Moon Hoax: Debunked! Nov 19 2021 A no-nonsense, fact-filled debunking of all the main "Moon hoax" conspiracy theories, collected in a single book. If you're an open-minded doubter, you'll find technically accurate but plain-English answers to your questions; if you're a space enthusiast or professional, you'll find a handy reference for dealing with the most obstinate hoax believers and for clarifying popular objections and misconceptions about the Moon landings. "Moon Hoax: Debunked!" is also an opportunity to rediscover and celebrate one of mankind's greatest voyages, which doesn't need conspiracy theories to be a fascinating adventure. For example, did you know how close to failure each flight actually came? Did you know that pictures of Playmates were smuggled to the Moon to prank the astronauts? Or that there was a secret Soviet plan to land a Russian on the Moon before the US? Paolo Attivissimo is a British-Italian science journalist, lifelong space enthusiast and contributor to NASA's Apollo Lunar Surface Journal.

Off Target Jul 28 2022 Every week the TV news highlights the routine use of drones and guided missiles against terrorist enemies and the recreational use of drones has become commonplace. The Nazi WWII development of guided missiles and bombs is often given credit for America's Cold War success in this realm. However, it was during that war that America, and the Air Force, in particular, also began the development of systems and weapons that laid the foundation for today's technology. 'Off Target' relates in detail the then "Secret" research, development, and combat employment of these early guided bombs, missiles, and drones from 1917 to 1948. Using formerly Secret/Confidential manuals, reports, microfilm print outs, and photos, collected over 40 years, author Wolf, gives the air war historian and enthusiast a detailed look at this unknown topic that progressed from biplane drones to sophisticated post-WWII guided missiles. Among the subjects discussed are Sperry's aerial torpedo and the Kettering "Bug" of WWI to WWII's early rudimentary GB Series Glide Bombs to the more sophisticated VB Series that evolved from radio, heat, light, or television guidance. The Aphrodite/Joseph Kennedy B-17, BQ, TDR, and target drones are discussed as are the SWOD, GLOMB, GORGON, and JB Jet bomb series.

Apple TV For Dummies May 14 2021 Watch your iTunes downloads on a television screen with help from Apple TV For Dummies. This comprehensive guide offers shopping tips; easy-to-understand installation and setup directions; and advanced material like content creation, troubleshooting, and optimizing network speeds. [America's First Network TV Censor](#) May 02 2020 America's First Network TV Censor: The Work of NBC's Stockton Helffrich is a unique examination of early television censorship, centered around the papers of Stockton Helffrich, the first manager of the censorship department at NBC. Set against the backdrop of postwar America and contextualized by myriad primary sources including original interviews and unpublished material, Helffrich's reports illustrate how early censorship of advertising, language, and depictions of sex, violence, and race shaped the new medium. While other books have cited Helffrich's reports, none have considered them as a body of work, complemented by the details of Helffrich's life and the era in which he lived. America's First Network TV Censor explores the ways in which Helffrich's personal history and social class influenced his perception of his role as NBC-TV censor and his tendency to ignore certain political and cultural taboos while embracing others. Author Robert Pondillo considers Helffrich's life in broadcasting before and after the Second World War, and his censorial work in the context of 1950s American culture and emerging network television. Pondillo discusses the ways that cultural phenomena, including the arrival of the mid-twentieth-century religious boom, McCarthyism, the dawn of the Civil Rights era, and the social upheaval over sex, music, and youth, contributed to a general sense that the country was morally adrift and ripe for communist takeover. Five often-censored subjects—advertising, language, and depictions of sex, violence, and race—are explored in detail, exposing the surprising complexity and nuance of early media censorship. Questions of whether too many sadistic westerns would coarsen America's children, how to talk about homosexuality without using the word "homosexuality," and how best to advertise toilet paper without offending people were on Helffrich's mind; his answers to these questions helped shape the broadcast media we know today.
