Routledge Handbook of Water Law and Policy Feb 24 2020 Water plays a key role in addressing the most pressing global challenges of our time, including climate change adaptation, food and energy security, environmental sustainability and the promotion of peace and stability. This comprehensive handbook explores the pivotal place of law and policy in efforts to ensure that water enables positive responses to these challenges and provides a basis for sound governance. The book reveals that significant progress has been made in recent decades to strengthen the governance of water resource management at different scales, including helping to address international and sub-national conflicts over transboundary water resources. It demonstrates that 'effective' laws and policies are fundamental drivers for the safe, equitable and sustainable utilization of water. However, it is also shown that what might constitute an effective law or policy related to water resources management is still hotly debated. As such, the handbook provides an important and definitive reference text for all studying water governance and management.

Pricing and Hedging Interest and Credit Risk Sensitive Instruments Jul 23 2022 This book is tightly focused on the pricing and hedging of fixed income securities and their derivatives. It is targeted at those who are interested in trading these instruments in an investment bank, but is also useful for those responsible for monitoring compliance of the traders such as regulators, back office staff, middle and senior lever managers. To broaden its appeal, this book lowers the barriers to learning by keeping math to a minimum and by illustrating concepts through detailed numerical examples using Excel workbooks/spreadsheets on a CD with the book. On the accompanying CD with the book, three interest rate models are illustrated: Ho and Lee, constant volatility and Black Derman and Toy, along with two evolutionary models, Vasicek and CIR and two credit risk models, Jarrow and Turnbull and Duffie and Singleton. These are implemented via spreadsheets on the CD. * Starts at an introductory level and then develops advanced topics * Provides plenty of numerical examples rather than mathematical equations to aid full understanding of the strengths and weaknesses of all interest rate derivative models * Can be used for self-study - a complete book on the topic, which includes examples with answers

Threading the Sovereign's Needle Oct 26 2022 In *Threading the Sovereign's Needle: A Philosophical Deconstruction of an Investor-State Tribunal's Authority to Award Interim Relief in Relation to Criminal Proceedings*, Alexander G. Leventhal shows that, rather than a diffuse set of contradictory decisions, these cases obey a coherent philosophy. More than that, however, he explains the reasons behind the results in the rich case law on point.

Perforated Sovereignties and International Relations Oct 14 2021 In case studies and comparative analysis of Canada, the United States, France, Switzerland, and Belgium, a distinguished international group of scholars looks at how and why provinces, states, cantons, and large municipalities increasingly seek access to foreign sources of wealth and technological information. The first book to explore the subject, this new study examines the effects of these initiatives on the traditional conduct of foreign policy and foreign trade and the implications of the continued perforation of national boundaries already subject to an unprecedented flow of foreign products, cultural influences, and visitors, as well as environmental pollution from abroad.

The Routledge Handbook of State-Owned Enterprises Mar 07 2021 State-owned enterprises make up roughly 10 percent of the world economy, yet they are woefully understudied. This handbook offers the first synthesis of the topic since the 1980s and offers a comprehensive reference for a generation. The authors provide a detailed explanation of the theory that underpins the expansion of state-owned enterprises in the 21st century. Each chapter delivers an overview of current knowledge, as well as identifying issues and relevant debates for future research. The authors explain how state-owned enterprises are used in both developed and developing countries and offer an insight into complex and fascinating organizations such as the German municipal conglomerates or the multinational companies owned by states. New modes of governance and regulation have been invented to make sure they act in the public interest. This handbook brings together a wealth of international scholars, offering multiple theoretical perspectives to help shape a brave new world. It will be of interest to teachers and students of Economics, Public Administration and Business, academics, established researchers and PhD students seeking rigorous literature reviews on specific aspects of SOEs, as well as practitioners and decision makers in international organizations.

Dead in the Water Dec 24 2019 An urgent call for reassessment of policies supporting very large infrastructure projects in developing countries. This case study examines the planning, implementation, and unexpected outcomes--for both the local people and the environment--of one of the largest dams in Southeast Asia, which the World Bank promoted as a new model of sustainable development.

Agency Theory and Executive Pay Jul 11 2021 This new book examines the relationship between agency theory and executive pay. It argues that while Jensen and Meckling (1976) were right in their analysis of the agency problem in public corporations they were wrong about the proposed solutions. Drawing on ideas from economics, psychology, sociology and the philosophy of science, the author explains how standard agency theory

has contributed to the problem of executive pay rather than solved it. The book explores why companies should be regarded as real entities not legal fictions, how executive pay in public corporations can be conceptualised as a collective action problem and how behavioral science can help in the design of optimal incentive arrangements. An insightful and revolutionary read for those researching corporate governance, HRM and organisation theory, this useful book offers potential solutions to some of the problems with executive pay and the standard model of agency.

Phacoemulsification Jun 29 2020 Phacoemulsification: Principles and Techniques, Second Edition is perfect for the surgeon interested in learning the concepts, developing skills, and preparing for the actual surgical procedure. This completely revised and updated resource contains a detailed description of the basic technique of phacoemulsification and the special techniques devised by Dr. Buratto and a group of highly acclaimed international surgeons when encountering unusual circumstances. Expert surgeons interested in updating their knowledge and enhancing their operating skills will also benefit from this state-of-the-art tool. This definitive resource couples both the authors' and 84 contributors' diverse experience and knowledge to produce a complete vision of cataract surgery. Included within this completely revised second edition are 768 pages of updated material and more than 962 figures to illustrate this procedure. Modern cataract surgery has continually changed since its inception. The evolution of this procedure has been aided by technological advancements, increased knowledge of the anatomy of the eye, and the improvement of IOLs. Phacoemulsification: Principles and Techniques is a necessary text for all surgeons aspiring to improve their surgical results using the latest techniques available.

Land and Hydropolitics in the Nile River Basin Oct 02 2020 The Nile River Basin supports the livelihoods of millions of people in Egypt, Ethiopia, Sudan and Uganda, principally as water for agriculture and hydropower. The resource is the focus of much contested development, not only between upstream and downstream neighbours, but also from countries outside the region. This book investigates the water, land and energy nexus in the Nile Basin. It explains how the current surge in land and energy investments, both by foreign actors as well as domestic investors, affects already strained transboundary relations in the region and how investments are intertwined within wider contexts of Nile Basin history, politics and economy. Overall, the book presents a range of perspectives, drawing on political science, international relations theory, sociology, history and political ecology.

Africa's Natural Resources and Underdevelopment Dec 16 2021 This book explores how African countries can convert their natural resources, particularly oil and gas, into sustainable development assets. Using Ghana, one of the continent's newest oil-producing countries, as a lens, it examines the "resource curse" faced by other producers - such as Nigeria, Angola, and Equatorial Guinea - and demonstrates how mismanagement in those countries can provide valuable lessons for new oil producers in Africa and elsewhere. Relying on a broad range of fieldwork and policymaking experience, Panford suggests practical measures for resource-rich developing countries to transform natural resources into valuable assets that can help create jobs, boost human resources, and improve living and working conditions in Ghana in particular. He suggests fiscal, legal, and environmental antidotes to resource mismanagement, which he identifies as the major obstacle to socioeconomic development in countries that have historically relied on natural resources.

The Future of Large Dams Sep 01 2020 Viewed by some as symbols of progress and by others as inherently flawed, large dams remain one of the most contentious development issues on Earth. Building on the work of the now defunct World Commission on Dams, Thayer Scudder wades into the debate with unprecedented authority. Employing the Commission's Seven Strategic priorities, Scudder charts the 'middle way' forward by examining the impacts of large dams on ecosystems, societies and political economies. He also analyses the structure of the decision-making process for water resource development and tackles the highly contentious issue of dam-induced resettlement, illuminated by a statistical analysis of 50 cases.
