The Effect of Gear Change on Vehicle Fuel Economy Sep 17 2021 In regard of reducing fuel consumption of transport sector informing the drivers and reminding the importance of gear change factor to manufacture companies are two significant steps. This study will provide benefits to individual drivers, companies owning many vehicle fleets and vehicle manufacture companies. For this research, two drive cycles and one type of vehicle; petrol consuming, manual transmission 'Ford focus 1.6 Mk2' has been selected. One of the very important aspects of this study is the use of Warpstar simulation software program at the University of Warwick International Digital Laboratory. Using this simulation program provide the opportunity to combine and then contrast various drive cycles, gear changes for each gear at various engine-speeds in rad/sec. Even though this research employed one specific vehicle to carry out the simulations on and used NEDC and Hyzem Urban drive cycles, it is aimed to provide possible engine speed range for gear change in each gear to achieve a satisfactory fuel economy outcomes for making generalizations.

Nowadays, several therapeutic strategies had improved toward last decades. Surgery is many times still the best curative treatment, mainly in early stage disease. However, Radiotherapy and chemotherapy acquired a main role in this scenario. Target therapies were introduced for medical oncology practice and are demonstrating a hallmark of a new era in cancer treatment. More recently, immunotherapy has been considered the novel cornerstone in cancer treatment. The 2nd edition of the *International Manual of Oncology Practice (iMOP)* emerged after the great success of the *iMOP 1st* edition as a reference for medical oncologists and medical residents in the field. In this edition, several chapters were revised and its addresses from the molecular issues of cancer sciences to the clinical practice in medical oncology. In addition, multiple choice questions and clinical cases were included in the main chapters in order to improve the reader learning. The book focuses systemic treatments in many areas of medical oncology, such as breast cancer, gastrointestinal, thoracic, urological oncology, head and neck tumors, bone tumors, sarcomas and palliative care. The topics herein discussed will provide the readers a step forward in the medical oncology practice understanding and give facilities for help in cancer patient treatments.
