**Not a Cat: a memoir** Dec 22 2021 A funny, expansive, affirming story with a powerful message of self-determination for young kids: No one can label us if we do not allow ourselves to be labeled. Our identities are ours to choose and to live. Between his opening greeting and the bookend closing page on which he stalks away after taking no questions, Gato wants to make one thing perfectly clear: Although he has four legs, two ears, and a long, long tail, the word "cat" does not define him. His identity is his alone to describe and determine. With the help of Danica Novgorodoff's laugh-out-loud illustrations, he takes us on a tour of his adventures, accomplishments, and daily activities that makes mincemeat of our first impressions. He wears a sweater and a leash, so is he a dog? He runs in pastures, so is he a horse? He likes flowers, so is he a bee? He swims, so is he a duck? He has flown in airplanes and ridden in subways, so is he a person? Maybe he's all those things, but what he truly is, he wants us to know, is Gato. To underline the story's message of empowerment and self-identity, the back cover and backmatter include photos of the real Gato (Winter Miller's cat) doing everything he claims and more. Signs on walls, headlines in newspapers, New Yorker cartoon homages, and sight gags on every page reward repeated readings and will make this book the first one that parents reach for at bedtime. All the stars for Chen's warmhearted space-travel story." —Kirkus, starred review Every family has issues. Most can't blame them on extraterrestrials. Evie Shao and her sister, Kass, aren't on speaking terms. Fifteen years ago on a family camping trip, their father and brother vanished. Their dad turned up days later, dehydrated and confused—and convinced he'd been abducted by aliens. Their brother, Jakob, remained missing. The women dealt with it very differently. Kass, suspecting her college-dropout twin simply ran off, became the rock of the family. Evie traded academics to pursue alien conspiracy theories, always looking for Jakob. When Evie's UFO network uncovers a new event, she goes to investigate. And discovers Jakob is back. He's different—older, stranger, and talking of an intergalactic war—but the tensions between the siblings haven't changed at all. If the family is going to come together to help Jakob, then Kass and Evie are going to have to fix their issues, and fast. Because the FBI is after Jakob, and if their brother is telling the truth, possibly an entire space armada, too. The perfect combination of action, imagination and heart, *Light Years from Home* is a touching drama about a challenge as difficult as saving the galaxy: making peace with your family...and yourself. "With heart and insight...Chen crosses the stakes and imagination of a space opera with the emotional depth and intricacy of a family drama." —Erika Swyler, bestselling author of *Light from Other Stars*

**Ecology Without Culture** Mar 25 2022 Cultures have long defined themselves through biological elements to prove their strength and longevity, from cherry blossoms in Japan to amber waves of grain in the United States. In *Ecology without Culture*, Christine L. Marran introduces the concept of biotopes—material and semiotic figures that exist for human perception—to navigate how and why the material world has proven to be such an effective medium for representing culture. A bold and timely reconsideration of ecocriticism, *Ecology without Culture* insists on decentering questions of culture to highlight the materiality of poetry, film, and prose fiction. Marran argues that ecocriticism can critique ecological realities more effectively from outside the frame of human exceptionalism. Through discussions of primarily non-Anglophone literature, poetry, and cinema about toxic events in contemporary history—from the depiction of slow violence in documentary by Tsuchimoto Noriaki to the powerful poetry of Ishimure Michiko—Marran argues that ecocriticism must find a way to engage culture without making the perpetuation of ethnoscapes and anthroposcapes the endgame of ecopolitics. Using the biological foundations and geological time scales of textual worlds to more deeply critique cultural humanism, Marran ultimately contends that the chief stumbling block to ecological thinking is not the image of nature, but the image of culture.

*The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing* Mar 01 2020 The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing explores the connections between singing and health, promoting the power of singing—in public policy and in practice—in confronting health challenges across the lifespan. These chapters shape an interdisciplinary research agenda that advances singing’s theoretical, empirical, and applied contributions, providing methodologies that reflect individual and cultural diversities. Contributors assess the current state of knowledge and present opportunities for discovery in three parts: Singing and Health Singing and Cultural Understanding Singing and Intergenerational Understanding In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, *The Routledge Companion to Interdisciplinary Studies in Singing* consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume III: Wellbeing focuses on this third question and the health benefits of singing, singing praises for its effects on wellbeing.

**Rethinking EMI** Nov 08 2020 Due to the competitive edge it confers on students, educational institutions, and non-English speaking nations in a globalized economy, English as a medium of instruction (EMI) has been gaining popularity in tertiary education in non-native English-speaking (NNES) countries. Institute-wide EMI implementation has often been imposed by top-down decisions, in combination with the optimistic view that the horse should always be placed before the cart. However, emerging evidence suggests that the delivery of such programs to NNES students has led to new pedagogical challenges and learning problems that go beyond the scope of language learning and teaching and deserve immediate attention. For example, how would an instructor respond to situations in which students’ learning of content is compromised by their limited language proficiency? This book draws on the current practice of EMI in diverse disciplines and university settings and examines how these new pedagogical and learning issues can be addressed. The discussion also involves a reflection on the essence of EMI in relation to the use of the first language (L1) as the medium of instruction in tertiary education. In addition, the book includes discussion about how to ensure and maintain the quality of EMI programs and assess the readiness of stakeholders for such programs, which include administrators, teachers, and students. The discussion is led by exemplars in Hong Kong and Taiwan, where the majority of students are native Chinese speakers, in the hope of developing critical perspectives and practical guidelines as references for EMI in other NNES settings. “The Open Access version of this book, available at <http://www.taylorfrancis.com/books/e/ISBN>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

**The Routledge Companion to Interdisciplinary Studies in Singing, Volume I: Development** May 27 2022 The Routledge Companion to Interdisciplinary Studies in Singing, Volume I: Development introduces the many voices necessary to better understand the act of singing—a complex human behaviour that emerges without deliberate training. Presenting research from the social sciences and humanities alongside that of the natural sciences and medicine alike, this companion explores the relationship between hearing sensitivity and vocal production, in turn identifying how singing is integrated with sensory and cognitive systems while investigating the ways we test and measure singing ability and development. Contributors consider the development of singing within the context of the entire lifespan, focusing on its cognitive, social, and emotional significance in four parts: Musical, historical and scientific foundations Perception and production Multimodality Assessment In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, *The Routledge Companion to Interdisciplinary Studies in Singing* consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume I: Development tackles the first of these three questions, tracking development from infancy through childhood to adult years.

*Pictures of Lily* May 15 2021 "I am going to find my parents... if I don't track them down I'll be one of the unlucky ones." So writes seventeen-year-old Lily Myers, for whom, adopted at birth, there are so many unanswered questions. Who are her biological parents? Does she have brothers and sisters? Where else might she have lived had if she not been given away? Most pressing is the simplest question of all: "Why was I given up?" In Lily's case there is refuge in melody. It's in the dub venues of the north of England, in the fizzing bass lines, the buzz of static. Here is the volume to quell the doubts, the fears, even the truth. Yet these melodies have the power to suggest possibilities of their own - not least when coupled with Ayahuasca, a visionary plant used by Amazonian shamans as a vehicle to commune with the spirit world, a world where there can be no secrets. Hitherto Lily's quest has been confined to this psychic plane, transcending space and time to communicate with spirits so real they are real, gathering from them clues about her past, her people. It has been at perilous cost to her mental health. Now, at eighteen, her birth certificate and adoption file are hers for the taking. But will the journey end there? Indeed can she ever come to understand the true significance of 'finding my parents'? Praise for Matthew Yorke's previous novel *The March Fence*: This is a novel which throbs with life and wonder at the manifold varieties of experience... The talent for writing novels may be hard to define, yet it is unmistakable when encountered... is the real thing... the best first novel that I have read in a long time. Alan Massie. A most impressive debut. Elaine Feinstein, *The Times*. Distinctive, energetic...the narrative takes a real grip. Hilary Mantel. *Daily Telegraph*.

But when the king asks her to falsely prophesy Cyrus's love story for an upcoming ball, Violet awakens a dreaded curse, one that will end in either damnation or salvation for the kingdom—all depending on the prince's choice of future bride. Violet faces her own choice: Seize an opportunity to gain control of her own destiny, no matter the cost, or give in to the ill-fated attraction that's growing between her and Cyrus. Violet's wits may protect her in the cutthroat court, but they can't change her fate. And as the boundary between hatred and love grows ever thinner with the prince, Violet must untangle a wicked web of deceit in order to save herself and the kingdom—or doom them all.

**Portrait of a Thief** Apr 13 2021 INSTANT NEW YORK TIMES BESTSELLER Named A Most Anticipated Book of 2022 by \*Marie Claire\* \*Washington Post\* \*Vulture\* \*NBC News\* \*Buzzfeed\* \*Veranda\* \*PopSugar\* \*Paste\* \*The Millions\* \*Bustle\* \*Crimereads\* Goodreads\* \*Bookbub\* \*Boston.com\* and more! "The thefts are engaging and surprising, and the narrative brims with international intrigue. Li, however, has delivered more than a straight thriller here, especially in the parts that depict the despair Will and his pals feel at being displaced, overlooked, underestimated and discriminated against. This is as much a novel as a reckoning." —New York Times Book Review Ocean's Eleven meets *The Farewell* in *Portrait of a Thief*, a lush, lyrical heist novel inspired by the true story of Chinese art vanishing from Western museums; about diaspora, the colonization of art, and the complexity of the Chinese American identity. History is told by the conquerors. Across the Western world, museums display the spoils of war, of conquest, of colonialism: priceless pieces of art looted from other countries, kept even now. Will Chen plans to steal them back. A senior at Harvard, Will fits comfortably in his carefully curated roles: a perfect student, an art history major and sometimes artist, the eldest son who has always been his parents' American Dream. But when a mysterious Chinese benefactor reaches out with an impossible—and illegal—job offer, Will finds himself something else as well: the leader of a heist to steal back five priceless Chinese sculptures, looted from Beijing centuries ago. His crew is every heist archetype one can imagine—or at least, the closest he can get. A con artist: Irene Chen, a public policy major at Duke who can talk her way out of anything. A thief: Daniel Liang, a premed student with steady hands just as capable of lockpicking as suturing. A getaway driver: Lily Wu, an engineering major who races cars in her free time. A hacker: Alex Huang, an MIT dropout turned Silicon Valley software engineer. Each member of his crew has their own complicated relationship with China and the identity they've cultivated as Chinese Americans, but when Will asks, none of them can turn him down. Because if they succeed? They earn fifty million dollars—and a chance to make history. But if they fail, it will mean not just the loss of everything they've dreamed for themselves but yet another thwarted attempt to take back what colonialism has stolen. Equal parts beautiful, thoughtful, and thrilling, *Portrait of a Thief* is a cultural heist and an examination of Chinese American identity, as well as a necessary critique of the lingering effects of colonialism.

**Radical** Sep 26 2019 In this "powerful and unflinching page-turner" (New York Times), a healthcare journalist examines the science, history, and culture of breast cancer. As a health-care journalist, Kate Pickert knew the emotional highs and lows of medical treatment well -- but always from a distance, through the stories of her subjects. That is, until she was unexpectedly diagnosed with an aggressive type of breast cancer at the age of 35. As she underwent more than a year of treatment, Pickert realized that the popular understanding of breast care in America bears little resemblance to the experiences of today's patients and the rapidly changing science designed to save their lives. After using her journalistic skills to navigate her own care, Pickert embarked on a quest to understand

the cultural, scientific and historical forces shaping the lives of breast-cancer patients in the modern age. Breast cancer is one of history's most prolific killers. Despite billions spent on research and treatments, it remains one of the deadliest diseases facing women today. From the forests of the Pacific Northwest to an operating suite in Los Angeles to the epicenter of pink-ribbon advocacy in Dallas, Pickert reports on the turning points and people responsible for the progress that has been made against breast cancer and documents the challenges of defeating a disease that strikes one in eight American women and has helped shape the country's medical culture. Drawing on interviews with doctors, economists, researchers, advocates and patients, as well as on journal entries and recordings collected over the author's treatment, Radical puts the story of breast cancer into context, and shows how modern treatments represent a long overdue shift in the way doctors approach cancer -- and disease -- itself.
