how the Enlightenment and nineteenth-century romantic nationalism created a new intellectual context for debates over slavery and Jewish emancipation. Fredrickson then makes the first sustained comparison between the color-coded racism of nineteenth-century America and the antisemitic racism that appeared in Germany around the same time. He finds similarity enough to justify the common label but also major differences in the nature and functions of the stereotypes invoked. The book concludes with a provocative account of the rise and decline of the twentieth century's overtly racist regimes--the Jim Crow South, Nazi Germany, and apartheid South Africa--in the context of world historical developments. This illuminating work is the first to treat racism across such a sweep of history and geography. It is distinguished not only by its original comparison of modern racism's two most significant varieties--white supremacy and antisemitism--but also by its eminent readability.

**Palestinians in Israel** Dec 24 2021 *Palestinians in Israel* considers a key issue ignored by the official "peace process" and most mainstream commentators: that of the growing Palestinian minority within Israel itself. What the Israeli right-wing calls "the demographic problem," Ben White identifies as "the democratic problem," which goes to the heart of the conflict. Israel defines itself not as a state of its citizens, but as a Jewish state, despite the substantial and increasing Palestinian population. White demonstrates how the consistent emphasis on privileging one ethno-religious group over another cannot be seen as compatible with democratic values and that, unless addressed, will undermine any attempts to find a lasting peace. Individual case studies are used to complement this deeply informed study into the great, unspoken contradiction of Israeli democracy. It is a pioneering contribution which will spark debate among all those concerned with a resolution to the Israel/Palestine conflict.

*Discrimination American Style* Oct 22 2021 Why, and how, are some people -- women, blacks, and other minorities -- discriminated against? The answers to these questions are important because an understanding of the causes and operation of discrimination is essential to finding effective ways to counteract and eradicate discrimination from our society. While the popular view holds that prejudice and bigotry lie behind racist and sexist discrimination, this book goes beyond that view to expose other roots of the problem that are more subtle and difficult to combat. The authors describe in detail the mechanics and effects of institutionalized discrimination in employment, housing, health and social services, education, politics, and the courts.

**Measuring Racial Discrimination** Nov 03 2022 Many racial and ethnic groups in the United States, including blacks, Hispanics, Asians, American Indians, and others, have historically faced severe discrimination—pervasive and open denial of civil, social, political, educational, and economic opportunities. Today, large differences among racial and ethnic groups continue to exist in employment, income and wealth, housing, education, criminal justice, health, and other areas. While many factors may contribute to such differences, their size and extent suggest that various forms of discriminatory treatment persist in U.S. society and serve to undercut the achievement of equal opportunity. Measuring Racial Discrimination considers the definition of race and racial discrimination, reviews the existing techniques used to measure racial discrimination, and identifies new tools and areas for future research. The book conducts a thorough evaluation of current methodologies for a wide range of circumstances in which racial discrimination may occur, and makes recommendations on how to better assess the presence and effects of discrimination.

**White Fragility** Nov 10 2020 The International Bestseller 'With clarity and compassion, DiAngelo allows us to understand racism as a practice not restricted to "bad people." In doing so, she moves our national discussions forward. This is a necessary book for all people invested in societal change' Claudia Rankine Anger. Fear. Guilt. Denial. Silence. These are the ways in which ordinary white people react when it is pointed out to them that they have done or said something that has - unintentionally - caused racial offence or hurt. After, all, a racist is the worst thing a person can be, right? But these reactions only serve to silence people of colour, who cannot give honest feedback to 'liberal' white people lest they provoke a dangerous emotional reaction. Robin DiAngelo coined the term 'White Fragility' in 2011 to describe this process and is here to show us how it serves to uphold the system of white supremacy. Using knowledge and insight gained over decades of running racial awareness workshops and working on this idea as a Professor of Whiteness Studies, she shows us how we can start having more honest conversations, listen to each other better and react to feedback with grace and humility. It is not enough to simply hold abstract progressive views and condemn the obvious racists on social media - change starts with us all at a practical, granular level, and it is time for all white people to take responsibility for relinquishing their own racial supremacy. 'By turns mordant and then inspirational, an argument that powerful forces and tragic histories stack the deck fully against racial justice alongside one that we need only to be clearer, try harder, and do better' David Roediger, Los Angeles Review of Books 'The value in White Fragility lies in its methodical, irrefutable exposure of racism in thought and action, and its call for humility and vigilance' Katy Waldman, New Yorker 'A vital, necessary, and beautiful book' Michael Eric Dyson

**Understanding Racial and Ethnic Differences in Health in Late Life** Oct 02 2022 As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various

stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

**The Sum of Us** Jan 25 2022 NEW YORK TIMES BESTSELLER • LONGLISTED FOR THE NATIONAL BOOK AWARD • One of today's most insightful and influential thinkers offers a powerful exploration of inequality and the lesson that generations of Americans have failed to learn: Racism has a cost for everyone—not just for people of color. WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • ONE OF THE BEST BOOKS OF THE YEAR: Time, The Washington Post, St. Louis Post-Dispatch, Ms. magazine, BookRiot, Library Journal • LONGLISTED FOR THE ANDREW CARNEGIE MEDAL • “This is the book I’ve been waiting for.”—Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* Heather McGhee's specialty is the American economy—and the mystery of why it so often fails the American public. From the financial crisis of 2008 to rising student debt to collapsing public infrastructure, she found a root problem: racism in our politics and policymaking. But not just in the most obvious indignities for people of color. Racism has costs for white people, too. It is the common denominator of our most vexing public problems, the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This is the story of how public goods in this country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world's advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can't do on our own. *The Sum of Us* is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game.

**School Resegregation** Sep 28 2019 Confronting a reality that many policy makers would prefer to ignore, contributors to this volume offer the latest information on the trend toward the racial and socioeconomic resegregation of southern schools. In the region that has achieved more widespread public school integration than any other since 1970, resegregation, combined with resource inequities and the current "accountability movement," is now bringing public education in the South to a critical crossroads. In thirteen essays, leading thinkers in the field of race and public education present not only the latest data and statistics on the trend toward resegregation but also legal and policy analysis of why these trends are accelerating, how they are harmful, and what can be done to counter them. What's at stake is the quality of education available to both white and nonwhite students, they argue. This volume will help educators, policy makers, and concerned citizens begin a much-needed dialogue about how America can best educate its increasingly multiethnic student population in the twenty-first century. The Handy American Government Answer Book Jan 13 2021 The stakes have never been higher: national security, civil liberties, the economy, the future of the republic. Yet few outside Washington actually understand how our government and political system should work, much less how it actually operates. **Communities in Action** May 29 2022 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
