Swift County, Minnesota Mar 13 2021 Not permanently settled until after the Civil War, Swift County was one of the last frontiers of the United States. Once part of the vast prairie land occupied by the Dakota Indians, settlement began in the 1860s. The Swift County Historical Society has compiled over 200 vintage images in order to capture a glimpse of the region's formative years-the establishment of its trading centers and industries, as well as the educational, spiritual, and social lives of its early settlers. Located in west central Minnesota, the small rural towns of Swift County were once busy trading centers. Through these historic photographs, the reader can follow the changes that occurred on Atlantic and Pacific Avenues in Benson from the 1880s to the 1930s, see the sod house of Swenoda Township, and witness turn of the century rural life in towns like Danvers, Murdock, Appleton, and Kerkhoven.

[University Physics](#) Apr 13 2021 Reese writes a text that embraces the spirit of many reform goals, such as better integration of modern physics topics, a stronger emphasis on conceptual understanding, and an attention to different learning styles. Most importantly, however, Reese writes for students to allow them not only to learn the tools that physics provides, but also to see why those tools work and the beauty of the ideas that underlie them. Because students sometimes fail to see how the topics of physics connect to each other or to the world outside the classroom, Reese introduces each new topic by describing how it relates to experiences and phenomena with which the student is already familiar or to topics previously discussed. Reese emphasizes introductory physics, rather than encyclopedic physics, leaving appropriate topics for more advanced courses. His thinking is that it is better to build technical knowledge on a firm foundation of fundamental principles rather than on a large collection of mere formulas. In doing this, he helps students develop a thorough understanding of the principles of basic areas of physics: kinematics, dynamics, waves, thermodynamics, electromagnetism, optics, relativity, and modern physics. Because most students cannot discern simplifying patterns and connections when faced with seemingly complex ideas, students learn physics through practice. To assist them, Reese integrates the most significant material from previous chapters into new material; provides an accurate conceptual understanding of fundamental physical principles by placing great emphasis on these principles and how they arose; points out the limits of applicability of the theories and equations of physics; and stresses connections among topics by incorporating many aspects of contemporary physics and astronomy into a mix of traditional topics.

Cuny Janssen: Whatever Works Jun 27 2022 Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was always love. Everything I heard from them and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages, engaged or planned couples and married couples.

Four Farces Feb 21 2022 Wild plots and quicksilver wit characterize the plays of Georges Feydeau. Called the greatest master of French comedy since Moliere by admirers such as Kenneth Tynan, Feydeau reflects the lusty tradition of the French bedroom farce as well as the tough exorbitant humor later to find full expression in the theater of the absurd. The plays offered in this volume represent the major stages of Feydeau's career. The one-act *Woody and Viewed* was his first comedy, written in 1880. On the *Marry-go-Wrong* shows Feydeau on the way to becoming a master of mad imbroglia, a talent that he demonstrates in *Not by Bed Alone*. *Going to Pot* is a one-act play of conjugal strife of the emotional intensity that marked his work toward the end of his career.

Cottonlandia Sep 18 2021 The poems in Rebecca Black's first volume, Cottonlandia, move through myth and landscape, beginning in the deep South's shimmer and tar and ending in the soot and orange dolor of the California desert. Cottonlandia conjures a proto-continent where fashionable golems pose for antique photographs and nineteenth-century naturalists wander into the melee of the civil rights struggle in the South. By turns haunting and comic, Black's poems describe the archaeology of the apocalypse. Countesses leave behind poisonous snapshots, lovers examine their shapes in the mirror, and Seminoles return for skeletons arranged illegally in exhibits, even as floods force antebellum coffins to rise. In the title poem, reproduced on this page, the lines of a spiritual splinter and circle through a loose narrative, evoking the delirium of class and race in the author's Georgia hometown. Throughout the volume, poems quarrel with primal forces, threading the needle of historical oblivion with a dark, intelligent, and incantatory voice.

Next Extinct Mammal May 27 2022 Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.
