

Doing Right is a practical guide to decision making in those situations. Using dozens of real cases, it analyzes the most common ethical problems encountered by physicians and medical trainees. The many topics covered include truth-telling, refusal of treatment, confidentiality, rationing of health care, parents' refusal of treatment for their children, living wills, the ethics of medical research, and assisted suicide. Written simply and concisely with little philosophical or legal jargon, Doing Right should be essential reading for medical students, residents, and practising physicians. For those who teach bioethics, it will be welcome as a practical and readable textbook.

*Am I Doing This Right?* Oct 20 2021 Hi there, person judging this book by the cover. (Are there other ways to buy a book?) Since it caught your eye, maybe you have a nagging sense that you're supposed to be doing more with your life-but no idea how to figure it out, since you live in an overwhelming world. I had that problem, too, and did all the wrong things to fix it. Then, I learned what people regret most when they die, and studied what the best thinkers of humanity have said about how to not waste your brief blip on Earth. Turns out, there are only 7 questions that matter in life-but most of us never ask them, and live far beneath our potential as a result. If you read this book and answer these 7 questions for yourself, you'll find purpose, develop confidence, expand your income (maybe quadruple it, like I did), and enjoy countless other benefits. If you do this and end up on your death bed with regrets in 80 years, I'll personally return your money.

**Doing Right** Jul 25 2019 Doing what's right has never been more confusing. The complexities of 21st-century life can be bewildering. We all need a map for negotiating the intricacies of competing priorities and values. What can help us decide what is right and wrong? David W. Gill finds "Ten Words" that God originally spoke to Israel to be just as pertinent today as they were when Moses first heard them. As Christians what we long for is not damage control, but mission control. The Ten Commandments offer a sound set of ethical principles that takes us beyond mere damage control to mission control, a guide that shows us how we can be proactive in fulfilling our dual purposes of loving God and others. This rich, scriptural teaching will help Christians from every walk of life--whether engineers, bus drivers, managers, restaurant workers, PTA members, parents, neighborhood volunteers, nurses, teachers, coaches, attorneys, journalists or physicians--fulfill their calling to be salt and light within their own spheres of influence. A must-read book for a chaotic world.

*The Grey Woman* Aug 25 2019 Anna, a German mill-owner's daughter, marries a French aristocrat and moves to France. She discovers that her husband killed his previous wife and that he is trying to kill her as well. Quick, intriguing, and with an extremely interesting plot, 'The Grey Woman' (1861) is a short story by Elizabeth Gaskell for anyone who enjoys a good gothic shudder. Incredibly progressive for its time, it is about the survival of the ill-treated woman who has decided that enough is enough. Elizabeth Cleghorn Gaskell (1810-1865) was an English novelist, short story writer, and biographer, best known for her novels 'North and South' and 'Wives and Daughters' as well as her biography of Charlotte Brontë. Gaskell was viewed as a minor author until the 1950s where it became evident that her depiction of industrial environments and social problems was brilliant and poignant.

*You Can't Go Wrong Doing Right* Jun 15 2021 An unforgettable account of a quietly remarkable life, Robert Brown's memoir takes readers behind the scenes of pivotal moments from the 20th century, where the lessons he learned at his grandmother's knee helped him shape America as we know it today. Called "a world-class power broker" by the Washington Post, Robert Brown has been a sought-after counselor for an impressive array of the famous and powerful, including every American president since John F. Kennedy. But as a child born into poverty in the 1930s, Robert was raised by his grandmother to think differently about success. For example, "The best way to influence others is to be helpful," she told him. And, "You can't go wrong by doing right." Fueled by these lessons on humble, principled service, Brown went on to play a pivotal, mostly unseen role alongside the great and the powerful of our time: trailing the mob in 1950s Harlem with a young Robert F. Kennedy; helping the white corporate leadership at Woolworth integrate their lunch counters; channeling money from American businesses to the Civil Rights movement; accompanying Coretta Scott King, at her request, to Memphis the day after her husband had been shot; advising Richard Nixon on how to support black entrepreneurship; becoming the only person allowed to visit Nelson Mandela in Pollsmoor prison in Cape Town. Full of unbelievable moments and reminders that the path to influence runs through a life of generosity, YOU CAN'T GO WRONG DOING RIGHT blends a heartwarming, historically fascinating account with memorable lessons that will speak to the dreamer in all of us.

As Drucker put it, "There is nothing so useless as doing efficiently that which should not be done at all." Stack's 3T Leadership offers twelve practices that will enable executives to be effective and efficient, grouped into three areas where leaders spend their time: Strategic Thinking, Teamwork, and Tactics. **Intelligent Disobedience** Apr 13 2021 When It's Smart to Say No Nearly every week we read about a tragedy or scandal that could have been prevented if individuals had said no to ill-advised or illegitimate orders. In this timely book, Ira Chaleff explores when and how to disobey inappropriate orders, reduce unacceptable risk, and find better ways to achieve legitimate goals. The inspiration for the book, and its title, comes from the concept of intelligent disobedience used in guide dog training. Guide dogs must recognize and resist a command that would put their human and themselves at risk and identify safer options for achieving the goal. This is precisely what Chaleff helps humans do. Using both deeply disturbing and uplifting examples, as well as critical but largely forgotten research, he shows how to create a culture where, rather than "just following orders," people hold themselves accountable to do the right thing, always.

*Doing the Right Thing* Jan 11 2021 Tom Cooper combines the power of storytelling with analytical insight to help all of us - whether we are students, teachers or just curious readers - think more clearly about what it takes to make the best ethical decisions we can, even under difficult circumstances. A fascinating and inspiring read. Tamar Schapiro, Professor of Philosophy, Massachusetts Institute of Technology Tom Cooper's portraits of courage, an eclectic compendium of stories of leaders who faced monumentally difficult moral choices, remind us of the importance of the interplay of philosophy and history: Philosophical abstractions mean little outside the context of their application. Spanning 25 centuries, from Queen Esther and Socrates to Rachel Carson and John F. Kennedy, Doing the Right Thing takes 12 "ethics exemplars" and with grace and clarity -- and considerable insight -- transforms them into an original and compelling account of what it takes to "open your mind" and "open your heart." Theodore L. Glasser Professor of Communication, Stanford University Moral courage of people in power is never irrelevant. But if ever there was a time in which it was so searingly relevant it surely is today. And Tom Cooper is the perfect chronicler to bring this to our rational attention, via a series of twelve portraits of great ethical movers of history. Deeply researched, keenly reasoned, colorfully written with memorable detail, Cooper's book will, with any luck, inspire and guide great moral leaders in our time and well into the future." Paul Levinson, Professor of Communication and Media Studies, Fordham University I regard Tom Cooper as one of the world's leading contemporary communication ethics specialists. This, his latest book, carries all the passion, theoretical richness, and original insights which I associate with his work overall. Richard Lance Keeble, Professor of Journalism, University of Lincoln and Liverpool Hope University This profound book teaches moral philosophy with ingenuity. Its stunning transformation of moral philosophy into public discourse is historic. Doing the Right Thing has the promise of becoming a twenty-first century classic. Clifford Christians, Research Professor of Communication, University of Illinois

Doing Agile Right Aug 30 2022 Agile has the power to transform work--but only if it's implemented the right way. For decades business leaders have been painfully aware of a huge chasm: They aspire to create nimble, flexible enterprises. But their day-to-day reality is silos, sluggish processes, and stalled innovation. Today, agile is hailed as the essential bridge across this chasm, with the potential to transform a company and catapult it to the head of the pack. Not so fast. In this clear-eyed, indispensable book, Bain & Company thought leader Darrell Rigby and his colleagues Sarah Elk and Steve Berez provide a much-needed reality check. They dispel the myths and misconceptions that have accompanied agile's rise to prominence--the idea that it can reshape an organization all at once, for instance, or that it should be used in every function and for all types of work. They illustrate that agile teams can indeed be powerful, making people's jobs more rewarding and turbocharging innovation, but such results are possible only if the method is fully understood and implemented the right way. The key, they argue, is balance. Every organization must optimize and tightly control some of its operations, and at the same time innovate. Agile, done well, enables vigorous innovation without sacrificing the efficiency and reliability essential to traditional operations. The authors break down how agile really works, show what not to do, and explain the crucial importance of scaling agile properly in order to reap its full benefit. They then lay out a road map for leading the transition to a truly agile enterprise. Agile isn't a goal in itself; it's a means to becoming a high-performance operation. Doing Agile Right is a must-have guide for any company trying to make the transition--or trying to sustain high agility.

**Am I Doing This Right?** Dec 30 2019 This is not the life Quinn Kelly signed up for. She was supposed to graduate from college, get a job in a fancy Chicago art gallery, and escape the hometown she despises. Instead, she's rooming with her parents, drinking excessive amounts of boxed wine, and spending too much time not wearing pants. When Quinn grudgingly covers a shift at the family bar, her embarrassing behavior forces an ultimatum from her parents: get a job or move out. She finds employment at Flashy Foods, America's premier fake-food-display company. Painting clay food is a long way from the Chicago art scene, but at least it pays

the bills. When asked, Quinn won't admit where she works. She outright lies to friends, hoping to impress them with tales of her dream job. And all the while she continues applying for art gallery positions, hoping for a break. When that break finally comes, however, Quinn may discover the perfect life she imagines doesn't quite match up with reality. Funny and insightful, *Am I Doing This Right?* captures the confusion and growth that comes from realizing the world isn't the way you expect-and what you want isn't necessarily what you need.

**Doing Right** May 27 2022 *Doing Right* is a careful, thorough, readable introduction to a Christian ethics based on the Decalogue. Following the implications of Jesus' double "Love Commandment," ten chapter-length studies show how each of the commandments guides our love for God, our love for our neighbors, our search for justice/righteousness, and our quest for life/freedom. As such, Christian ethics is not, despite first impressions, a catalog of "thou shalt nots" but rather a roadmap for a lifelong adventure guided by "ten words" on life, freedom, love, and justice. *Doing Right* draws deeply on the best Jewish and Christian scholarship over the centuries and then follows the ten principles wherever they lead, even into the thorny controversies of the present time. *Doing Right* works as a stand-alone study (of the ethics of principles and practices) but is also the companion to Gill's *Becoming Good* (on the ethics of character and virtue).

**Doing the Right Thing** Dec 22 2021 "This book is for all those who are seeking a human perspective on economic and organizational processes. It lays the foundations for a value based approach to the economy. The key questions are: "What is important to you or your organization?" "What is this action or that organization good for?" The book is directed at the prevalence of instrumentalist thinking in the current economy and responds to the calls for another economy. Another economy demands another economics. The value based approach is another economics; it focuses on values and on the most important goods such as families, homes, communities, knowledge, and art. It places economic processes in their cultural context. What does it take to do the right thing, as a person, as an organization, as a society? What is the good to strive for? This book gives directions for the answers. The value based approach restores the ancient idea that quality of life and of society is what the economy is all about. It advocates shifting the focus from quantities ("how much?") to qualities ("what is important?").

**Intelligent Disobedience** Sep 06 2020 Torture in Abu Ghraib prison. Corporate fraud. Falsified records at Veterans Administration hospitals. Teachers pressured to feed test answers to students. These scandals could have been prevented if, early on, people had said no to their higher-ups. Ira Chaleff discusses when and how to disobey inappropriate orders, reduce unacceptable risk, and find better ways to achieve legitimate goals. He delves into the psychological dynamics of obedience, drawing in particular on what Stanley Milgram's seminal Yale experiments-in which volunteers were induced to administer shocks to innocent people-teach us about how to reduce compliance with harmful orders. Using vivid examples of historical events and everyday situations, he offers advice on judging whether intelligent disobedience is called for, how to express opposition, and how to create a culture where citizens are educated and encouraged to think about whether orders make sense. --

Doing the Right Thing Oct 27 2019 An honest confrontation of systemic racism in faculty hiring—and what to do about it While colleges and universities have been lauded for increasing student diversity, these same institutions have failed to achieve any comparable diversity among their faculty. In 2017, of the nation's full-time, tenure-track and tenured faculty, only 3 percent each were Black men, Black women, Hispanic men, and Hispanic women. Only 6 percent were Asian/Pacific Islander men, 5 percent were Asian/Pacific Islander women, and 1 percent were American Indian/Alaska Native. Why are the numbers so abysmal? In *Doing the Right Thing*, Marybeth Gasman takes a hard, insightful look at the issues surrounding the recruitment and hiring of faculty of color. Relying on national data and interviews with provosts, deans, and department chairs from sixty major universities, Gasman documents the institutional forces stymieing faculty diversification, and she makes the case for how such deficiencies can and should be rectified. Even as institutions publicly champion inclusive excellence and the number of doctoral students of color increases, Gasman reveals the entrenched constraints contributing to the faculty status quo. Impediments to progress include the alleged trade-off between quality and diversity, the power of pedigree, the rigidity of academic pipelines, failures of administrative leadership, lack of accountability among administration and faculty, and the opacity and arbitrariness of the recruitment and hiring process. Gasman contends that leaders must acknowledge institutional failures of inclusion, pervasive systemic racism, and biases that restrict people of color from pursuing faculty careers. Recognizing that individuals from all backgrounds are essential to the creation and teaching of knowledge, *Doing the Right Thing* puts forth a concrete call for colleges and universities to take action and do better.
