*Service-Ability* Oct 27 2019 Times have changed. Long gone are our days of being kings of the manufacturing industry, we are now immersed in the world of 'service' where the relationship between an organization and the customer is an integral part of the "product" offering. The nation is suffering from a widespread lack of truly customer-satisfying service. We lack the very thing that we need to make this new paradigm work efficiently: service-ability. Organizations of all kinds are facing high customer churn, serious customer antagonism, loss of consumer confidence and plummeting customer satisfaction. Research shows that totally satisfying the customer is the only thing that will secure loyalty and offer significant competitive advantage. Yet still, on a daily basis we encounter service that frustrates us. Whilst the emergence of technology has no doubt brought efficiency to many areas of business activity, including the third sector, it has led to the standardised and indifferent service we regularly receive. We appear to have lost sight that people do business with people. Through efficient technology, our organisations may be serviceable but they are not service able. The arrival of Generation Y and the developments in social media, provide businesses with a whole new way to engage with their customers, but also provide a new way for customers to rate companies, products and services: not always in a positive manner. 'Like' or '#Fail' have become part of our social language. Organizations that refocus on the need to treat customers in a way that satisfies them, and not the technology, will have better customer retention, lower costs of replacement and will build their brand value through better reputations. Service-Ability delves deeply into these areas to show how today's managers need to re-think the way we structure, manage, lead and organize our companies to achieve total 'customer-centric' work cultures that develop lasting relationships with customers.

*Twelve Hundred Miles by Horse and Burro* Sep 06 2020 The breeding-bird population report that resulted from Ligon's solo horseback journey through New Mexico, photographs from glass plate negatives, and Ligon's own personal diary from these travels are presented in this book. Using his original itinerary and handwritten report, the authors revisited many of the places that Ligon surveyed and in a few cases were even able to locate a repeat Ligon's early photographs. The result is a chronicle of a young man from a West Texas ranching family with a driving ambition to be a professional naturalist and writer.

*The Planter of Modern Life: How an Ohio Farm Boy Conquered Literary Paris, Fed the Lost Generation, and Sowed the Seeds of the Organic Food Movement* Jun 15 2021 Winner of the 2021 IACP Award for Literary or Historical Food Writing Longlisted for the 2021 Plutarch Award How a leading writer of the Lost Generation became America's most famous farmer and inspired the organic food movement. Louis Bromfield was a World War I ambulance driver, a Paris expat, and a Pulitzer Prize-winning novelist as famous in the 1920s as Hemingway or Fitzgerald. But he cashed in his literary success to finance a wild agrarian dream in his native Ohio. The ideas he planted at his utopian experimental farm, Malabar, would inspire America's first generation of organic farmers and popularize the tenets of environmentalism years before Rachel Carson's *Silent Spring*. A lanky Midwestern farm boy dressed up like a Left Bank bohemian, Bromfield stood out in literary Paris for his lavish hospitality and his green thumb. He built a magnificent garden outside the city where he entertained aristocrats, movie stars, flower breeders, and writers of all stripes. Gertrude Stein enjoyed his food, Edith Wharton admired his roses, Ernest Hemingway boiled with jealousy over his critical acclaim. Millions savored his novels, which were turned into Broadway plays and Hollywood blockbusters, yet Bromfield's greatest passion was the soil. In 1938, Bromfield returned to Ohio to transform 600 badly eroded acres into a thriving cooperative farm, which became a mecca for agricultural pioneers and a country retreat for celebrities like Humphrey Bogart and Lauren Bacall (who were married there in 1945). This sweeping biography unearths a lost icon of American culture, a fascinating, hilarious and unclassifiable character who—between writing and plowing—also dabbled in global politics and high society. Through it all, he fought for an agriculture that would enrich the soil and protect the planet. While Bromfield's name has faded into obscurity, his mission seems more critical today than ever before.

*Dallas Aviation* Feb 09 2021 Since Otto Brodie's airplane flight at Fair Park in 1910, the city of Dallas has seen over 100 years of rich and diverse aviation activity. Many of those years were spent on a long and complex road to a consolidated airport for the Dallas-Fort Worth area, an impasse finally resolved with the dedication of Dallas-Fort Worth Regional Airport in 1974. Central to Dallas aviation history is Love Field, established as a military base in 1917. A waypoint for famous flights such as the first round-the-world flight in 1924, a venue for colorful characters like barnstormer and bootlegger "Slats" Rodgers, and the site of World War II's largest Air Transport Command base--Love Field was all this and more. Although no longer the region's primary commercial airfield, Love Field remains a major aviation facility as the home of Southwest Airlines and several internationally recognized business aircraft operations.

***The Patriot Poets*** Jan 11 2021 Since before the Declaration of Independence, poets have shaped a collective imagination of nationhood at critical points in American history. In *The Patriot Poets* Stephen Adams considers major odes and "progress poems" that address America's destiny in the face of slavery, the Civil War, imperialist expansion, immigration, repeated financial boom and bust, gross social inequality, racial and gendered oppression, and the rise of the present-day corporate oligarchy. Adams elucidates how poets in the nineteenth and twentieth centuries addressed political crises from a position of patriotic idealism and how military interventions overseas in Cuba and in the Philippines increasingly caused poets to question the actions of those in power. He traces competing loyalties through major works of writers at both extremes of the political spectrum, from the radical Republican versus Confederate voices of the Civil War, through New Deal liberalism versus the lost-cause propaganda of the defeated South and the conservative isolationism of the 1930s, and after the Second World War, the renewed hope of Black leaders and the existential alienation of Allen Ginsberg's counter-culture. Blazing a new path of critical discourse, Adams questions why America, of all nations, has appeared to rule out politics as a subject fit for poetry. His answer draws connections between familiar touchstones of American poetry and significant yet neglected writing by Philip Freneau, Sidney Lanier, Archibald MacLeish, William Vaughn Moody, Muriel Rukeyser, Genevieve Taggard, Allen Tate, Henry Timrod, Melvin B. Tolson, and others. An illuminating and pioneering work, *The Patriot Poets* provides a rich understanding of the ambivalent relationship American poets and poems have had with nation, genre, and the public.

***Literary Ghosts from the Victorians to Modernism*** Apr 13 2021 This book resituates the ghost story as a matter of literary hospitality and as part of a vital prehistory of modernism, seeing it not as a quaint neo-gothic ornament, but as a powerful literary response to the technological and psychological disturbances that marked the end of the Victorian era. Linking little-studied authors like M. R. James and May Sinclair to such canonical figures as Dickens, Henry James, Woolf, and Joyce, Thurston argues that the literary ghost should be seen as no mere relic of gothic style but as a portal of discovery, an opening onto the central modernist problem of how to write 'life itself'. Ghost stories should be seen as a distinctly neo-gothic genre, and as such are split between an ironic, often parodic reference to Gothic style and an evocation of 'life itself,' an implicit repudiation of all literary style. Reading the ghost story as both a guest and a host story, this book traces the ghost as a disruptive figure in the 'hospitable' space of narrative from Maturin, Poe and Dickens to the fin de siècle, and then on into the twentieth century. --

***Crossing Empires*** Jun 23 2019 Weaving U.S. history into the larger fabric of world history, the contributors to *Crossing Empires* de-exceptionalize the American empire, placing it in a global transimperial context. They draw attention to the breadth of U.S. entanglements with other empires to illuminate the scope and nature of American global power as it reached from the Bering Sea to Australia and East Africa to the Caribbean. With case studies ranging from the 1830s to the late twentieth century, the contributors address topics including diplomacy, governance, anticolonialism, labor, immigration, medicine, religion, and race. Their transimperial approach—whether exemplified in examinations of U.S. steel corporations partnering with British imperialists to build the Ugandan railway or the U.S. reliance on other empires in its governance of the Philippines—transcends histories of interimperial rivalries and conflicts. In so doing, the contributors illuminate the power dynamics of seemingly transnational histories and the imperial origins of contemporary globality. Contributors. Ikuko Asaka, Oliver Charbonneau, Genevieve Clutario, Anne L. Foster, Julian Go, Michel Gobat, Julie Greene, Kristin L. Hoganson, Margaret D. Jacobs, Moon-Ho Jung, Marc-William Palen, Nicole M. ***The History of Oncology*** Dec 30 2019 'The story of oncology is not only fascinating but also contains many accounts of dead ends, chance discoveries, illusions, mistakes and disappointments alongside the few successes.' These words are taken from the introduction to this book. The author, professor emeritus of Medical Oncology, reviews all aspects of the problem of cancer from a historical perspective, from the oldest existing records to the latest scientific and medical advances. It will interest the many people engaged in the treatment of cancer to read how the current therapeutic methods came about, and the book may also provide inspiration for cancer researchers, and for all those directly or indirectly involved with cancer. The layman looking for background information on a particular treatment may find it useful too. The various chapters can be read independently. A glossary and a few explanatory diagrams augment the text. This book grew out of an invitation the author received to lecture on the history of oncology. During his background reading, he discovered that there was no single volume dealing with the entire history of the subject. Fortunately, however, a great deal of information could be found here and there in the literature. As he read, he was struck by the fascinating stories behind many discoveries, and felt impelled to put them together in a single comprehensive account. The results of his labors are presented in this remarkable volume. The author, Prof. D.J.Th. (Theo) Wagener, was head of the department of Medical Oncology at the Radboud University Nijmegen Medical Centre in the Netherlands from 1982 to 2001, chairman of the Educational Committee of the European Society of Medical Oncology (ESMO), a member of the Educational Committee of the American Society of Clinical Oncology (ASCO) and a member of various international scientific working groups, mainly of the European Organization for Research and Treatment of Cancer (EORTC).

***Saving the Nation*** Sep 18 2021 While Protestant Christians made up only a small percentage of China's overall population during the Republican period, they were heavily represented among the urban elite. Protestant influence was exercised through churches, hospitals, and schools, and reached beyond these institutions into organizations such as the YMCA (Young Men's Christian Association) and YWCA (Young Women's Christian Association). The YMCA's city associations drew their membership from the urban elite and were especially influential within the modern sectors of urban society. Chinese Protestant leaders adapted the social message and practice of Christianity to the conditions of the republican era. Key to this effort was their belief that Christianity could save China that is, that Christianity could be more than a religion focused on saving individuals, but could also save a people, a society, and a nation. *Saving the Nation* recounts the history of the Protestant elite beginning with their participation in social reform campaigns in the early twentieth century, continuing through their contribution to the resistance against Japanese imperialism, and ending with Protestant support for a social revolution. The story Thomas Reilly tells is one about the Chinese Protestant elite and the faith they adopted and adapted, Social Christianity. But it is also a broader story about the Chinese people and their struggle to strengthen and renew their nation to build a New China.

***Oswald Boelcke*** Apr 01 2020 This biography of the pioneering WWI flying ace who mentored the Red Baron is "fascinating . . . [it] captures combat aviation at its inception" (MiG Sweep: The Magazine of Aviation Warriors). With a total of forty victories, Oswald Boelcke was Germany's first ace in World War I—and a century later he remains a towering figure in the history of air warfare, renowned for his character, inspirational leadership, organizational genius, development of air-to-air tactics, and impact on aerial doctrine. Paving the way for modern air forces across the world with his pioneering strategies, Boelcke had a dramatic effect on his contemporaries. The famed Red Baron's mentor, instructor, squadron commander, and friend, he exerted a tremendous influence upon the German air force. He was one of the first pilots to be awarded the famous Pour le Mérite, commonly recognized as the "Blue Max." All of this was achieved after overcoming medical obstacles in childhood and later life with willpower and determination. Boelcke even gained the admiration of his enemies: After his tragic death in a midair collision, Britain's Royal Flying Corps dropped a wreath on his funeral, and several of his captured foes sent another wreath from their German prison camp. His name and legacy live on, as seen in the Luftwaffe's designation of the Tactical Air Force Wing 31 "Boelcke." This definitive biography reveals his importance as a fighter pilot who set the standard in military aviation.

***Photography and Its Origins*** Aug 25 2019 Recent decades have seen a flourishing interest in and speculation about the origins of photography. Spurred by rediscoveries of "first" photographs and proclamations of photography's death in the digital age, scholars have been rethinking who and what invented the medium. *Photography and Its Origins* reflects on this interest in photography's beginnings by reframing it in critical and specifically historiographical terms. How and why do we write about the origins of the medium? Whom or what do we rely on to construct those narratives? What's at stake in choosing to tell stories of photography's genesis in one way or another? And what kind of work can those stories do? Edited by Tanya Sheehan and Andrés Mario Zervigón, this collection of 16 original essays, illustrated with 32 colour images, showcases prominent and emerging voices in the field of photography studies. Their research cuts across disciplines and methodologies, shedding new light on old questions about histories and their writing. *Photography and Its Origins* will serve as a valuable resource for students and scholars in art history, visual and media studies, and the history of science and technology.

***I Glanced Out the Window and Saw the Edge of the World*** Jun 03 2020 This book is about WAR--not the causes and results, not the planning and the

campaigns, not the artillery and the bombs. It is about the heinous crimes committed by the combatants, the horrifying experiences of civilians, the devastation of cities and villages, the killing and the dying, the glory leading to revulsion and guilt, and the assimilation of suffering that either ends in death or in the triumph of the soul. It looks at the struggle of the church to remain faithful and the servants of the church who seek to bring sense and solace to the victims. It discusses antisemitism, racism, and war itself from biblical perspectives. It reveals the unjustifiable reasons for engaging in war and how this brings catastrophic results for all peoples--the mental instability of the survivors and the loss and grief of those on the home front. In war, how can men and women carry out the actions that they do? As Viktor Frankl writes: "After all, man is that being who has invented the gas chambers of Auschwitz; however, he is also that being who has entered those gas chambers upright, with the Lord's Prayer or the Shema Yisrael on his lips."

**C.P. Snow's Strangers and Brothers as Mid-twentieth-century History** Aug 06 2020 This book studies C.P. Snow's eleven-volume series of novels (*Strangers and Brothers*) as documents detailing the social and political life of mid-twentieth-century Britain, and points out the uses for the novels in the academic study of that time period. Both Snow and his central character, Lewis S. Eliot, started from unremarkable origins in terms of their mutual background in the lower reaches of the middle class, their dreams of success in their teen years, and their early professional education in a new, struggling academic institution in the mid-1920s. Neither could really be considered typical for men of their class. Eliot's working life would include being a very minor town clerk, a barrister, an advisor to a powerful industrialist, a Cambridge don, a moderately powerful civil servant, and finally, in early retirement, a writer. Eliot would befriend members of both the traditional and Jewish upper classes, scholars and brilliant scientists, powerful behind-the-scenes civil servants, second-tier British and Nazi politicians, financiers and industrialists, Communists, and writers and artists, providing a fairly broad overview of parts of the middle class and ruling elites of the periods. Snow's sequence of novels is therefore useful to the historian of twentieth-century Britain, both in understanding the period as it recedes away from common experience and in presenting the period in the classroom. Snow was a classic twentieth-century writer who presented a more balanced account of the British «governing classes» of the middle third of the twentieth century than did the upper-class (and would-be upper-class) or working-class writers of the same period. His novels provide an insight that every student of twentieth-century Britain must have on hand.

**The Triangle Fire** May 27 2022 In 1911, a fire at the Triangle Waist Company in New York City claimed the lives of 146 workers, mainly young immigrant women, who either leaped to their deaths or were trapped in the blaze by locked doors and inadequate fire escapes. The tragedy brought national attention to the unsafe working conditions, long hours, and low pay that had prompted a national garment workers' strike a year before. Jo Ann Argersinger's volume examines the context, trajectory, and impact of this Progressive Era event. An introduction explores the demands industrialization placed upon urban working women, their fight to unionize, and the Triangle fire's significance in the greater scope of labor reform. Documents from newspaper reports to the personal stories of labor agitators and fire survivors continue the story, giving voice to the "girl strikers," their enemies and upper-class allies in the effort to reform the garment industry, and the public outrage that followed the fire. Document headnotes, a chronology, questions for consideration, a selected bibliography, and an index enrich students' understanding of this historical moment.

**Routledge Handbook of Sport, Gender and Sexuality** Mar 13 2021 The Routledge Handbook of Sport, Gender and Sexuality brings together important new work from 68 leading international scholars that, collectively, demonstrates the intrinsic interconnectedness of sport, gender and sexuality. It introduces what is, in essence, a sophisticated sub-area of sport sociology, covering the field comprehensively, as well as signalling ideas for future research and analysis. Wide-ranging across different historical periods, different sports, and different local and global contexts, the book incorporates personal, ideological and political narratives; varied conceptual, methodological and theoretical approaches; and examples of complexities and nuanced ways of understanding the gendered and sexualized dynamics of sport. It examines structural and cultural forms of gender segregation, homophobia, heteronormativity and transphobia, as well as the ideological struggles and changes that have led to nuanced ways of thinking about the sport, gender and sexuality nexus. This is a landmark work of reference that will be a key resource for students and researchers working in sport studies, gender studies, sexuality studies or sociology.

**Premonitions of the Titanic Disaster** Dec 22 2021 Passengers cancelling their tickets for Titanic's maiden voyage out of apprehension; a famous social reformer who died on Titanic, warned in 1911 that he would be in danger from water in April 1912; inhabitants of the remote islands of Fiji aware of the sinking before reports of the collision reached the Pacific; a dying girl who, on 14 April 1912, 'sees' a big ship sinking in the water and mysteriously knows the name of the violinist in Titanic's orchestra. These are just a few of the numerous claims to psychic foreknowledge of the ship's sinking. Within days of the widely-publicised disaster of 1912, stories began circulating of extraordinary omens and individuals who supposedly had supernatural premonitions of the disaster. Furthermore, four fictional works – one dating as far back as twenty-six years – came to be seen as anticipating the disaster. Between 1960 and 2006, five major commentators published extended analyses of the alleged premonitions, none of which is now easily accessible to an English readership. This book examines them all in detail. The whole treatment of the matter opens up fascinating questions concerning the paranormal, but also raises and leaves unresolved crucial issues specific to premonitions and how they can be legitimately examined. Readers are left to make their own judgement on Titanic premonitions.

**Beech Grove** Nov 20 2021 Early-20th-century Indianapolis was developing into a major transportation center. The extension of rail lines operated by the "Big Four Railroad," the Cleveland, Chicago, Cincinnati, and St. Louis Railway, invaded farmland 5 miles southeast of the busy Indianapolis Union Station. By 1904, the native beech trees neighbored the construction of the Big Four Shops, a facility charged with the production of steam locomotives. The shops brought jobs, an immediate draw for commercial and residential development, culminating in 1906 when the unnamed, adjacent community incorporated as the town of Beech Grove. A century later, the city of Indianapolis has grown to entirely surround the vibrant community, yet Beech Grove retains its small town atmosphere. Anchored by a vibrant Main Street, the charm of Beech Grove is found within quiet residential neighborhoods, distinguished schools, diverse churches, and major employers, including Amtrak and St. Francis Hospital.
